I worked Ronnie on two-meters back in the late 80's. We were rolling down the highway, and I was behind his tour bus.

Check out the thrift stores. My local Salvation Army store sells unpaired stereo speakers from $3 to $10 or so. There's often some very suitable ones there.

2029. For that Old Tube Radio Sound . . . Try the Speaker-in-a-CardBoard-Box

Newsgroup: rec.radio.shortwave
Date: 2005-11-14 13:22:54 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1131974574.654372.224670@g49g2000cwa.googlegroups.com>
Source record: 48976

David,

For that Old Tube Radio Sound . . .
Try the Speaker-in-a-CardBoard-Box

First find/buy a 'basic' 4" to 5.25" Full Range Speaker.
[The High Efficiency + Small Magnet + One Way Kind]

Next - Take a CardBoard Box (9"W x 9H x 12"D)
{229mmW x 229mmH x 305mmD}
Single or Double Wall Corrugated "Shipping" CardBoard Box
from OfficeDepot / Staples / OfficeMax / UPS Store / ETC

Assemble the CardBoard Box {Speaker Enclosure} :
* Glued Closed One End which becomes the Front-End.
* Wait a Day for the Glue-End to Set and Harden.
* Cut a Hole to Fit your Speaker in the Glued End with Mounting Holes.

* Attach your Speaker Wires with Radio Connector to the Speaker
* Install the Speaker in the CardBoard Box and Mount it to the Inside
of the Glued-End.
* Folded Two of the Adjacent Flaps in-flat against the sides
at the Back-in-Side of the CardBoard Box and Tape and Glue
them in-place. Then Folded the other Two of the Adjacent Flaps
Even with the End of the Back-Side of the CardBoard Box
and Tape and Glue them in-place. This Creates a Rear 3"x3"
'Port' for the Speaker and gives it the Old Tube Radio Sound.

FWIW - Some People simply Fold All Four Flaps "IN" and
have the Back-end Fully Open and claim that this Gives a better
Old Tube Radio Speaker Sound to the Speaker-in-a-CardBoard- Box

TIP - Cover the Speaker with a Black Handkerchief - Go Raiders !

yes it is as simple as that ~ RHF

2032. Re: ABOUT - External Speakers for the Icom IC-R75 Receiver

Newsgroup: rec.radio.shortwave
Date: 2005-11-14 14:52:19 UTC
From: craig <craig@powersmith.net>
Message-ID: <1131979939.787954.281040@g44g2000cwa.googlegroups.com>
Source record: 48979

Ryan ...

You have several good options, many of which have been mentioned above. The biggest factor to consider when sorting through them all is the type of content you like to listen to.

If you primarily are interested in extended listening to strong broadcast and SW stations, you would want to have reasonable fidelity, high audio bandwidth and possibly high volume available to you. For this you would want to use computer speakers or equavilent or the Sounds Sweet approach. With my R75, I have the line out signal (labeled REC) connected to the line in of a Tivoli Audio Model One mono receiver. This small radio gives excellent audio when listening to broadcasts with high signal strengths and low background noise.

For more difficult listening situations, such as ham radio, utility stations, DXing, etc., the above approach is worse than the internal R75 speaker due to the exessive audio bandwidth. For these types of applications, you want to limit the bandwidth to exclude as much extraneous noise as possible, and accept some loss of fidelity. At low audio levels, I would rate the internal R75 speaker as approaching adequate in this regard. But as you have found, it does have some distortion and a very limited dynamic range. One good improvement should be the ICOM SP-23 external speaker. This unit provides higher sound levels and has selectable audio filters so that the lowpass and highpass response can be tailored to the content you are listining to. - i.e., high bandwidth for AM, medium for SSB and narrow for CW. It is complety passive and is driven by the 8 ohm external speaker line from the R75. Looks like a very flexible device. The downside is that it is fairly pricey - about $170. I will be getting one next month and am looking forward to evaluating it as I do a lot of CW on the ham bands. Will post my evaluation here in a month or so.

A third alternative, if you don't mind being tied to a computer, would be to tie the R75 line out to a computer sound card and use a DSP audio filter program on the computer to drive the computer speakers. This would give you the ultimate in customization of the audio response to various listening situations.

... Craig

2033. ClearSpeech base units on Ebay

An odd length of wire attached to your antenna terminal should do
fine. You might try different lengths: 20 feet, 30 feet, whatever. If
you're close to Radio Shack, they have this little kit for 5 bucks:

http://www.radioshack.com/product/index.jsp?productId=2104088&cp=&kw=outdoor+antenna+kit&p
arentPage=search

If the signals are too strong, you can shorten the wire.

Try to say away from power lines.

There's nothing exact here -- experiment and have fun.

Here are some basic antenna sites, altho' they are more ham oriented,
if you ever want to go in that direction.

I wonder if there is a photo/picture somewhere on the internet that shows how the Bose radio sound system works? I think the sound from the speaker(s) is routed through a channel/tunnel setup.I own a small kids type of record player/phonograph that dates back to the 1940's or 1950's and the sound is routed through a cardboard channel thingy.

it IS murder...

Methodist Bishops Repent Iraq War 'Complicity'
by K. J. Smith, 11/11/05

WASHINGTON -- Ninety-five bishops from President Bush's church said Thursday they repent their "complicity" in the "unjust and immoral" invasion and occupation of Iraq.

"In the face of the United States administration's rush toward military action based on misleading information, too many of us were silent," said
a statement of conscience signed by more than half of the 164 retired and
active United Methodist bishops worldwide.

President Bush is a member of the United Methodist Church, according to various published biographies. The White House did not return a request for comment on the bishops' statement.

Although United Methodist leadership has opposed the Iraq war in the past,
this is the first time that individual bishops have confessed to a personal failure to publicly challenge the buildup to the war.

The signatures were also an instrument for retired bishops to make their views known, said bishop Joseph H. Yeakel, who served in the Baltimore-Washington area from 1984 to 1996. The current bishop for the Baltimore-Washington area, John R. Schol, also signed the statement.

The statement avoids making accusations, said retired Bishop Kenneth L. Carder, instructor at Duke University's divinity school and an author of the document.

"We would have made the statement regardless of who the president was. It
was not meant to be either partisan or to single out any one person," Carder said. "It was the recognition that we are all part of the decision
and we are all part of a democratic society. We all bear responsibility."

Stith, who spent more than three years after his retirement working in East Africa -- including with Rwandan refugees -- said going to war over the Sept. 11, 2001, attacks did not solve the real problems behind them.

The real issues are that much of the world lives in poverty, desperation and depression, he said, while an affluent minority of the world often oppresses them. Americans need to take responsibility for their world, Stith said.

"To ignore things and to assume that persons in the government have all knowledge is to reject our franchise and our democracy," Stith said.

About six weeks ago, Carder discussed the idea of a public statement with
other colleagues who "had concerns" about the war, and the idea just grew,
Carder said.

Last week, the statement circulated during a biannual meeting of the Council of Bishops, "and before the week was out, we had 95 bishops," Carder said.

In their statement, the bishops pledged to pray daily for the end of the war, for its American and Iraqi victims and for American leaders to find "truth, humility and policies of peace through justice."

"We confess our preoccupation with institutional enhancement and limited agendas while American men and women are sent to Iraq to kill and be killed, while thousands of Iraqi people needlessly suffer and die, while poverty increases and preventable diseases go untreated," the statement said.

Some bishops declined to sign their names, although they supported the statement, Carder said.

This week's statement follows years of public opposition to the Iraq war by the church.

In May 2004, the Council of Bishops passed a resolution that "lamented the
continued warfare" and asked the U.S. government to seek international help to rebuild Iraq. The church's women's division called for an end to the war in 2002. And in 2001, the church's head of social policy, Jim Winkler, said the push for war was "without any justification according to
the teachings of Christ," according to a report by The (London) Observer.

Public approval of the war has steadily declined since the United States invaded Iraq in March 2003. At the time, seven of 10 Americans said the U.S. did the right thing. By this October, only four of 10 Americans did,
according to CBS polls.

About 11 million people belong to the United Methodist Church, including 200,000 in the Baltimore-Washington area.

Carder and Stith said they hoped their statement would encourage more people to think about peacemaking.

"The only solution seems to be to stay the course. But if you're on the wrong course, you don't stay the course," Carder said. "At the heart of the Christian faith is the willingness to acknowledge mistakes."

Old Steive-boy is probably so fixated on Kerry's Purple Hearts because he is a coward and a bully, and he would rather associate himself with a chickenhawk rather than with a real man who took enemy fire for his country.

I have listened to the sounds on that and the other
sites you posted. (Thanks, again.) I haven't listened
to all of them. There must be a couple hundred files.
I concentrated on the ones I thought likely: HF MFSK,
PSK, QPSK. I didn't listen to many that were indicated
as heard on VHF.

The ARQ-M2 sounds slightly similar but definitely
different. None of the samples I listened to
sounds like the 6445 kHz signal.

Cheers,
rb

Interesting. Maybe it is closer to you.

Monday here now, 19:32 UTC. Barely audible.

Yup. Definitely not WEFAX. I've built a WEFAX
receiving system before (hardware and software).

Whoa! Stop the music!! What's wrong with this picture???

No name calling?

No rudeness?

No insults?

Actually addressing the topic?

Who are you and what have you done with the *real* (so-called) "ace"???

Well, whoever you are, a non-rude question that addresses the issue deserves a like response...

You ask how Kerry came to get his PH. Well, I'll admit that I don't know the actual specific procedure, but I *will* bet that you can't just "give it to yourself". I would think it has to come from your unit commander or some kind of committee, not just saying "I want it" and getting it.

So, if you have a beef about how he got it, it would seem to be with a committee or the unit commander, not Kerry.

And the point that may have gotten lost in all this is that Kerry, at least for 90 days, *WAS* in Viet Nam and he *WAS* in a combat zone, and got at least one (or more) Purple Hearts, which works out to exactly 90 days more and one Purple Heart more than a certain, un-named shrub with a "spotless" military record.

P.S. I'll never understand why some in this NG keep insisting on bringing up Kerry and Klintoon anyway. They are *not* in office and it seems there are more than enough issues to discuss about the guy that is in office.

Could it be that Kerry and Klintoon are just red herrings to divert attention away from the (many) actual issues that should be discussed?

The lawmakers are partly to blame for their ignorance. Congress was entitled to view the 92-page National Intelligence Estimate about Iraq before the October 2002 vote. But, as The Washington Post reported last year, no more than six senators and a handful of House members read beyond the five-page executive summary.

Get out if you want Sharia law, Australia tells Muslims!

CANBERRA: Muslims who want to live under Islamic Sharia law were told on Wednesday to get out of Australia, as the government targeted radicals in a bid to head off potential terror attacks. A day after a group of mainstream Muslim leaders pledged loyalty to Australia at a special meeting with Prime Minister John Howard, he and his ministers made it clear that extremists would face a crackdown.

Treasurer Peter Costello, seen as heir apparent to Howard, hinted that some radical clerics could be asked to leave the country if they did not accept that Australia was a secular state and its laws were made by parliament. "If those are not your values, if you want a country which has Sharia law or a theocratic state, then Australia is not for you," he said on national television. "I'd be saying to clerics who are teaching that there are two laws governing people in Australia, one the Australian law and another the Islamic law, that is false If you can't agree with parliamentary law, independent courts, democracy, and would prefer Sharia law and have the opportunity to go to another country which practices it, perhaps, then, that's a better option," Costello said. Asked whether he meant radical clerics would be forced to leave, he said those with dual citizenship could possibly be asked move to the other country.

Education Minister Brendan Nelson later told reporters that Muslims who did not want to accept local values should "clear off". "Basically, people who don't want to be Australians, and they don't want to live by Australian values and understand them, well then they can basically clear off," he said. Separately, Howard angered some Australian Muslims on Wednesday by saying he supported spies monitoring the nation's mosques.

John Kerry's Purple Hearts ~ make of this what you will. The Boston Globe is basically a conservative newspaper. Nothing here appears to be fabricated or misleading. He received them on superior officer's recommendations, but Kerry himself admitted that there wasn't all that much to them, other than the fact that he got them.

In any case, they were made a far bigger issue by both sides than they deserved to be.

Bruce Jensen
****

John Kerry's Purple Hearts
Purple Heart Number One:

The Boston Globe - June 6, 2003 -- Kerry experienced his first intense combat action on Dec. 2, 1968, when he "semi-volunteered for, was semi-drafted" for a risky covert mission in which he essentially was supposed to "flush out" the enemy, using a little Boston Whaler named "Batman." A larger backup craft was called "Robin."
Unfortunately, Robin had engine trouble, and Batman's exit was delayed until the boats could depart in unison. The Batman crew encountered some Viet Cong, engaged in a firefight, and Kerry was slightly wounded on his arm, earning his first Purple Heart on his first day of serious action.
"It was not a very serious wound at all," recalled William Schachte, who oversaw the mission and went on to become a rear admiral.

Purple Heart Number Two:
The Boston Globe - June 6, 2003 -- On Feb. 20, 1969, Kerry earned his second Purple Heart after sustaining a shrapnel wound in his left thigh. According to a previously unreported Navy report on the battle, a two-boat patrol spotted three men on a riverbank who were wearing black pajamas and running and engaged them in a firefight. While not criticizing this engagement, the Navy report did challenge the decision of unnamed skippers to fire at other "targets of opportunity" in the area.
"Area seemed extremely prosperous and open to psyops action, minimum number of defensive and no offensive bunkers detected," the report said. The naval official who wrote the report concluded: "Future missions in this area should be oriented toward psyops rather than destruction."
The destruction included 40 sampans, 10 hut-style hootches, three bunkers, and 5,000 pounds of rice. The crews from two swift boats had expended more than 14,000 rounds of.50-caliber ammunition. No enemy casualties were reported.

Purple Heart Number Three
The Boston Globe June 6, 2003 --. . . On March 13, 1969, a mine detonated near Kerry's boat, wounding Kerry in the right arm, according to the citation written by [Navy Admiral Elmo "Bud"] Zumwalt. Guerrillas started firing on the boats from the shoreline. Kerry then realized that he had lost overboard a Green Beret who is identified only as "Rassman."
"The man was receiving sniper fire from both banks," according to Kerry's Bronze Star citation from that day. "Lt. Kerry directed his gunners to provide suppressing fire, while from an exposed position on the bow, his arm bleeding and in pain, with disregard for his personal safety, he pulled the man aboard. Lt. Kerry then directed his boat to return and assist the other damaged craft and towed the boat to safety. Lt. Kerry's calmness, professionalism and great personal courage under fire were in keeping with the highest traditions of the US Naval Service," Zumwalt's citation said.

Home Free:
The Boston Globe June 6, 2003 -- Kerry had been wounded three times and received three Purple Hearts. Asked about the severity of the wounds, Kerry said that one of them cost him about two days of service, and that the other two did not interrupt his duty. "Walking wounded," as Kerry put it. A shrapnel wound in his left arm gave Kerry pain for years. Kerry declined a request from the Globe to sign a waiver authorizing the release of military documents that are covered under the Privacy Act and that might shed more light on the extent of the treatment Kerry needed as a result of the wounds.
"There were an awful lot of Purple Hearts -- from shrapnel, some of those might have been M-40 grenades," said [George] Elliott, Kerry's commanding officer. "The Purple Hearts were coming down in boxes. Kerry, he had three Purple Hearts. None of them took him off duty. Not to belittle it, that was more the rule than the exception."

The Boston Globe - June 6, 2003 -- . . . The National Archives provided the Globe with a Navy "instruction" document that formed the basis for Kerry's request. The instruction, titled 1300.39, says that a Naval officer who requires hospitalization on two separate occasions, or who receives three wounds "regardless of the nature of the wounds," can ask a superior officer to request a reassignment. The instruction makes clear the reassignment is not automatic. It says that the reassignment "will be determined after consideration of his physical classification for duty and on an individual basis."
Because Kerry's wounds were not considered serious, his reassignment appears to have been made on an individual basis.
Moreover, the instruction makes clear that Kerry could have asked that any reassignment be waived.
The bottom line is that Kerry could have remained but he chose to seek an early transfer . . .

Here's where I got them. If the guys who *object* to Kerry's purple
hearts put this on their website, and don't want people to get the
facts wrong, then they have either made a big mistake or they believe
this account to be true.

http://www.vietnamveteransagainstjohnkerry.com/kerry_pur_hrts.htm

Everyone is going to believe what they want, I guess - and *some* of
that is probably based on one's
political beliefs. If you have some other information that is
reasonably verfiiable, go ahead and tell us about it. I won't argue,
because I wasn't there. In any case, nothing in the Globe's article's
either glorifies or condemns Kerry or his receipt of the medals in any
significant way. They never made a difference to me, anyway, nor did
GWBs lack of service time. What I did find ridiculous was that others
kept forcing it into voters' faces like it made some kind of difference
in whether they'd make good presidents or not.

Nice try on being selective and dodging the issues (as usual). I
ALSO said (in the same sentence yet) that "...but I *will* bet that
you can't just "give it [a PH] to yourself". I would think it has to
come from your unit commander or some kind of committee, not just
saying "I want it" and getting it."

So, even though I admitted I don't know the exact military procedure
(and said so up front), are you implying then that Kerry (or anyone) can
just give themselves a Purple Heart on their own without going through a
commanding officer??? I doubt it. Nice spin and dodge, but no cigar.

> So maybe you'd better go out and get the facts you stupid brain stem.

The FACT is that you just can't go out and give yourself a military
award. What part of that fact don't you understand, Jack?

Finally, it looks like the real, rude, name-calling, self-appointed
"ace" is back (more's the pity). Kidnapped by aliens, were you, when you
made that non-rude post--or just lose control of yourself for a minute?

Not everyone with a high school diploma or GED is stupid John. Allot of those common folk, keep this country running. I started my first business without either. It wasn't until I was about 28 that I got my diploma and went on to get my engineering degree. I now own my home outright and have three beautiful daughters, One of which just finished college.

TSUNAMI BULLETIN NUMBER 001
PACIFIC TSUNAMI WARNING CENTER/NOAA/NWS
ISSUED AT 2148Z 14 NOV 2005

THIS BULLETIN IS FOR ALL AREAS OF THE PACIFIC BASIN EXCEPT
ALASKA - BRITISH COLUMBIA - WASHINGTON - OREGON - CALIFORNIA.

... TSUNAMI INFORMATION BULLETIN ...

THIS MESSAGE IS FOR INFORMATION ONLY.

AN EARTHQUAKE HAS OCCURRED WITH THESE PRELIMINARY PARAMETERS

ORIGIN TIME - 2139Z 14 NOV 2005
COORDINATES - 38.2 NORTH 144.8 EAST
LOCATION - OFF EAST COAST OF HONSHU JAPAN
MAGNITUDE - 7.3

EVALUATION

NO DESTRUCTIVE PACIFIC-WIDE TSUNAMI THREAT EXISTS BASED ON
HISTORICAL EARTHQUAKE AND TSUNAMI DATA.

HOWEVER - EARTHQUAKES OF THIS SIZE SOMETIMES GENERATE LOCAL
TSUNAMIS THAT CAN BE DESTRUCTIVE ALONG COASTS LOCATED WITHIN
A HUNDRED KILOMETERS OF THE EARTHQUAKE EPICENTER. AUTHORITIES
IN THE REGION OF THE EPICENTER SHOULD BE AWARE OF THIS
POSSIBILITY AND TAKE APPROPRIATE ACTION.

THIS WILL BE THE ONLY BULLETIN ISSUED FOR THIS EVENT UNLESS
ADDITIONAL INFORMATION BECOMES AVAILABLE.

THE WEST COAST/ALASKA TSUNAMI WARNING CENTER WILL ISSUE BULLETINS
FOR ALASKA - BRITISH COLUMBIA - WASHINGTON - OREGON - CALIFORNIA.

(The west coast bulletin is about the same - no problems expected for US
coastal area.)

A little band aid size (or not too much larger) cut or wound does not automatically rate a Purple Heart.You get to a Medic and get patched up and get back into action.

We was hauling some ammo in trucks to one of our Base Camps in Vietnam.Going across a canal on a ferry boat,the cable slipped off of a pully.Myself and another guy got into the canal to get the cable back onto the pulley.I scraped my right ankle on something in the water.When we got back to Shannon Wright Compound,I went to the Medic.He cleaned the area and put a bandage on there.Later on at Fort Hood,Texas,my right foot got to where it wanted to slap out at a right angle when I was walking.They sent me to Fort Sam Houston in San Antonio to get my leg checked out.They ran some test on my leg with some instruments.The doctor said I have a Filiar (spelling) and he said it will probally go away on it's own.He was right too.And I did not get a Purple Heart nor did I expect to get a Purple Heart either.

Kerry 'had' to have the PH's though in order to make himself a *hero* and also
to self evacuate himself from a war zone.

One will notice that he didn't stick around to complete his tour. He bailed out.

Then he embarked upon an interesting career that may have at onetime garnered
himself a dishonourable discharge.

I never claimed to be anything. I have seen folks put themselves in
for medals and it does happen. You don't have to believe it, I don't
care. I know it's true though. So, how much military service do you
have? None I'll bet.

Well, one doesn't get a PH unless it involved something the enemy did. I don't think a cable slipping off a pulley would qualify.

Some of Kerry's PH's apparently involved things that he himself did, and not the enemy.

> into the hands of someone capable of continuing the fight after I had been
> removed from power.

But that's because you know less about being a dictator than you know
about rational thinking. If you were a despotic dictator with that kind
of killpower and you wanted someone else to have the killpower, you'd
join forces with that someone else, otherwise you'd do all your conquest
(e.g. Kuwait) by yourself.

Saddam got the stuff taken to friends who would hide it for him. Lots of
it would last for a long time. He hoped to have something put together
that would let him wage war by now.

What was in those trucks ? How do you know ?

How could Saddam ship WMD material he didn't have?

Deulfer concludes that no WMD were shipped to Syria or put on ship

Deulfer on Prewar Movement of WMD Material Out of Iraq:
"Based on the evidence available at present (Oct 7, 2004), ISG
judged that it was unlikely that an offi cial transfer of
WMD material from Iraq to Syria took place. However,
ISG was unable to rule out unofficial movement
of limited WMD-related material
http://www.cia.gov/cia/reports/iraq_wmd_2004/addenda.pdf

On Oct 7, 2004 President Bush made this speech to the press:

THE PRESIDENT: "Chief weapons inspector, Charles Duelfer, has now
issued a comprehensive report that confirms the earlier conclusion
of David Kay that Iraq did not have the weapons that our
intelligence believed were there. The Duelfer report makes clear
that much of the accumulated body of 12 years of our
intelligence and that of our allies was wrong,
and we must find out why and correct the flaws."

http://www.whitehouse.gov/news/releases/2004/10/20041007-6.html

The Duelfer report is the U.S. Gov'ts official end to the search
for WMD and it's conclusion are endorsed by President Bush It came
to the conclusion that after 2001 there was no WMD material in Iraq.

Here's the Gov't home page for the Duelfer report
http://www.cia.gov/cia/reports/iraq_wmd_2004/

> with UNSCR 1441.ï¿½

Funny the United Nations doesn't agree with your compliance statement.
That's because the resolution didn't call for inspectors to be allowed
to sit in hotel rooms inside the country somewhere, it called for them
to be given unlimited, unrestricted access to anything and everything...
something that *never* happened with our incompetent inspectors.

You've made most of this up out of whole cloth, Tom. You're still using
the discredited CIA as your primary source of information, among other
things. Give it up; the feeble of mind already believe what you want
them to, and the rest just aren't feeble of mind.

Sorry. Nerve gas *doesn't* have a shelf life.

He had no Nuke or Bio capbility.

Any Chemical WMD material was useless by 2003.

General Zinni said this about Saddam;

If you want to know who General ZInni is, see
http://en.wikipedia.org/wiki/Zinni

We couldn't account for all the weapons of mass destruction. The
inspectors that were in there had to assume that the weapons of mass
destruction that were in his original inventory that we could not
account for, might still be there. So that was always a planning
factor. But when you look hard at that, these were artillery
shells, rocket rounds, that he would have to be hiding somewhere
that were getting old. And if he had to bring them out and use
them, think about this, he's got to move them to artillery
positions, to battery positions, under total dominance of the air by
the United States. I sure as hell wouldn't have been ... want to be
that battery commander that said tomorrow you're going to get five
truckloads of chemical weapons to be stored in your area to shoot.
Not under the air power we brought down and the ability to interdict

them. And these were tactical capabilities.

Doubleya is finally losing it. He'll be wandering the Whitehouse asking for advice from Lincoln and Washington before long.

Bwahahahahahahahahaha

Published on Sunday, November 13, 2005 by The New Republic
The Worst Speech of Bush's Presidency
by David Kusnet

For speechwriters drafting a presidential address for a patriotic holiday such as Independence Day, Memorial Day, or Veterans Day, there are three rules: Don't be wordy; don't be wonky; and, most important, don't be partisan. In his Veterans Day remarks today at the Tobyhanna Army Depot near Wilkes-Barre, Pennsylvania, President Bush and his staff broke all three rules, producing a strident speech that went on for almost 50 minutes, included a lengthy comparison of "Islamic radicalism" and "the ideology of communism," and concluded by attacking "some Democrats," while taking an implicit shot at "my opponent during the last election." It may have been the worst speech of his presidency.

At a time when Bush would benefit from sounding cheerful, forward looking, and above partisan politics, just as Ronald Reagan did during his second term even in the midst of the Iran-Contra scandal, Bush instead sounded like Richard Nixon or Lyndon Johnson during the worst days of the Vietnam War, although neither is remembered for flubbing a speech on a national holiday. It's as if Bush was reading from a cue-card that proclaimed, "Message: I'm embattled and embittered."

When a president speaks angrily and defensively for almost an hour, he might well be extemporizing, but that clearly was not true of this president and this speech: We know this because while the address may have seemed interminable, it was not ungrammatical, and it subjected listeners to a lecture about a bewildering array of personalities and events, including "Al Qaeda's number two man, a guy named Zawahari"; "his chief deputy in Iraq, the terrorist Zarqawi"; the Syrian democracy advocate Kamal Labwani; and "the Mehlis investigation into the assassination of Lebanon's former prime minister."

There is a time and place for such a detailed explanation of world events, but it is a formal speech at a major academic institution such as Georgetown or West Point -- not a commemorative occasion such as today, when the president should speak as the leader of the entire nation.

Moreover, Veterans Day is certainly not the venue for a president to attack the opposition party or single out a defeated opponent, as Bush did today. Towards the end of his speech, Bush declared, "While it's perfectly legitimate to criticize my decision or the conduct of the war, it is deeply irresponsible to rewrite the history of how that war began." He criticized "some Democrats and antiwar critics" for "claiming we manipulated the intelligence and misled the American people about why we went to war." Then he did something that no president in recent memory has done: He took what could be read as an implicit shot at the man he defeated, explaining, "Many of these critics supported my opponent during the last election, who explained his position to support the resolution in Congress this way." Bush then quoted Kerry's statement defending his vote to authorize the use of force in Iraq -- essentially holding Kerry up for ridicule, since Kerry is now a war critic. Do you remember Clinton criticizing Bob Dole in 1997; or Reagan criticizing Walter Mondale in 1985; or even Nixon criticizing George McGovern in 1973? Of course not -- second-term presidents tend to co-opt, not condemn, defeated opponents.

Bush's speech also adopted two of Nixon's smarmiest rhetorical techniques: attacking the nameless but nefarious "some," just as Nixon used to disagree with "some who say"; and lumping together very different people--the villainous "some Democrats," the "antiwar critics" who could be anyone from Russ Feingold to Ramsey Clark, and, finally, Kerry himself.

What's most remarkable about this speech is how Bush has bungee-jumped from the rhetorical high-road he usually takes to the lowest road any recent president has taken on a national holiday. Unlike previous presidents from both parties, Bush up until now has rarely attacked the opposition party, individual adversaries, or even ideological categories. (For instance, unlike Reagan and Nixon, he has rarely if ever criticized liberals or secularists.) So it is especially surprising that a president who generally avoided attacking his opponents in State of the Union speeches is now attacking them in a Veterans Day address; and it seems a sign that his shrewdest advisers -- Karl Rove, Karen Hughes, and Michael Gerson -- had no input into this speech.

As for the substantive points in the speech, they were either familiar or flimsy. Once again, Bush defended the Iraq war only after reporting on less controversial endeavors, such as the response to 9/11, the Afghanistan war, and efforts to destroy Al Qaeda.

Less familiar was Bush's lengthy comparison of Islamic extremism with the Communism of the Cold War era. Both, Bush said, were violent, dictatorial, and "dismissive of free peoples." But Communism was also atheist and internationalist, while Al Qaeda is neither. If current enemies have to be equated with twentieth-century totalitarianisms, why not compare Islamic extremism with fascism, which made more use of nationalist emotions and was less hostile to religion?

This was a speech that presented Bush's case implausibly and inappropriately. It's hard for a president to sound unpresidential on a patriotic holiday, but Bush achieved that dubious distinction today.

David Kusnet was chief speechwriter for former President Bill Clinton from 1992 through 1994. He is writing a book about workplace conflicts in today's America, Love the Work, Hate the Job, for John Wiley and Sons.

For the few short years I've been involved with Shortwave radios, I've read from numerous sources that the Sony 2010 is either compared to the second coming of Christ or a good radio that's possibly overrated.

I see on eBay that there is a "out of the box" 2010 that is currently going for less than $200 US.

What is this radio worth? What did it cost when it first came out? Is it worth it?

It seems alot of you either have one already, and would never give it up.

This might have been true back in the audion days, but it would not have been valid with octal or miniature tubes like a 6SK7 or a 6BA6. These more modern tubes had plenty of gain at 455kcs.

After WW2, a lot of hams used a BC-453 ARC-5 receiver to make a double conversion system out of their single-conversion shortwave radio. The BC-453 was tuned to the 455kc IF, and its 85kc IF gave improved selectivity.

Ha. I've been wishing for more rain since April,
and I'm still waiting. In a bizarre sort of way, if it
weren't for Rita and Katrina, the Ohio Valley would
have had a severe drought this year, rather than the
moderately severe one we had.

Tracy Fort's drunkenness, necrophilia and a deceased seventy two year
old cancer victim, who happened to be my mother:

==========
==========
I'm not drunk. I haven't finished my first 12 pak yet.
I'll get there and when I do it's back to the cemetary.

She gives great cancerous BJ's.....thanks Canucky boy!

haha...thanks.....gotta go grab another beer.

You and your dead ass mom might be interested in the last post I made.

How far north did the Katrina effect? I saw someone's mom floatin down
the mighty Mississippi!

Dug her ass right up! She was too damn ugly to have sex with before
she died. The old bag o bones fell apart in my hands! She didn't
complain about much either other than the lousy sex she got from those
foursomes with you, Mike and her husband.

love dem bones....dem bones....dem bones

I have your mom's legbone right here. I kept it as a momento ya know.

rattllin' bones!

squeek...squeek...

Skeleton rides 50 cents a pop! If you can stand the smell....I wonder
is she stunk that bad in life?

hahahaha....I'm still laughin' at your sorry ass family! This is funny
stuff!

She is very fresh but not that fresh!

hehe...I love dem bony women....rotten to the core.....

um...umm....good!

I love it....did she do it for you too?

Please accept my apology for abusing her. I'm sorry that I did not
toss her back into the black depths that she came from. Next time,I
will be sure to take care of that. I promise that I will refill the
hole with the dirt that came out too. In addition, I will re sod the
plot at no additional charge. Let me also apologize for the milky
substance in her left eye socket, that was an unavoidable accident.
please feel free to include this post in your sig file!

You might as weel keep it up there...I love the ole boney bitch!

Dem Bones! Dem Bones! Dem Bones! I loved playing dem Bones!
Dem Bones! Dem Bones! Dem Bones!
I loved playing dem Bones! I ran my fingers uo and down dem bones and
she began to come alive!
I played dem bones like they never been played and she smiled for me all
the day.

Pork and bones....

DON'T HURT CANADA! I'll miss those nights with the ole bony lady!

The most fun I ever had!

Sporting a new moniker (GraveDigger) just for you and mommy...

He knows the inside of his mom's boney butt! hahahaha

hahahahaha......Can't you come up with your own material?

hahahaha.....when you got thru lickin I was stickin.....

Haha...I laugh eveytime I read my great material! Keep postin
Canadork

hahahahaha....keep postin that sig girlieman!

Steve Muldoon [N8KOM]

Roelof Bakker's "PA0RDT Mini-Whip".
http://beaconworld.org.uk/images1/alspics/miniwhiplarge.jpg

I have also added a new antenna recently, the amazing
little "mini-whip" designed and developed by fellow
Dutch NDB Enthusiast Roelof Bakker, PA0RDT.

This small 'active whip' is not much longer than my pen,
and works very well from its perch at the top of my bird
feeding station in my back garden.

If space is a problem at your QTH, or you are planning
some outdoor operating in the near future, one of these
impressive little devices might be just what you are
looking for.

NOTE - There seems to be few references to the PA0RDT
"Mini-Whip" Active Antenna.

It's probably worth about $200 based on performance. When it was
discontinued the prices got unreasonable. That radio is NOT worth $300 or
more, except to collectors

I had one but gave it up, and that's ironically what got me started back into radio listening and (now) collecting.

Mine was bought new, and while it had good performance (universally agreed) it just wasn't as much fun as the DX-160 I had as a kid. So it sat in a closet, and I dragged it out every couple of years to see if I would catch the bug again. I didn't. Sure, I also dragged it out when we had a power outage and I took it on a couple of camping trips, but it wasn't the kind of radio that made you want to just sit with and scan for what you could find. So I sold it on eBay.

Realizing that I now needed another battery-powered radio for emergencies, I set out to buy an inexpensive yet servicable replacement. The rest, as many will tell you, is familiar history. One radio led to another and then another, and now I do indeed find myself enjoying the hobby again. As for me, I've never been tempted to buy another 2010. It has no soul, no character.

Just my opinion.

I bought one new many years ago. Sensitivity was excellent, but
selectivity was terrible using the WIDE setting, and the NARROW setting
made the sound too muddy for me. I was disappointed with it and got
rid of it. My Grundig 650 had sensitivity about as good, but the
selectivity on the 650 was superior to the Sony even though the Sony
had selectable sideband sync detector. Listening was a pleasure on the
650 and a pain using the 2010.

I re-read his posting, and I think he meant amplification. In context, he was referring to the earliest vacuum tube days. The frequency response of those tubes was limited. If I recall correctly, it was limited by the physically large size and the spacing between the filament, the grid, and the plate.

I had the same feeling when I "graduated" from my Ocean Hopper to my
Kinght R-100. In hindsight, I was using my OH at a sunspot peak, and
it was close to a minimum when I got my R-100.

The bind is in many low end receiver designs, the mixer is also the
local oscillator, so most SW receivers that are variants of the All
America 5 design (and there were many) had very poor performance above
10Mhz or so.

>cascade two or more tuned stages, isolated with RF amplifiers.
Actually most interesting design in a single conversion receiver I
think I ever was was in the mid 1960's Squires-Saunders built one with
a tuned RF stage with a Q muliplier on it, so they had a Q of a couple
thousand on the front end and made a killing on the gain as a result
of gain-bandwidth product. Suffices to say that with that sort of
front end selectivity, image rejection wasn't a problem. Obviously
impedance matching with the antenna was crucial to performance, but it
was undoubtedly the best single conversion HF receiver every
commercially built (and had a price tag to match).

I just love people like you who have very little actual knowledge but
are convinced
they know the workings, inside and out of the big bad internet. You
remind me
a lot of Woger himself who frequently makes spelling corrections then
misspells
a word himself.

FYI. Birch has only a couple of hosts. You can be in almost any part of
the country
and have your messages routed the same way. Birch and other
telecommunications
companies do this as an economic measure. For instance I post from
"quest out of Oklahoma City" but I assure you that I do not live in
Oklahoma City or even have a
quest account. I try an explain it to you but it is just too fucking
complicated for someone
like yourself.

Oh I'm not Geno, either but be free and call me that if you like,
dipshit.

> impedance matching with the antenna was crucial to performance, but it
> was undoubtedly the best single conversion HF receiver every
> commercially built (and had a price tag to match).

But the Squires-Saunders had a high IF. According to one quick check,
it was a first IF tuneable from 5 to 5.5MHz, and then 1MHz. That
was part of the wave of receivers with crystal controlled first mixers, in
order to get a nice tuning range and stability. If they'd gone to
a fixed IF, then either the local oscillator would have to be switched
from band to band, or premixed with a crystal oscillator before the signal
went into the signal mixer.

Note it's an example of how down conversion can still work. For so
long, people always thought in terms of the early superhet with the
IF being down in the hundreds of KHz range, but the issue isn't that
it was converted down but that the IF was so low.

That Squires-Saunders arrive as crystal filters were still a new
thing. There's a famous 1963 article in QST by Squires or Saunders (I
forget which), discussing the philosophy and design of the receiver.
Some of the issues were keep rf amplification before the mixer to
a minimun, and use the 7360 beam deflection tube for the mixer for
a well balanced mixer. Few or no receivers used a balanced mixer
before the SS-1R, at least not affordable receivers. So the front
end Q-multiplier was brought in to deal with the simple front end.
For the rest of the decade, the basic concept, a 7360 mixer and a front
end q-multiplier, bounced around in various construction articles. But
in some ways it was just because it had been done, because there
were no front end Q-multipliers after the late sixties or early seventies.
And of course, solid state components came along, making it easier to
build a balanced mixer, be it with schottky diodes or active components,
without a bunch of bulky tubes.

All the receivers I saw that used a front end Q-multiplier used a high
IF, ie at least 2MHz and most often 9MHz.

>

Howard Armstrong received the patent for the superhet, US patent number 1,342,885 in 1920. He wanted to receive what were astoundingly high frequencies at the time, like in the 2 or 3MHz range.

At the time he cooked it up, even at the time the patent was issued, there was no commercial radio broadcasting. The spectrum above what is now the AM broadcast band was deemed useless (which is why amateurs were relegated to "200 meters and down" after WWI.

I don't recall the schematic in Armstrong's patent, but if you look in the history books, you find early schematics that use a chain of RC coupled tubes for the IF strip, no selectivity.

Amplification has always lagged after frequency use. During WWII, radar development was limited because they had problems getting receiving tubes to work in the microwave frequencies, so they went to diode mixers. It's pretty much always been easier to convert to a lower frequency for amplification.

The CIA's intelligence was fine; but what was done by the White
House Iraq Group to corrupt that intelligence was not.

See <http://www.realcities.com/mld/krwashington/news/special_packages/iraq/intelligence/11
901380.htm>
and <http://www.globalresearch.ca/articles/LEO306F.html>.

Seven months before September 11, George Tenet testified to the
Senate that Iraq was no threat to the US and its neighbors.

That policy position changed for strictly political reasons after
PNAC got its long-desired Pearl Harbor and Bush realized that he
could con the country into supporting an unnecessary war on Iraq.

> as a source that Saddam didn't have a nuke program after 1991.

If you had bothered to read it, you would know that I'm quoting

2248. Question : Why is 'Talk Radio' So Conservative? - Answer Why Not !

Newsgroup: rec.radio.shortwave
Date: 2005-11-15 12:47:20 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1132058840.814971.90160@g49g2000cwa.googlegroups.com>
Source record: 48999

Cuhulin,

Question : Why is 'Talk Radio' So Conservative ?
- - - Answer Why Not !

The Logic of 'The Why' in the Question :
Why is 'Talk Radio' So Conservative ?

Lye's in the Medium of AM Radio Itself.

AM Radio is the Most "Listened To" Form of Voice (Talk) Media.
http://en.wikipedia.org/wiki/Talk_radio

"The Medium is the Message" - - - Marshall McLuhan
http://www.leaderu.com/orgs/probe/docs/mcluhan.html

"How Does Right-Wing Media Craft Its Message ?"
- by Drs. Neil Wollman and Abigail A. Fuller
http://www.buzzflash.com/contributors/05/01/con05013.html

Here is My simple minded understanding of the Logic of it all.

A. M. Radio = American Majority Radio :
The Majority of Americans are Traditionalist; who knowingly or
unknowingly reflect those Values and 'Actively Listen To' or
'passively enjoy hearing' the Generally Positive Talk on AM Talk
Radio as Amplifying Their Own Personal Beliefs and Standards.
To-Put-It-Simply : Listening to AM Talk Radio can be a Positive
Affirmation for the Listener - It's Enjoyable and May Be Informative.

ABOUT - FAIR-AND-BALANCED MEDIA :
What Makes "American Talk Radio" Fair and Balance is that
there is another Big Voice Out There as an Alternative to AM
{Conservative} Talk Radio. It is In-Fact National Public Radio
(NPR) and It Works. However - What Most Liberal {Left-Wing}
Politicos (The Politically Aware) will not admit is that National
Public Radio (NPR) offers a large amount of Talk Radio (usually
on FM Radio) that has a decidedly Liberal 'Tone' to the
Presentation by both the Hosts and Guests.

In case you are still interested, the Democratic House leadership
has thoughtfully provided a searchable index of 237 Bush
administration lies about Iraq, available at
<http://democrats.reform.house.gov/IraqOnTheRecord/>.
55 of them are lies told by Bush himself.

As the site states, "Iraq on the Record is a searchable collection
of 237 specific misleading statements made by Bush Administration
officials about the threat posed by Iraq. It contains statements
that were misleading based on what was known to the Administration
at the time the statements were made. It does not include
statements that appear mistaken only in hindsight. If a statement
was an accurate reflection of U.S. intelligence at the time it was
made, it was excluded even if it now appears erroneous."

They also offer a detailed report on the subject at
<http://democrats.reform.house.gov/IraqOnTheRecord/pdf_admin_iraq_on_the_record_rep.pdf>

www.elecraft.com A few days ago somebody posted something about his Elecraft Radio.I just now clicked on their website and I think the radios look like good value for the money.I am not sure I can put a radio kit like that together properly though.So,how about those Elecraft Radios? Does anybody else have any experience with them? If I buy one,I want one that will pick up all of the usual Shortwave bands.

OK, but I thought we were talking about up conversion.

I don't think converter tubes lose much gain above 10 MHz, but they are awfully noisy, and their noise really jumps out at higher frequencies. Beyond that, many of those old radios had a high impedance antenna input, and the typical coax run would shunt the high frequencies.

I don't think there was much upconversion above 10 MHz during the converter tube era, however.

Dunno. I never worked with that radio, and I never even worked with a regenerative preselector. There was a regen preselector projector in one of my ARRL handbooks, but I've been too lazy and unmotivated to build it. I do know that regens have a sharp peak in their response curve, but their skirts have a gentle roll off, typical of a single tuned circuit. I sorta picture a very strong adjacent signal on the slope breaking through and modulating a weak signal at the peak Maybe not, but all the other high end single conversion radios I can think of used multiple RF stages, biased in the linear (enough) region.

I was listening to Paul Gallo's radio talk show this morning on 97.3 FM www.supertalkms.com (not all of the Conservative radio talk shows around here are on AM) A guy my age (I am 64 years young now,gettin younger by the minute!) phoned in to Paul's radio talk show.He lives in Rankin County just across the mighty Pearl River,East of Jackson.He said he bought a new Goldwing Motorcycle and yesterday he went to buy a license plate for his Motorcycle.(he said has been riding Motorcycles since he was twelve years old,so he certainly isn't a fool) He said that license plate cost him $574.00,last year it was almost half that price.He said the folks where he bought his license plate call that book they look in,The Book from Hell! and even they are shocked at the new prices in that The Book from Hell! How does that relate to Shortwave Radios? Perhaps it doesn't,but he enjoys riding his Motorcycle and some folks enjoy buying high priced Radios.Go Figure.By the way,he was once in a while laughing at them new high prices.It's his money and he enjoys his Motorcycle hobby and that is Great.

The story I remember is, during World War One, it was feared the Germans had
developed a way to communicate at 100 meters. Armstrong wanted to intercept
those communications, if they existed.

>
> At the time he cooked it up, even at the time the patent was issued,

It's worth mentioning that there's a practical limit as to how much gain can
be obtained at any one frequency, and that practical limit was much lower
back in the earliest days. The superhet split it's gain at supersonic and
sonic frequencies, and could have much more gain without breaking out into
uncontrolled oscillation than a simple audio frequency amplifier. The tubes
of that era were just about useless as amplifiers at 3 MHz.

After Armstrong's invention, better triodes combined with better circuits
such as the Neutrodyne, as well as the screen grid tubes, put the TRF back
in the game into the early 30s, or so.

Wow, those things are still being made?
I remember them in the Edmund Scientific catalogs from the 70's.
Neat!

> something that *never* happened with our incompetent inspectors.

Funny how Hans Blix disagrees with you.

From <http://www.un.org/Depts/unmovic/SC7asdelivered.htm>:

Inspections in Iraq resumed on 27 November 2002. In matters
relating to process, notably prompt access to sites, we have
faced relatively few difficulties and certainly much less than
those that were faced by UNSCOM in the period 1991 to 1998.
This may well be due to the strong outside pressure.

[...]

How much time would it take to resolve the key remaining
disarmament tasks? While cooperation can and is to be
immediate, disarmament and at any rate the verification of it
cannot be instant. Even with a proactive Iraqi attitude,
induced by continued outside pressure, it would still take
some time to verify sites and items, analyse documents,
interview relevant persons, and draw conclusions. It would
not take years, nor weeks, but months.

Talk about a crybaby! Talk about paranoia. You seem ready to wet
yourself over this one.

Please read *all* of the above v-e-r-y s-l-o-w-l-y. The only time the the word "insurance" appears anywhere in the thread above is when it was written by...YOU (or when I quoted...YOU).

Does the word "insurance" touch a raw nerve with you? Well, if the shoe fits...

I didn't accuse anyone of anything, but IF I were to consider it, some topics that would probably come to mind are "rude", "vulgar", "boorish" and "an embarrassment to the country".

Now just toddle along, widdle Stevie and try not to cry any more or wet yourself...or have a "grabber" if anybody mentions the "i" word.

Well, time to gripe. Monday night I found that 15240 was coming in
reasonably well. But, starting just this week, they've split their
schedule so that there's a Pacific schedule and an Asian Schedule.
And on the Pacific Schedule, their 04:00 hour, which used to be solid
stuff like "The Science Show", and "Background Briefing", is now their
frothy "In The Loop" show aimed at the Pacific island youth audience.
Just what I want to hear, Pacific Island Hip Hop. BLEHHHHHHCCCHH.

So, for many of my favorite programs, there's only one airing to the
Pacific. And if they've got a rugby or cricket game, they're going to
get dumped that week. That's one way for them to boost their Podcast
experiment...

Anyway, the detailed transmission schedule is at
<http://www.radioaustralia.net.au/pdf/frequency.pdf>

Their "week on one page" program schedule .pdf hasn't been updated yet.
If you're fetching the web page program schedule, they only have one US
time zone(EST), so it's often less brain bending to get the UK schedule
in GMT.

Vet's Unemployment Rate Skyrockets. www.stevequayle.com (click on the big Q) Hot Headlines.

Let me tell y'all something,because I am me and I never lie and then I am going over to the Goodwill store for a while.
I am a Vet and back in the early 1970's,I was between jobs,so to speak.Every single time I went to that big Mississippi job placement place building that used to be on Ellis Ave near Highway 80,not one single time did the Vets department there have any job listings at ALL for me to go and check out1,I am telling y'all,,, NOT one single Time! That fat slug would sit there and go through the motions as though he was lookng up at least one job reference for me to go check out.I went on the regular other side and I found a job in less than half an hour.Look,I am a normal guy,,, at least I think I am so.Some so-called "Americans" still hate us Vets to this day and I am Damn Sick and Tired of it!!! Thanks for listening.

Bill,you are Right,,,, I don't owe anybody SHIT!

I didn't see it and I can't find a transcript, but if a Republican repeated
the Democrat 2004 chant it must have been as an example of a liberal chant.
Let's have some context.

I'm reminded of a job interview many years ago that was interrupted for
some important problem. There was a discussion, and it came down to the
interviewer saying something incredibly and fundamentally *stupid*,
something on the order of "power equals voltage divided by current".
The other guy corrected him. Then the interviewer pointed smugly at
the wall and said, "See what's on this wall, John? That's a Master's.
Your wall only has a Bachelor's. Don't try to tell ME about electricity."
(Needless to say, I did not respond to phone calls from that company.)
The interviewer reminds me very much of Barnard.

Which is it? "Nerve gas doesn't have a shelf life" or "Any Chemical WMD
material was useless by 2003"?

What exactly was Saddam hiding when he'd make the "inspectors" wait one
to three weeks before inspecting any given location?

> General Zinni said this about Saddam;

What's important to situations like the invasion of Kuwait is what Saddam
said about Saddam. Whether or not he believed we could kick his ass, HE
believed he was invincible and caused the loss of thousands of lives
and billions of dollars invading Kuwait. During the days of the no-fly
zone, he'd waste a dozen million dollars a shot to shoot at our planes;
he missed every time, and every time he spent another dozen million
dollars on another radar-guided missile post to fire yet one more shot.

Those
"artilleryï¿½shells,ï¿½rocketï¿½rounds,ï¿½thatï¿½heï¿½wouldï¿½haveï¿½toï¿½beï¿½hiding
somewhereï¿½thatï¿½wereï¿½gettingï¿½old" seem to be working just fine against
our helicopters even today, two years plus after we invaded, thank you
very much General Zinni.

Blix disagrees with Blix, depending on when you read his statements.
The news regularly reported Blix sitting out another two to three week
wait in a hotel somewhere, their movements restricted while the Iraqis
"prepared" the next site for "inspection". The only reason you seem
not to have noticed all those times appears to be that you believe
Iraq should have been allowed lots of time to re-hide their stuff
before the inspectors got a look at it.

Few people know, and they aren't telling.

> How could Saddam ship WMD material he didn't have?

That's silly. A non-silly question for this point in the discussion
might be: why did Saddam need hundreds of truckloads of stuff moved
immediately, before American troops could get to see what was in it?

> Deulfer concludes that no WMD were shipped to Syria or put on ship

How does Duelfer know what was in those trucks?

> Michigan
> USA
>
>

Uh, widdle Stevie, that quote was a post from a *whole different
thread*...Duh! Try asking a question in the post it relates to, not a
totally different thread.

...and talk about "crybaby"...boy, that "i" word sure strikes a raw
nerve with you! See comments above about paranoia. Also see comment
above about not accusing anybody about anything...so your question that
you keep asking about has been answered. Once again (and even though I
appreciate that it's a challenge for you), please try reading a bit more
carefully, quit repeating questions that have already been answered and
try to keep your threads straight.

If pressed however, I think I'll still give some thought to "rude",
"vulgar", "boorish" and "an embarrassment to the country".

As a final note, if you spent half the time looking for a job as you do
on posting hundreds of rude comments, you might actually find a job.

After all, you've demonstrated superior people skills and your fearless leader says the economy is great-- so it should be a snap for you to get one.

Now, you just toddle along, stop crying, watch that paranoia and try not to wet yourself.

I'm thinking it would be fun to get some wire, a capacitor and a jumbo sized ferrite rod to make a good ferrite loop antenna. Does anyone know where you can buy oversized ferrite rods (say, ten inches or more in length) without spending an arm and a leg?

Steve

Comments Welcome here and there

Today at 6:16am, realist wrote:There is a world wide campaign to destroy 'white people'. It is so obvious any fool can see it. Mark my words, within ten years 'white' people will find themselves heavily discriminated against all around the world as non-whites take political power purely from their numbers.

The 'white' race is the superior race on earth, we have pervaided all the earth, pretty well everyone on earth wants to live like a white man. Unfortuneately, it appears that non-whites cannot live like white people if they are left to their own devices. Without the controlling hand of white people other races very quickly decsend (return) into barabarism. There are numerous examples all over the world to support this truth.

PLEASE EXPLAIN WHY THIS POST IS NOT RACIST AND SHOULD NOT BE REMOVED

MODERATOR

> are convinced<STOMP!>

1. Learn to line wrap your posts properly. Your post is too badly
wrapped to bother reading in its entirety.

2. Your explanation is laughable. Tracing the path that the packets
take as they traverse the Internet simply can't be 'splained away by
waving your hands and saying "If you only knew as much as I do ..."

3. Example: Packets destined for your IP address wind up at a Qwest
edge router in Houston before being delivered. It isn't too much of a
stretch to conclude that you live in that general area.

Traceroute 0-1pool93-238.nas24.houston4.tx.us.da.qwest.net:
...
13 iah-edge-08.inet.qwest.net (205.171.31.26)
14 63.152.125.34 (63.152.125.34)

15 63.152.31.24 (63.152.31.24
16 * * *

I would suggest that your own ignorance is serving you badly. If you are trying to hide behind a pseudonym (Roger Leo Wiseman), at least don't screw it up so badly that you can be easily traced. It makes you look like the neophyte(*) that you are.

---(footnotes)---
(*) neï¿½oï¿½phyte (n'-ft') n.
1. A recent convert to a belief; a proselyte.
2. A beginner or novice.

That's funny? I remember that stinky cunt Hillary trying to tell us how to raise our kids and oh yea! We're all homophobes if we don't agree with homosexuality and oh yea! Don't speak of Gods or spirituality or worship rocks, just do what us liberals say, it's more fair ya know! Sounds to me like everybody now days has a plan for everyone's behavior. I think this country is packed full of busybodies on both sides pointing fingers at each other like a bunch of spoiled brats hazing each other. Try tolerance and minding your own buisness. That's democracy.

All it took back then was an "officer" to nominate you
for most any medal. And upon approval from the CO it usually
was granted. Kerry nominated himself for most if not all of his
medals (according to his company clerk who went on national
television to say so) At least 2 of his "wounds" were band aid
wounds which according to the rules are not worthy of a PH.
His so called Silver Star was another joke, he did nothing that any
soldier at the time wouldnt have done. There were far, far more
vets that did go way above and beyond the call of duty, and some
lost body parts and/or their lives with no medals. Kerry knew exactly
what he was doing ,,, 3 PH's and you go home. Read the book
written by the Swift Boat Vets For Truth and maybe it will open your
eyes a little. I'm a Viet vet and as far as Im concerned Kerry was
a coward acting like a soldier, and got the hell out of there as soon as
he could by nominating himself for the medals (he was an officer).

If Bush chose to serve his country by being in the gaurd,, so what??
Gaurd units can be called into active duty,,, like whats going on now.

Let's examine it.

Public Statement of President George W. Bush:
"I strongly believe he was trying to reconstitute his nuclear
weapons program."

Source: President Bush, Prime Minister Blair Discuss War on
Terrorism, White House (7/17/2003).

Why This Statement is Misleading:
This statement was misleading because it failed to
acknowledge the intelligence community's deep division on the
issue of whether Iraq was actively pursuing its nuclear
program. The statement also failed to mention weeks of
intensive inspections conducted directly before the war in
which United Nations inspectors found no sign whatsoever of
any effort by Iraq to resume its nuclear program.

You found exactly what wrong here?

If the auction isn't over, chances are it will sell for more than $200.
Prices can easily move $100 or more in the last few minutes of an auction.

I have seen "out of box" average condition 2010s sell for under $250 on Ebay
recently. Have also seen quite a few 2010s offered at hamfests for $125-$175
during the last year. Saw one for $150 in the original box with everything
and nobody was jumping on it immediately. Depends upon how much you can
spend and if you want it now without shopping around, but $200 to $250 for a
nice used one on Ebay isn't all that terrible.

The 2010 isn't the best radio ever made, but it comes pretty darn close.

I just won one of these on eBay, and its been shipped and scheduled to arrive at my door on the 18th.
Can anyone tell me what to expect out of this old radio as far as SWL broadcast listening - any of its quirks or shortcomings, or maybe some things I'll really like about it?
Also, the guy says it could use some cleaning up. I know that commercial solvents are not recommended, but what is the best way to go about cleaning it?
I'll appreciate any helpful advice.

Doug

Not a big fan of the current administration (nor the last one)... but I'll
field this one..

See those words there, at the beginning of Bush's statement? "I strongly
believe"? Those are called qualifiers. Others might call them hedges. But
basically, they discount everything in the paragraph on "Why this statement
is misleading", because Bush's statement needs not take these other facts
into account. Therefore, it is most likely a true statement or a truism at
the very least. Either way, it's not a lie in the strict sense of the word.

What doe's WebTV have to do with being stupid? Using your superior skills of reasoning and deduction one would deduce that someone with the name of "Home Boy" must be a ignorant, gangbanging, drugdealing, inner-city thug.

Notice how I had to stoop to your level to show how STUPID your thinking is?

"Snow"? What's that? I wore a long sleeve shirt today. It was hot outside
but comfortable inside in the air conditioning. I sure hope we can use the
fireplace this winter.

a bowl of soap and water and a rag squeezed out real good for the outside.Any decals/numbers/letters on the dial,do not use any solvents such as Windex or anything of that nature.Solvents will strip them numbers off.Go very lightly with soap and water on any numbers/letters on the dial and other areas.In fact,if they look ok,best to leave them alone.

Thank you for supporting my point. A person can nominate themselves all day long, but as you just said above, "upon *approval from the CO* it *usually* was granted..." Exactly what I said too. The CO is the one *ULTIMATELY* responsible, so if anyone has a complaint, they should direct it to the CO, not the recipient.

> Gaurd units can be called into active duty,,, like whats going on now.

First, I'm not knockin' the Guard, I'm just saying it's a long way from a combat zone in Nam.

Next, what you say about getting called up is technically true, but in that era, it was extremely *rare* for a Guard unit to get called up.

Today, it is extremely *common* for a Guard unit to get called up.

So it's probably not quite fair to compare today's conditions to those of 40 years ago.

Plus, it was very hard to get into the Air or Army Guard units back then without someone pulling strings and some have said that shrub's dad, being rich and famous, might have done that. IF that was true (and I'm not saying it is), it's doubtful if Poppy would have let junior be sent overseas in any event.

The CO probably had no expectation that Kerry would lie. However, lie he did, and he continues to do so today.

You really need to do some investigation into those PH's.

You also need to figure out why you yourself lied when you accused me of insurance fraud, shitstain.

2398. Grundig radio repair?

Newsgroup: rec.radio.shortwave
Date: 2005-11-16 02:10:21 UTC
From: "Jean S. Barto" <jsbarto1@cox.net>
Message-ID: <Dywef.14272$0l5.6174@dukeread06>
Source record: 49297

I have an older Grundig YachtBoy 206 shortwave receiver, and I'd like to repair it so as to have it as a backup shortwave radio. This radio is 11 years old and is analog--not digital. The tuning knob is sloppy, in that it is loose and doesn't tune the stations in precisely--there is too much "play" in it. Also, there seems to be dust inside the front panel where you would see the stations--I would hope there is some way to clean it out.

Are there places where I could send this radio for repair? Although it's 11 years old, it still would be good as a backup radio, and it would be nice to get it back working well again!

Thanks in advance--

Jean in VA

He wanted to call it a Crusade, until he decided it was not politically correct. Nevertheless, the troops he sent over there were singing "Onward Christian Soldiers."

<http://www.stormwise.com/page26.htm>

BTW, I'm not sure how well these simple designs (loop and a cap) work
with one side of the loop being at ground due to the connection of the
radio. Since most of us here have resonably selective radios, I'd
rather feed the loop into a high impedance differential amplifier that
has a single ended output. Skipping the loading cap means one less
thing to tune.

Another project might be to get one of the ferrite antennas from old
beacon directional finders.

Is that similar to not using the best lure that you have for fishing? You figure that these guys are saving it up for a parade???? You telling me that if Zarqawi didn't have some of this stuff that he wouldn't use it? Chemical weapons would be an Allah-send to the terrorists. These guys are hell bent on try to forment as much death and destruction as possible. And chemical weapons would be a big help to achieve the agenda.

++++++++++++++++++
For some ideas that work look up:
Burhans, RW; "VLF active antennas," Radio Electronics, pp. 63-66,
February 1983.(pdf)
Burhans, RW; "VLF active antennas-part 2," Radio Electronics, pp.
65-72, March 1983.(pdf)
at <http://www.rsl.ku.edu/~eecs501/active_antennas/>

His unusual "split/counter" wound ferrite loop works very well.
Smaller Ferrite rods will work at higher freqs.

Email listed is no longer valid.

Have you read the paper on "Very Large Ferrite Loops" by Bill Bowers
and John Bryant? It may be a little hard to find, since it was
published in the 1994-95 issue of "fine tuning's Proceedings". They
constructed rods up to 16 feet long by combining shorter pieces. Among
the observations was that it was "important to bind the rods together
so that no air gap developes between the ends of individual rods."
They bought their ferrite rods from Amidon and Nebraska Surplus Sales.

Too bad the USA went a little crazy after that losing that war. God knows what you'll be like when you withdraw from Iraq and have nothing to show for it.

Must suck to be you to not have a country full of red, white and blue automatons.

BS,,, I got out of the military in 72 and went into the local guard
unit in 74 I belive. No strings,, I was Joe Nobody. Lots of people
(locally) went into the guard back then, they were Joe Nobodies too.
You have a vivid imagination, too bad its wrong. Go enlist.

> television to say so)

This is interesting, Jeff. As someone who was with Kerry on a few occasions (no, not on his boat, but on another boat on two missions), I have followed all this closely. This is the first time I have heard anything about this clerk.

Could you please tell me his name, or give me a link to that information?

By the way, as for the book, Unfit for Command (you mention it below), I read it from cover to cover. It opened my eyes also -- and I was amazed as to how a book could manage to go on and on for so many pages, not tell a single lie (as far as I could determine), but still not tell the truth about just about every topic they covered.

By the way, those Purple Hearts were, in fact, according to the rules. And that's even IF any of them were caused by friendly fire (from Kerry or someone else). If you would read the regulations, or had any experience in such things, you would know that PH's are awarded with great frequency under those circumstances.

And as far as the SIlver Star is concerned, you might want to know what actually happened before you make what seems to be an uninformed judgement on that incident.

I was there that day, and I totally disagree with your assessment. The same can be said for the other 24 guys who were there that day -- including the one and only member of the Swift Boat Veterans for "truth" who was there.

I'm looking forward to finding out the name of that clerk. Thanks in advance.

Check out the shipping and handling charges (both ways) and get an estimate for repair on that radio first.Chances are,you would be better off buying a new radio.Radio Shack stores sell a few Grundig brand name (they are not real Grundig's though) radios.

Read the regulations. A wound being caused by friendly fire does NOT,
in and of itself, disqualify it for a Purple Heart. In fact, many PH's
have been awarded for wounds caused by friendly fire.

Well, conservatives took to talk radio probably because the so-called news media took a liberal stance on everything. Walter Cronkite, Dan Rather, Tom Brokaw, Peter Jennings, et al. all had a strong liberal bias.

I don't have any use for talk radio because of its bias, but at least it doesn't attempt to disguise opinions as news.

Recently Air America came out with liberal talk radio. I don't have any use for them, either.

Silly me, I like thoughtful discourse on talk radio, and news (and ONLY news) with my news.

NPR, even though I listen 'cuz there's nothing better domestically
that I know of, isn't even remotely "fair and balanced." BBC is
european, which is to say their scale is scewed to the left of ours.
I still listen to them, too, as well as RNW. RA when my antennas are
in good shape (which they aren't at the moment...)

The one thing you can be sure of is that if they claim to be "fair and
balanced," they *aren't*.

Flippin' ideologues -- even more useless than lawyers.

Sure -- no problem,

I was an FO with Delta Company, 6th/31st Inf as of April, 1968. My Company commander was Grady Smith. One of the platoon leaders was Dave Kennedy.

As for when I was an advisor, I was the XO, then commander, of a Mobile Advisory Team, called a "MATS Team". That was MATS IV-76. We served in Nam Can District, An Auyen Province. When I was there we lived in the district headquarters in a village called Dong Cung. It is located on the Bay Hap River, and is incorrectly referred to in Navy records as "Cai Nuoc". Later, we lived a bit further up the Bay Hap in Cai Keo.

I became an advisor late in 1968, getting down to Ca Mau (Province Headquarters), and then Dong Cung, in December.

Two District Team names would be Capt. Mike Miggins and Capt. Bill Hirschler.
Mike stepped off Bill Rood's boat (on Feb 28, 1969) first, then myself, Bill, and then the RFPF soldiers we lived with. The District Chief was Capt. Le Ngoc Hy.

I departed Vietnam in late August, 1969, after about 17 months in-country.

The H500, like all the TOs are good performing SW sets. It doesn't have continuous coverage of the SW bands, when built it covered the most popular SW bands of the time plus the broadcast band. (sw#1 4-8 Mhz, #2 2-4 Mhz, #3 17.4-18.2 Mhz, #4 14.8-15.6 Mhz, #5 11.5-12.1 Mhz, #6 9.4-8 Mhz)

Clean the case with a mild soap and water, then if you like you can use black shoe polish to spiff it up. Black liquid shoe polish will cover any scratches in the Tolex covering.

The set is AC/DC/Battery and uses a selenium rectifier, get rid of it (if a selenium goes 'thump' when it hits the bottom of the trash can, it's bad, meaning all old and even NOS seleniums are bad or shortly will be) and replace it with a diode (1N4005 or equivalent). Since the diode will have less voltage drop than the selenium you need to replace the 130 ohm resistor in series with the diode with a 5 watt 180 ohm resistor.

This set has one tube that, due to scarcity, is rather expense, the 1L6, so do not remove or insert any tubes with power on as that is a sure way to blow the filament of one or more tubes. Don't be suprised when you turn it on you don't see any tubes light up, the 2 volt filaments can only be seen in low light.

Even when the set is turned off, there is still power to the rectifier circuit, so it is a good idea to unplug the set when not in use.

Replacing all the capacitors is a good idea as well, but these chassis are not easy to work on, and a good alignment might also be in order.

An announcment of a shortwave event you might have missed and might want to join.

Paolo

.....

NOVEMBER 20, 2005 (SUNDAY): UBA CANDLELIGHT TEST, PART #1

(November 15, 2005 - ON5EX, UBA QRP manager) The annual UBA Candlelight Test is not a CONtest, but a TEST program, e.g. an opportunity to explore low power and extreme narrowband techniques and put your station to the test.

The first (out of 3) UBA Candlelight session is scheduled on Sunday November 20 2005, 8 to 18 UTC, with several stations transmitting simultaneously on different HF bands running milliwatt power levels and QRSS signals. The challenge for all participating radioamateurs is to copy the code words embedded in the transmitted messages.

* Stations *
(see http://www.uba.be/actual/candlelight/candlelight_en.html for a better formatted table)

Band Station Locator Freq ï¿½ 10 Hz Mode Power
160 m SP5ZCC KO02pf 1919,19 QRSS3 100 mW
160 m DK1IS JN59wk 1,919.200 (dot) 1,919.202 (dash) DFCW10 3 s gap double space 10 mW

80 m Mystery beacon: 3588.000 / 100 mW / chirped Hell
40 m OE5EEP JN67tw 7000,99 QRSS3 100 mW
40 m ON5SL JO10tt 7000,97 QRSS10 10 mW

30 m IK1ZYW JN35tc 10137,4 QRSS10 100 mW
30 m ON6IH JO20kv 10137,3 QRSS3 10 mW

* Short description of modes *

QRSS3, QRSS10: "QRSS" is plain CW keyed at extremely slow rate, such as 3 dots per second (hence QRSS3), corresponding with 0.4 wpm.

DFCW10, 3s gap, double space: In DFCW or Dual Frequency CW mode, dots and dashes have the same length (10 s in DFCW10) but are transmitted on different frequencies. By agreement, dashes are transmitted on the higher frequency. The gap between dots/dashes and space between characters are further refinements to the data format specification.

Chirped Hell: This mode refers to the Hellscheiber mode invented by Dr. Rudolf Hell, but contrary to the original sequential mode (one chirp at a time), "Chirped Hell" by DF6NM is a concurrent multitone transmission mode.

Full details and hot news on the UBA Candlelight Test 2005-2006 can be found here (in several languages, http://www.uba.be/actual/candlelight/candlelight_en.html). Please note appropriate software - such as Argo, Spectran (I2PHD, IK2CZL) or SpectrumLab (DL4YHF) - is required to view these signals transmitted at extremely slow rate. Useful links:
http://www.weaksignals.com
http://people.freenet.de/dl4yhf/spectra1.html

If you are new to narrowband communication on HF, the following sites provide a wealth of information:
* QRSS and you, KA7OE (http://www.ussc.com/%7Eturner/qrss1.html)
* QRSS, W0CH (http://www.w0ch.net/qrss/qrss.htm)
* Extreme narrow bandwidth techniques, ON7YD (http://www.qsl.net/on7yd/136narro.htm)

Finally, you can join a worldwide group of QRSS addicts by subscribing to the "KnightsQRSS" reflector (http://mail.cnts.be/mailman/listinfo/knightsqrss_cnts.be).

2473. Re: (OT) : Drifter - Another Democrat Party of the USA Sock-Puppet Posting an Off-Topic Political Message to a Shortwave Radio NewGroup.

Newsgroup: rec.radio.shortwave
Date: 2005-11-16 11:36:49 UTC
From: Drifter <drifter@pgh.com>
Message-ID: <437B19D0.41B0D49D@pgh.com>
Source record: 49472

RHF. if you had looked at the post, you will note it said-"Vets Day". i posted this, not because
i'm a democrat, or a repub. i posted it because i'm a Vet. so, it matters little to me who is in
power, i don't like to see the Vets get screwed. if your a Vet, you would understand. if your not,
you wouldn't. simple as that. mostly my politics are local. if your local news has been reporting
on the crowd we have in Harrisburg, and their late night pay raise, you will see what i'm fighting
against right now. i don't have a lot of time for the DC crowd. you seem to trout the repub line every
chance you get. i suggest you stop looking under your bed before you get up, i hope there isn't a
demo, or a repub under it. and, you may stop seeing demo's every where you look. if your a repub, i
suggest you start questioning the people you put in office. i'm an independent. so, i vote with
my heart and my head. i mostly split my ticket. i voted for W the first time because i liked the
job his Dad did: not as as pres, but with the CIA. as i found out, W isn't his Dad. the last election
i held my nose and voted for lesser of two evils. God, what a choice we had. so, please, don't put me
in one party or the other. so, can we please get back to shortwave? and, i don't wish to add you
to my killfile, i enjoy your antenna post too much. and your enthusiasm for this hobby is wonderful.
i always read your post here and on the yahoo antenna group. i will be so glad when my medical leave
is over. i never thought i would miss my job so much. and, get me away from this computer, i'm
spending way too much time reading these newsgroups, and not playing with my radios.
"sock-Puppet", give me a break. sorry to ramble here.

Good DX to all.

Drifter...

by the way- to whoever the person is, trying to netcop me- "BITE ME". headers can be forged, and i can
really care less. my ISP could care less also.

2482. 3000 KHz - 4000 KHz band question

Newsgroup: rec.radio.shortwave
Date: 2005-11-16 14:22:31 UTC
From: Larry <laocmo@copper.net>
Message-ID: <437b3ff3_5@newsfeed.slurp.net>
Source record: 49480

Reception seems great on this band in my locale anytime after 8:00PM EST. Why are there so few stations there. If you don't want to listen to Alex Jones on 3215 your pretty much out of luck. I seem to remember back in the 1960's, except for some ham activity, that band was dead 24/7 to commercial broadcast.

One of the Elecraft radios will receive shortwave. It is the model KX-1. It is an ultraportable small design, and receives rave reviews (as a ham tranceiver) from all who have built it. If you get the 30 meter option, it will cover the main shortwave BC frequencies from about 5 MHz to 15 MHz if memory serves correctly. Be aware that it will need to receive the SW broadcast using USB or LSB detection with the carrier zerobeat. Cost would be in the range of $350.

In a sense, yes. Saddam didn't have many choices as to whom to give the stuff to. Only an entity with a large, efficient standing army could handle both the storage and transportation needs. Saddam needed some country (1) with an army (2) and which wasn't friendly enough with the USA to give the plan away (3) and who was somewhat likely to return the stuff to Saddam should he get back into power, or at least wasn't likely to turn around and use the stuff to invade Saddam should he get back into power.

> You figure
> that these guys are saving it up for a parade???? You telling me that if Zarqawi
> didn't have some of this stuff that he wouldn't use it?

Of course he would. He wasn't one of the people who got the stuff. He either didn't have massive, secret storage capability to protect the stuff from prying American eyes, or he didn't have the capability to get the stuff from where it was to the storage fast enough, or both.

> Chemical weapons would be
> an Allah-send to the terrorists. These guys are hell bent on try to forment as

It looks like most of the truck caravan went to Russia somewhere. The Russians would be smart if they destroyed any bio/chem stuff, cached any nuke stuff, and "warehoused" the rest (whereupon the Russian mafia would be selling it now to the terrorists).

My point exactly. As DDWTK, if there isn't anyone with whom you'd join
forces for conquest, there certainly isn't anyone who is likely to do
ANY fighting whom you'd just give all your conquest materials.

>
> You found exactly what wrong here?

Starting here:

> This statement was misleading because it failed to
> acknowledge the intelligence community's deep division on the
> issue of whether Iraq was actively pursuing its nuclear
> program.

1. There was no deep division unless you start including tiny countries
and countries not known for high-caliber intelligence services.

2. Even had there been deep division, at some point the boss man has
to choose between conflicting stories. By the time the Pres would have
made a statement such as "Iï¿½strongly ï¿½believeï¿½heï¿½wasï¿½tryingï¿½to
reconstituteï¿½hisï¿½nuclearï¿½weaponsï¿½program,"ï¿½he would already have
considered that deep division, and would have no reason to acknowledge
it in every single statement he ever makes again on the subject.
To suggest that Pres was misleading anyone because of the absence of
such a silly statement is disingenuous at best.

> The statement also failed to mention weeks of
> intensive inspections conducted directly before the war in

> which United Nations inspectors found no sign whatsoever of
> any effort by Iraq to resume its nuclear program.

And now we're back to the "inspectors". The fact that they, doing nothing, going nowhere that hadn't been extensively pre-evacuated, getting no information, "found no sign whatever" of nukes is only self-evident; they "found no sign whatever" of *anything at all* because they weren't allowed to inspect anything worth seeing, and certainly weren't pushing hard to do so. Given the circumstances, the "inspectors" *literally* couldn't have found their asses with both hands, a flashlight and a map. Here your Dems are lying by omission, and assuming people didn't see the "inspectors" being blocked from door after door, year after year.

All lies, lots of spin and a fervent hope that the reader is at least ignorant, better stupid enough to like the koolaid.

Note I didn't even bother with that bit of word play. Also, it didn't
need to be a lie, all they said was "[t]his statement was misleading".

OMG. i must be getting tired. you guys are starting to make sense on
this WMD. if i remember, when the History channel did a story, on
Saddams
head nuke guy, name escapes me, they talked about the inspectors at the
front gate and trucks going out the back gate. i believe it was a year
or two back, and i believe Russia was mentioned. but, as was stated, the
Russian mob, read that X-KGB, would be selling on the black mkt. i could
be mistaken about this. the med i'm on right now really screws up my
memory. but, it still comes down to: i don't trust the UN. i have never
trusted any politician. and lastly, i don't support the war- BUT- I do
support our boys over there. i remember what it was like to be in an
unpopular war. i remember how i felt, and how my team felt about the
people back home protesting. our friend down in Jackson can tell you
how the politics of my war killed far too many good men.

Drifter...

> true for ANY party across the spectrum.

Most of the chanting I've seen throughout the history books has been
done to keep people thinking, not to keep people *from* thinking.

"Don't tread on me."
"Fifty-four forty or fight."
"Remember the Maine."

> It sounds to me like you've been accepting a little too much mental
> pablum there yourself, spewing what the Republican radio cadre would
> have you believe.

"Republican" radio is not very accurate, and anyway "Republican" isn't
very well defined any more. But the more conservative talk radio I hear,
the more I like it. I was amazed the first time I heard any of it,
because it was so unusual to hear ideas that a good Communist would
reject, right there on the public airwaves.

> Think and observe for yourself, and it will become
> fairly obvious that neither current U.S. party has a monopoly on
> morals, ethics, or honor...and that what works in the U.S. is a
> moderate combination of both.

I find more people in the Republican Party that I agree with than I do
in the Democratic Party, by far. But what I see most is that things
are NOT working. And most of that boils down to the left, working to
install communism in the USA from within both parties.

> That's exactly what the neocons are trying to do.Ever wonder why there's
> so little or NO action against illegal immigration?

It's to prevent a communist revolution in Mexico.

You see, Mexico's number one industry is sending illegal immigrants to
the USA to send money home to their relatives. It is Mexico's number one
source of income, far exceeding its gross oil sales or any other industry
it might have.

As long as there's enough yanqui dolares in Mexico to keep things going,
the current regime is able to quash any talk of revolution and keep power.

Why we don't close the borders and just give them a few billion of foreign
aid is beyond me.

> Why are you so eager to give up your freedoms?

I'm not. I vote against the Democrats (most of the time) to prove it.

I rest my case your Honour.

dxAce
Michigan
USA <

Typical dxAce response. All bluster, all the time, no substance. I am neither brainless nor uneducated, and I'm also not a stubborn narrowminded bigot. I am certain that you know this, whether you admit it or not. I also know it's true of you, which is why your epithets are so puzzling to me.

I know hundreds of people, liberal and conservative. Most of them are bright and educated people. Most of them pay attention to issues of the day, and can talk intelligently AND civilly about them. The main difference I can see is that the liberals have a greater share of compassion and sympathy for others, the conservatives less so, and more for themselves. Otherwise, the essential goals and wishes for society are not far apart.

If you had actually payed any attention to the people you have met, instead of assuming that your own smug opinion is God's choice and any divergence from that opinion is worthy of disdain, if you had learned as a child that every person's opinion is as fully valid as your own (in the long run and on average, it is you know, whether you like it or not), and if you had to discuss these issues maturely, one on one in person with the people you otherwise bullyrag and insult, you might have more humans as friends instead of electronic boxes on your desk.

One thing I can guarantee - you will change nobody's mind on this medium with the type of empty holier-than-thou nastiness you spit toward people on a regular basis. There are intelligent, thoughtful, civil conservatives on this group who have a far greater chance of doing so with a few carefully chosen words than you with all of your thousands of glib insults.

2524. PIN diode handbook

Newsgroup: rec.radio.shortwave
Date: 2005-11-16 18:54:29 UTC
From: r2000swler@hotmail.com
Message-ID: <1132167269.105650.266520@g14g2000cwa.googlegroups.com>
Source record: 49324

I found this online PDF handbook on PIN diodes.

Since many people in this goup might wish to make improvements
on thier receivers, and since most modern receivers use diodes as
either input filter switches, and/or IF filter switches, I thought
others
might find it as usefull as I have.

Changing the common Si switch didoes in the IF fitler section to PIN
diodes
is a simple and pretty inexpensive upgrade that can that help the
ulitmate
filter rejection. One of my R2000s' went from ~70dB to over 83dB. Very
worthwhile. I will be modifing the other 2 over the holiday.

For the front end octave filters, replacing the Si switch diodes with
PINS only
made significant improvements in the LW/MW and the crowded 6MHz and
9MHz bands. I won't be doing this mod on the other 2 receivers.

>I find more people in the Republican Party that I agree with than I do in the Democratic Party, by far. But what I see most is that things are NOT working. And most of that boils down to the left, working to install communism in the USA from within both parties. <

I disagree. If what the Republicans had done had worked in the beginning, the left, as you call it, would not have come into prominence anyway. It is the result of imbalances and societal problems that progressive movements come about, and most of the programs of the "left" can be traced to imbalances caused by habits that society practiced "then" and the Republicans, to some extent, still encourage "now" although admittedly with many changes.

My dad worked hard his whole life in frequently severe conditions; thanks to Unions, which you and some others may consider "left" or communistic, he got paid a fair wage for it, and as result my sister and I got a decent start and are now living comfortably, with good jobs and families. Without those unions, I seriously doubt that my Dad, with his basic 1930s and 40s education and stronger back than mind, would have gotten much beyond the hand-to-mouth existence that many endured before his time, and I doubt if I would have what I do.

Not every social program or movement is bad for everyone, and even with unions, industry has hummed right along in this country.

The same is true of many other programs that affect people, the environment and the social fabric.

I certainly agree that one can go too far with this, and I agree that in some cases it has gone too far. I also agree that both major parties have contributed to this in recent years. But, it frankly makes sense to ensure that people are not starving, freezing, sick and dying in public, not only in a humanitarian way for their sake, but for the sake of the mainstream productive citizenry as well. I'm just talking basic needs here, not luxury suites and filet mignon. It also makes sense to encourage this in other nations as well, which in the long run is going to be better to help balance the flux of immigration to the U.S. and quite possibly reduce our own welfare burden accordingly, which at this time is growing, partially because we don't have a president with the guts to control our borders.

Our main problem, I think, is that we cannot agree on how far is far enough.

I listen to Armed Forces radio regularly on 7811 and 5446.5, but haven't heard them since the hurricane hit Florida a while back. Is this just due to conditions or was their equipment damaged? Anyone know?

No idea about the hurricane, but seem to have been off for a month or more.

Maybe they are scrapping it as it was ostensibly a temporary service to begin with as I recall.

The station on Diego Garcia has not been reported to be on for a very long time now.

It's a tropical band, so unless you're crusing the Spice Islands, ie.
the Southwest Pacific, you're not going to pick that much up. There used
to be a lot of Cental/South American stations, but they've gone over to
local FM band transmitters.

Bravo, Bruce. A very well crafted comment! (although I'm afraid it will continue to fall on deaf ears and that you are just wasting electrons if you expect any kind of thoughtful response).

A *possible* explanation might be that he is one of those lonely people that crave attention and garners it by his rude responses. Bad attention is better than no attention kind of thing???

From: switcher <no@KijkenZeHierOokAlNaar.be>
Message-ID: <no-CE2985.21373116112005@news.sunsite.dk>
Source record: 49340
Cross-posted to: fr.rec.radio,rec.radio.shortwave

sur

http://users.fulladsl.be/spb13810/sell/radio/

vous voyez des Siera, tres sensibles sur OL et sur 540-1000khz en OM

En etat de marche.

Le Tokyo manque l'antenne, mais j'ai encore le pied pour mettre dans
le radio .. Il a la bande 108-174Mhz.

faire offre ...

EMAIl sur:

http://users.fulladsl.be/spb13810/apple , scroll down:

YB300: "design features": the greyish colour, the knobs for AM/sw/FM,
a sound knob ... symmetric placement of the knobs for SW bands and
volume ...

Tokyo Panda

Siera 1172
Siera 1372

All radios in working condition. (they're all for sale ...)

Tokyo Panda has the 108-174 Mhz band. I still heard stations (airplanes)
on it...

The siera's seem to be very sensitive on the lower freqs (162 - 800Khz)
I bought the 1172 first, then I saw the 1372 and because it seems to be
a serie; I bought it too (also because I think somebody might be
interested in both ..) I find the 1172 the best/funniest design...

Radio Shabelle (Somalia) making a very weak appearance on 6960.1 this afternoon at 2050.

S/off is listed as 2100, it's a pity they don't stay on an hour or two longer propagation wise.

Yes and only arseholes complain about such trivia when they have no other comment.

Once again if you don't like what you are listening to then tune to somewhere else.

It usually does snow,at least a little bit,in the North part of Mississippi evey winter.In the Jackson area we might some snow on the average of two or three times every ten years.I have lived in a few Northern states before,I never could learn how to walk on those icy sidewalks.Let it snow here in Jackson and there are auto accidents everywhere.These folks around here don't know how to drive in snow.

>You're doing an awful lot of agreeing today. Pulling a Hillary? (i.e. trying to move more to the center).

dxAce
Michigan
USA <

I do quite a bit of agreeing every day - sometimes with the left, sometimes the right, and sometimes neither. I have wavered near the center for some time now, and as I've stated publicly, usually just a bit left of center. It completely depends on the issue at hand, for an all-or-nothing liberal or conservative ideology won't work for every single issue.

Ultimately, what I believe would be most productive, and I think most Americans instinctively understand this, is a society where nobody is frozen out but everyone is still expected to pull his or her own weight, where civics classes are taught so that people can learn all the connections and responsibilities of government and understand that an action in one place can result in consequences of various types all across the map, and that there is sometimes more than one valid approach to a problem. People get locked into the liberal vs. conservative mindset, and it blinds them to possibilities and, frequently, reality. We can overcome this, and we should, before any more major crises occur.

Hey, don't talk to me - talk to the conservative guys here I know who
think its OK to leave the destitute in the dust...they give all of you
compassionate conservatives a bad name.

I ain't saying this is all or nothing - there are some mighty selfish
liberals I know, and also some philanthropic conservatives. Just a
coarse average.

We had our first measurable snow in MN last night. Of course the roads were
full of accidents this am. Not as many as I anticpiated but the ones I saw
were bad ones. Two involved people tangling with snowplows.

It's like people have to relearn winter driving every year.

When we got our 15-16 inches of snow right around
Christmas last year, I was a happy man. Since I work
most days from home, driving doesn't bug me much.
Plus, it's always fun to see the people who don't know
how to drive in snow off in the ditches.

On the back panel of the RX-340 is a DB-15 pin connector. Where can I get the pinout information for this connector? I am specifically wanting to know which pins provide the line outputs.

Thank you.

This is a good article. I've often wondered about that ferrite with the
two windings on it.
http://user.netonecom.net/~swordman/Radio/Loops_Fig9.jpg
That is how my RDF antenna is designed. If you look at many of the old
boating RDFs, they use a stereo phone plug/jack as the interface, i.e.
two wire ends plus ground. The ferrite sits in a copper shield.

Untuned loops really make sense if your radio is decent. That is one
reason I like the wellbrook. But this paper has given me a few ideas on
how to use a RDF loop. Incidentally, the ferrite rods from these RDFs
show up occasionally at flea markets. The radio has crapped out, but
someone wisely saved the ferrite. I saw one on sale for $2 at the last
Livermore swap meet.

Heh. A couple of years ago when we last got about 12 inches or so of snow, some idiot decided to show off how great his Grand Cherokee could handle the snow by having it climb up to the top of one of those huge snowpiles. You know, the ones you find in a parking lot when the snowplow dumps a ton of snow about 10-15 feet high? Well, his Grand Cherokee got up there, but it was way too steep to get down. The guy had to wait for the snow to melt enough; I just wished I was there for when the snow underneath gave way and the Grand Cherokee flipped down the artificial snowbank.

++++++++++++++++++++++++++
By using Litz wire and taking some care it is "easy" to get a ~10" X
3/4"
rod to work up to around 10MHz. Above that it goes downhill "real
fast".

I ran into this winding on a dead RCA RDF a friend gave me. I rembered
seeing the article back in Radio Electronics but had completly
forgotten.

Burhans had some designs that were light years a head of their time!

I wish I had payed more attention when they first came out. It was a
royal
PITA to get photocpies from the local university's enginering library
microfilm
editions of Radio Electronics.

miso@sushi.com wrote:
> The Burhans papers are on vertical whips. They are really noisy for HF.
> But the list of papers is impressive.
++++++++++++++++++++++++++++++
Properly designed (and constructed) active antennas with a small (3'
or less) vertical
element can work very well. And in the right location will give a good
100' wire antenna
stiff competition. The trick is getting active devices good enough to
give acceptable
IMD performance. The JFETs Burhans are amazing and are still amoung the
best
easy to get devices avaliable.

I like the AmRad LF antenna as it still has enough gain to be very
usefull up to above
10M. The North Country Radio Active antenna is a lot chepaer and comes
as a nearly complete kit.
For construction details see:
<http://www.northcountryradio.com/Published/actant_0896/page1.htm>
For the ~45$ it represents a pretty good deal for anyone who needs an
active antenna.

Yodar in the shortwave antenna group mentioned they have changed the
FET and it
appears to be more resitant to IM.

Whatever you do avoid the McKay Dymek 100D! The 100E is now being sold,
but the
100D I tested was less then usefull. It belonged to a friend and was
NIB, but had set
around for a few years. The 100E could be decent or even great, but I
would as soon
as use a 50 Ohm dummy load as use the 100D.

How about figure 3-4 on page 3-5 of the manual, with preceeding pages
with more detailed descriptions of each output?

Aren't the whips just E-field sensitive? That is why they are noisy.
I'm not sure a better FET can get around a fundamental problem like
that.

Is the skin effect significant because you are trying to get lots of
windings which implies fine wire? Also, what about spacing between the
wire (i.e. interwinding capacitance)?

One of the papers mentioned the higher permeability cores had lower
bandwidth.

I've been fiddling with multiple turns with the Wellbrook ALA100. I've
got so much signal strength on local BCB that I can hear an internal
relay switching in an attenuating pad.

2593. US admits use of white phosphorous against people in Iraq

Newsgroup: rec.radio.shortwave

US admits use of white phosphorous in Iraq
http://www.dawn.com/2005/11/17/top13.htm

WASHINGTON, Nov 16: The Pentagon has admitted that
US troops used white phosphorus as a weapon against
insurgents in the Iraqi city of Fallujah last November.
"It was used as an incendiary weapon against enemy
combatants," military spokesman Lt-Col Barry Venable
told the BBC in Washington.

In London, Prime Minister Tony Blair's official spokesman
told reporters on Wednesday that the British military
uses white phosphorous in Iraq but only to lay smokescreens.
"Use of phosphorus by the US is a matter for the US," said
the spokesman, briefing reporters on customary condition
that his name is not published. "British forces possess
white phosphorous but it is used for producing smoke."

White phosphorous, in a form used by the military, ignites when
it is exposed to oxygen, producing such heat that it bursts into a
yellow flame and produces a dense white smoke. It is used to
mark enemy targets and to produce smoke for concealing troop
movements. It can also be used as an incendiary device to
firebomb enemy positions. It continues to burn until deprived
of oxygen and, if extinguished with water, can later reignite
if the particles dry out and are exposed again to the air.

White phosphorous can cause painful burn injuries to
exposed human flesh. If particles of ignited white phosphorus
land on a person's skin, they can continue to burn right
through flesh to the bone. Toxic phosphoric acid can
also be released into wounds, risking phosphorus poisoning.
Exposure to white phosphorus smoke in the air can also
cause liver, kidney, heart, lung or bone damage and even death.

A former US soldier who served in Iraq says breathing in
smoke close to a shell caused the throat and lungs to blister
until the victim suffocated, with the phosphorus continuing
to burn them from the inside.

The battle for Fallujah was the most intense and deadly
fight of the war, after the fall of Baghdad in April 2003.
The city, about 35 miles west of Baghdad on the
Euphrates River, was a critical insurgent stronghold.

Despite initial denials, the Pentagon has now acknowledged on
Tuesday that US troops had used the substance as
an incendiary weapon against insurgent strongholds there.

You do know that the US government has admitted to "flawed intelligence" concerning the WMDs. In other words the US government now admits that there were no WMDs to be had. No WMDs means no need for "..massive, secret storage capability.."; you can't hide what you don't have.

Eithe they paid to let him get a GED or they were willing to look the other way. Seems to be the in-thing for military recruiters.

You forgot to add the qualifier "behind". Your sentence should read "I'm already 10 times farther behind than you. I'm a (sic) U.S. Citizen. You are Canadian."

Lesson over.

Good point. Approximately 30000 Canadians enlisted to fight in the US forces. The CBC aired a program way back in 1986 on this topic.

Strictly on a President/party basis, the Republicans have been in power longer
than the Democrats since 1975. You may want to revise your statement.

Check the link that I posted awhile back concerning Canada/USA preventable
medical deaths. Your system still manages to kill off more than our system
does. Both countries need to take some action on this issue.

BpnJ,

"The main difference I can see is that the liberals have
a greater share of compassion and sympathy for others,
the conservatives less so, and more for themselves."

Agreed - This may be true some of the times.

But I have seen many more 'conservative' Christians
do Charitable Work to Help the Poor and Needy to
Care for and Feed themselves then any ten 'liberal'
Secular Activists. The 'conservative' Christians see
these people as Children-of-God in need of His Love
and Their Compassion.

The only thing that the 'liberal' Activist seem to want
to do is demonstrate, march, protest, set-ins and
start riots. The 'liberal' Secular Activists see these
people as Instruments of Change to Bring Down a
Corrupt Society.

Another thing that is true sometimes is that 'some'
(not all) 'liberal' Secular Activists would step-over
or walk-around a Person-in-Need to help an animal
{PETA} or to save a tree {Earth First}.
Note - The 'conservative' Christians seem to be much
less effected by these Politically Correct 'Causes'.

as they say been there done that
marched and prayed in both camps ~ RHF

> If John McCain gets the 2008 Republican Presidential nomination,
> my vote for President will be a write-in for Jiang Zemin.

Here goes:

In August 2002, Cheney insisted: "Simply stated, there is no doubt that Saddam Hussein now has weapons of mass destruction."

In a March 2003 address to the nation, Bush said: "Intelligence gathered by this and other governments leaves no doubt that the Iraq regime continues to possess and conceal some of the most lethal weapons ever devised."

In April 2003, Fleischer claimed: "But make no mistake--as I said earlier--we have high confidence that they have weapons of mass destruction. That is what this war was about and it is about."

In February 2003, Powell said: "We know that Saddam Hussein is determined to keep his weapons of mass destruction, is determined to make more."

But on 24 Feb 2001, Powell made the following statement while in Cairo, Egypt:

"We had a good discussion, the Foreign Minister and I and the President and I, had a good discussion about the nature of the sanctions -- the fact that the sanctions exist -- not for the purpose of hurting the Iraqi people, but for the purpose of keeping in check Saddam Hussein's ambitions toward developing weapons of mass destruction. We should constantly be reviewing our policies, constantly be looking at those sanctions to make sure that they are directed toward that purpose. That purpose is every bit as important now as it was ten years ago when we began it. And frankly they have worked. He has not developed any significant capability with respect to weapons of mass destruction. He is unable to project conventional power against his neighbors. So in effect, our policies have strengthened the security of the neighbors of Iraq..."

On 15 May 2001, Powell testified before the Foreign Operations, Export Financing and Related Programs Subcommittee of the Senate Appropriations Committee.

Senator Bennett: Mr. Secretary, the U.N. sanctions on Iraq expire the beginning of June. We've had bombs dropped, we've had threats made, we've had all kinds of activity vis-a-vis Iraq in the previous administration. Now we're coming to the end. What's our level of concern about the progress of Saddam Hussein's chemical and biological weapons programs?

Secretary Powell: The sanctions, as they are called, have succeeded over the last 10 years, not in deterring him from moving in that direction, but from actually being able to move in that direction. The Iraqi regime militarily remains fairly weak. It doesn't have the capacity it had 10 or 12 years ago. It has been contained. And even though we have no doubt in our mind that the Iraqi regime is pursuing programs to develop weapons of mass destruction -- chemical, biological and nuclear -- I think the best intelligence estimates suggest that they have not been terribly successful. There's no question that they have some stockpiles of some of these sorts of weapons still under their control, but they have not been able to break out, they have not been able to come out with the capacity to deliver these kinds of systems or to actually have these kinds of systems that is much beyond where they were 10 years ago.

Condoleeza Rice gets in on the act (29 July 2001, CNN Late Edition with Wolf Blitzer) and her statement seems to support Powell's position:

"But in terms of Saddam Hussein being there, let's remember that his country is divided, in effect. He does not control the northern part of his country. We are able to keep arms from him. His military forces have not been rebuilt."

Check out the following links:

http://www.cnn.com/2005/WORLD/meast/08/19/powell.un/
http://www.cnn.com/2004/WORLD/meast/10/06/iraq.wmd.report/

I don't believe that Hussein was able to go on a WMD after the Powell/Rice statements and managed to obtain a huge aresenal between then and 2003.

http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6549

Here is a List of a Few commercial Active Antennas that use
a Short (Small) Vertical Antenna as the Antenna Element.

* Sony AN-1 Active Antenna
- Coverage 150 kHz to 30 MHz
http://www.universal-radio.com/catalog/sw_ant/2206.html
Uses a 59 Inch Vertical Antenna Element but works well
with an 104" CB Whip Antenna.

* DX Engineering ARAV-1P Active Receive Antenna
Vertical Configuration
- Coverage 100 kHz to 30 MHz
DXE-ARAV-1P => http://tinyurl.com/9pcya
SOURCE => http://www.dxengineering.com/
Uses a 102 Inch Vertical Antenna Element

* North County Active Antenna {Kit}
- Coverage 100 kHz to 30 MHz
http://www.northcountryradio.com/Kitpages/actant.htm
Uses a 24 Inch (12"-48") Vertical Antenna Element

* Dressler ARA60S Active Antenna
- Coverage 40 kHz to 30 MHz
http://www.universal-radio.com/catalog/sw_ant/4061.html
Uses a 36 Inch Vertical Antenna Element

* RF Systems DX-10 Professional
- Coverage 35 kHz to 35 MHz
http://www.universal-radio.com/catalog/sw_ant/2868.html
Uses a 52 Inch Vertical Antenna {Helical} Element

* McKay Dymek DA-100E Active Antenna
- Coverage 500 kHz to 30 MHz
http://www.universal-radio.com/catalog/sw_ant/0328.html
Uses a 56 Inch Vertical Antenna Element

* MFJ-1024 Shortwave Active Outdoor Antenna
- Coverage 50 kHz to 30 MHz
http://www.mfjenterprises.com/products.php?prodid=MFJ-1024
http://www.universal-radio.com/catalog/sw_ant/1132.html
Uses a 54 Inch Vertical Antenna Element

* LF Engineering H-800 SkyMatch Active Antenna
- Coverage 10 kHz to 50 MHz
http://www.grove-ent.com/ANT15.html
Uses a 26 Inch Vertical Antenna Element

* RF Systems DX-One Professional MkII Omni-Directional
Active Vertical Receiving Antenna
- Coverage 20 kHz to 60 MHz
http://www.universal-radio.com/catalog/sw_ant/1246.html
Uses a 47 Inch High Multi-Element Antenna

* LF Engineering H-900 Gain Probe Antenna
- Coverage 10 kHz to 60 MHz
http://www.grove-ent.com/h900.html
Uses a 25 Inch Vertical Antenna Element

* Watson AKD-HAA Active Antenna
- Coverage 30 kHz to 30 MHz
http://www.wsplc.com/acatalog/Active_antennas.html
Uses a 16.5 Inch Vertical Antenna Element

* Naval Electronics PR-430
- Coverage 100 kHz to 30 Mhz
http://www.naval.com/430/
Uses a 39 Inch Vertical Antenna Element
Note - Active AM/MF-SW/HF-FM Receiving Antenna VPA 30
http://www.naval.com/vpa.htm
http://www.naval.com/active-antenna.htm

Note - RF Systems MTA is a Non-Amplified Vertical Receiving
Antenna - Coverage 500 kHz to 30 MHz
http://www.universal-radio.com/catalog/sw_ant/3368.html
Uses a 84 Inch (Seven Foot) Vertical Antenna Element uses
'passive' Magnetic Transfer Technology vice an Amplifier.

Gone To Earth, direct openers for such major acts as Incubus, Collective Soul and Dream Theater will be guests on the Jill Morrison Show today, Thursday, Nov. 17. between 10AM-Noon EST. Listen LIVE on Internet @ www.wusb.fm

Long Island, US based, regional act Gone To Earth are a blend of several genres Alternative / Electronica / Rock and on the verge of breaking into the national circuit. Various members were pieced together and basically formed over the internet which also was used as a instrumental tool in interstate songwriting. Gone To Earth has been featured on major TV networks Fox TV, ABC, and MTV. Check them out at www.myspace.com/gonetoearth to sample the tunes and links to main website www.gonetoearthmusic.com

The other guests include co-Founders Maura Wachsberger and Billy Gaines of "CREATION" from the ADT at United Cerebral Palsy Association of Nassau County who will be performing at 15th Annual LI Festival of Trees - Thanksgiving Weekend - held at the LI Marriot in Uniondale.

This unique group of singers and musicians recently performed in concert with the Long Island Pops at Tilles Center at C.W. Post. They are living proof that despite their physical disabilities, have honed their musical talents and capabilities to the highest creative level and acheivement that are totally awesome with CD to boot!
http://www.ucpn.org/adultservices/creation.htm
http://www.ucpn.org/Old%20Pages/festiva1l.htm

Also, Chris Easy from Suck it Easy promo some upcoming shows at Vintage (formerly Munchaba).

The show's co-host Richard L'Hommedieu LI Music Hall of Fame Chairman will be on with the LI Music History segment and LI happenings and new feature "You Review" with listener callins on Rich's CD Pick of The Day that YOU the listener be the judge, telling us and other listeners what your thoughts are and rate the cd. WUSB Studio Hotline 631-632-6901.

2624. HF transceiver vs. HF sw receiver

Newsgroup: rec.radio.shortwave
Date: 2005-11-17 11:41:38 UTC
From: Walter Kurtz <pbrstreetgang@wowway.com>
Message-ID: <7bydnfcVcZb48eHenZ2dnUVZ_tudnZ2d@wideopenwest.com>
Source record: 49523

Is there any difference in the receive quality of a HF transceiver rig versus a dedicated sw receiver. the only direct comparision i can think of, which may be a bad example, is the IC-781 vs. the IC-R9000. Thanks for the input.

miso@sushi.com wrote:
> Aren't the whips just E-field sensitive? That is why they are noisy.
> I'm not sure a better FET can get around a fundamental problem like
> that.
++++++++++++++++++
It all depends...in most cases a horizontal is the better choice. But
in some
locations you can use an short, active antenna as a better choice
because
you can move the smaller antenna around to sniff out the least noisy
spot.
An example, here at work we have gobs of class A computer devices.
Servers, process controllers etc. RF hell so to speak.

We need an backup time retrieval system. We use GPS, but during a big
ice
storm 3 years ago the 1" of ice killed it. Had we lost our T1 we would
have
been in deep trouble. We have some experiments that have to be time
stamped.
So I pitched the idea of a WWVB and or WWV backup system. We tried a
10'
through 60' wire antenna at several locations on the roof. But there
was just too much
noise. Then I brought in my AmRad antenna and found several locations
that were
quite enough for a WWV decoder to lock to the ~BCD signal WWV sends.
WWVB
was a washout as we have a strong, out of house, spur smack dab on top
of 60KHz.
I did have to take "extreme" precautions to keep RF from creeping up
the braid and
getting into the antenna by that patch. Lots of feritte torroids on the
coax. We went
with a homebrew version very similar to one shown in Radio Electronics
with a hefty
FET. No IM, yet. I have a "feed" from the receiver brought out at my
bench so I can
keep an ear on the audio. I also have a dedicated PC to look at the
"time" as shown
by GPS, NIST via the web, and WWV.

I have several friends who live in restrictive residential areas that
do not allow
out side antennas. In such situations it is easier to hide an short

E-field active
antenna then any sort of "long" wire.

For ~99% of SWL applications I suspect a good wire antena is the better choice.
A wire antenna is always my first choice. For the same ~50$ as the North Country antenna, the least expensive and good antenna that I know of, I could errect a killer
wire antenna. But active antennas can do a good job and in the right location can do
a extremely good job. The biggest problem from my personal experience isn't normal QRN/QRM noise like static, but MW IM. All active antennas suffer from this to some degree! The closer one is to a MW station, especially 2 or more stations, the greater
this threat is. I suspect, but have no experience, that "in band", or SW stations, nearby would cause even more IM issues.

Terry

Sadly, our infant mortality rate is approximately twice as bad as that
in Cuba.

I have seen that link some time back.
Not sure if the author mentioned it or not but the PRO II (I own one) is
deaf on LF. I measured MDS at -95dBm at 137 KHz- my band of interest. Now
using a Palomar LF-->80M converter. In this combination, the MDS is -129
dBm.
Icom places a -10dB pad and an LPF in the line below 1.6MHz. Believe the PRO
and PRO III are the same topology.

Conditions were decent last night, not great. With the Palomar in line,
South American and Puerto Rican NDB's were rolling in.

Not exactly. It can burn all the way through and out the other side.
No need to stop at the bone. Water will not extinguish it. It will
stop burning when it is deprived of oxygen or consumed.

> White phosphorous can cause painful burn injuries to
> exposed human flesh. If particles of ignited white phosphorus

>

Phosphorus isn't toxic enough to kill except in extremely large
quantities. This kind of poisioning will make you sick, little else.
The internal damage depicted here is unsupported by any information I
have seen.

> A former US soldier who served in Iraq says breathing in
> smoke close to a shell caused the throat and lungs to blister
> until the victim suffocated, with the phosphorus continuing
> to burn them from the inside.

>

He was discussing things he does not know about. False.

> Despite initial denials, the Pentagon has now acknowledged on
> Tuesday that US troops had used the substance as
> an incendiary weapon against insurgent strongholds there.

The Pentagon has not denied the use of White Phosphorus.

The UN Convention bans the use of incendiary weapons against civilans,
not against humans.
See for yourself:
http://www.icrc.org/ihl.nsf/FULL/515?OpenDocument

Of course any deliberate engagement or targeting of civilians is
already a war crime. so that the US has not signed this one is not of
especial import except to say that we aren't bound by it expressly.

White Phosphorus is not banned.

It also isn't a chemical weapon.
We are signtory to the Chemical Weapons Convention which defines
chemical weapons. See here:
http://www.opcw.org/html/db/cwc/eng/cwc_frameset.html

So it isn't a chemical weapon and it isn't banned.

Indiscriminate use is. The stories circulating do not support that
contention. See here:
http://www.nctimes.com/articles/2004/04/11/military/iraq/19_30_504_10...

Bogert received the coordinates for the targets and recorded them on a
map. This is proper procedure. He's receiving coordinates from a
Forward Observer, indirect fire weapons never see their targets, the
FOs do. The coordinates are plotted so that it is known what was
ordered where. There is also a verification that takes place in the
call for indirect fire to avoid problems with numerical transposition
or other mistakes.

Hey, Doug, glad you're here and apparently doing well.

You seem knowledgeable about some of his material, and so I was wondering if I might ask a question...

My father won a bronze star in the Korean conflict (this according to his discharge papers), but all we have are the bars, not the main medal. Further, and more importantly, we cannot determine what the medal was for with any precision.

Do you have any idea how to find out what he might have received the medal for?

Thanks,
Bruce Jensen

Hello Bruce,

I can give you some general info. Those more knowledgable than I can give you some specifics. For that reason I have copied alt.war.vietnam on this reply.

I believe you can get your father's records from the Army, and that should have the info about the Bonze Star in it. If he is alive, he can get the records himself. If not, someone in the family should be able to obtain them. Those records should include the Bronze Star citation, which will tell you why he received it.

I'm sure one of the guy's on alt.war.vietnam can give you some specifics on how to go about this.

Doug

Perhaps there is confusion here about poisoning by phosphorus ingestion, which the toxicology textbooks do cover since WP was once a major ingredient in a rat poison, which somehow became popular for suicide in some subcultures. Eating WP will usually kill by destroying the kidneys, but if that is survived and the phosphate ion gets into the system, it will bond to bone.

>
> > White phosphorous can cause painful burn injuries to
> > exposed human flesh. If particles of ignited white phosphorus

Clearly, this has to be quantified. Carbonated beverages, in the 19th
and early 20th century, were called "phosphates" as phosphoric acid was
used to generate carbon dioxide and still some flavoring. You will
still find it in the ingredients of many sodas, especially colas.

Phosphoric acid is a very good rust remover, which is why soaking a
part in Coca-Cola can work. More commonly, people use trisodium
phosphate, the active ingredient in many laundry detergents, for rust
removal.

Phosphorus is a normal and necessary component of the body; one of the
key energy transfer mechanisms is the reversible conversion of
adenosine triphosphate (ATP) to diphosphate (ADP). Ironically, too
much phosphorus, especially in laundry detergents, creates a water
purity problem: it overstimulates the growth of algae.

> PRO and PRO III are the same topology.
Yes, this is true, but several owners of the Icom 756 series have reversed this and now get superb reception on the LW and MW segment.
As a MW DXer I am getting excellent reception on the Icom RF-756 PRO III below 1600 Khz, having reversed the attenuation on MW.

Walter Kurtz could also have a look at the Icom 746 Pro, a really useful transceiver with a great receive section at a good price.
See Bjarne Mjelde's review of that also on the http://www.dxing.info website.
There's also a discussion there on doing the MW mod to regain full sensitivity on the MW/LW segment.

A year on, I love the 756 PRO III as it's is a serious DXer in the wee hours of the morning, but I do miss the Drake R8B for it's outstanding synchronous detector for listening to AM broadcasts during the day.
I think the 756 is a better bet and better value for money than the Ten Tec RX340 as a receiver.

The records might include the citation if it was awarded in relation to
combat. If it was one of those awarded for meritorious service, then about
all that will be available will be a copy of the orders - and they really
won't say anything.

>BpnJ,

"The main difference I can see is that the liberals have
a greater share of compassion and sympathy for others,
the conservatives less so, and more for themselves."

Agreed - This may be true some of the times. <

Point well taken - my statement was not meant to be an absolute by any
means.

>But I have seen many more 'conservative' Christians
do Charitable Work to Help the Poor and Needy to
Care for and Feed themselves then any ten 'liberal'
Secular Activists. The 'conservative' Christians see
these people as Children-of-God in need of His Love
and Their Compassion. <

As do the more liberal Christians. Our church is United Methodist, and
as you'd expect in California leans toward the liberal - and while my
family helps out some, there are some really dedicated people in the
church who go tooth and nail to help homeless people, abused mothers
and children and others in similar circumstances. Secular activists
often have their interests focused on different issues.

>The only thing that the 'liberal' Activist seem to want
to do is demonstrate, march, protest, set-ins and
start riots. The 'liberal' Secular Activists see these
people as Instruments of Change to Bring Down a
Corrupt Society. <

I think that is partly true and partly off the mark. While some are on
the screwball fringe (Marxists and so forth - you know, nuts leftover
form the 60's and 70's) I know lots of activists who are dedicated to
wilderness and open space preservation, pollution reduction, animal
welfare and human welfare, and social justice, whose values otherwise
are loosely midstream and quite traditionally American (which is not
say that the activism I mentioned is *not American,* because I firmly
believe it is). These guys aren't out there marching and rioting -
they are helping conservancies to buy land, lobbying legislators to
enact laws, donating money and working on campaigns to preserve and
purchase sensitive lands and habitat, and working to educate people
about their responsibility to do as littkle harm as possible to other
powerless living creatures.

>Another thing that is true sometimes is that 'some'
(not all) 'liberal' Secular Activists would step-over

or walk-around a Person-in-Need to help an animal
{PETA} or to save a tree {Earth First}.
Note - The 'conservative' Christians seem to be much
less effected by these Politically Correct 'Causes'. <

Again, people are going to be attracted to their own brands of activism, to issues that resonate with them. Some activists will feel that immediate human causes are going to be the most critical, while others will identify nature or animals or peace or guns or copyright laws or whatever as being the most in need of a voice. Then there are some that split their time between several issues. Unfortunately, it is the grossly vocal and outlandish activism that the press zeroes in on, rather than those who quietly and without fanfare work to bring about change. Personally, I think it takes all types to make up a cause (and this is true of conservative causes too, such as anti-abortion for the Christian conservative activists and freedom to own and use arms for the more secular variety and so forth), but I believe that those in the background actually bring the greater results.

I personally do not think that working for a clean environment and wilderness, or for compassion for animals, are PC causes - these causes are always correct, all the time, and bring positive effects for every living thing (excepting, in part, for those who might profit from lack thereof).

They were behind that incident? In which court of law were they
convicted?

But, then again, you walk into a sovereign nation and attack innocent
people, what do you THINK will happen? What would YOU do if Iraqi forces
stormed the US and were dropping bombs on YOUR cities?..Greet them with
flowers?

> They're Suicide Bombers.. Who cares !

But suicide bombers are already dead. These people were alive.

Man, your mind is a muddle of a mess.

No wonder the U.S. is crumbling (quickly) within, under you
neocon-sympathizers.

Best wishes.

>input.
>

Transceivers have only 50-ohm coax connectors for the antenna.
Receivers often have that plus high-impedance screw-terminal inputs
for end-fed wires.

Transceivers may not have a filter for AM, or if they do it may only
be about 6 khz wide; receivers typically have the AM filter, and may
offer wider widths for better audio quality. (My NRD-525 receiver
offers up to 15 khz in audio width.)

No transceiver I know of has the synchronious detection that is now
commonplace on many receivers, which minimizes signal fading.

Receivers may offer better audio quality; transceivers often are
optimized for communications quality audio, kinda narrow and punchy
with can be irritating when listening to music or broadcast
programming.

2671. Still waiting for QSLs from Sri Lanka and RAI

Newsgroup: rec.radio.shortwave
Date: 2005-11-17 18:46:11 UTC
From: bpnjensen <bpnjensen@yahoo.com>
Message-ID: <1132253171.489326.206060@g47g2000cwa.googlegroups.com>
Source record: 49668

FWIW, last November (2005) I sent reception reports with significant detail to Radio Sri Lanka and RAI (Italy). Nice, polite letters with as much information as was appropriate and at least 20 minutes worth of detail as best I could describe it - all in English, for English-language broadcasts.

Aear has past - to date, no response. Each has subsequently received e-mails with copies of reception reports attached, and for Sri Lanka even a followup letter with report and additional postage (IRC *and* a couple of US $$), and still not even a whisper, neither a confirmation nor a denial.

I have understood that this long timeframe is typical from Italy - but is Sri Lanka like that as well? I know that Sri Lanka had its hands full with the tsunami and some political unrest, but I didn't think that it would put RSL out for so long...

Anyway, there you have it. Patience is a virtue - nay, a mandate - in this hobby, I guess.

2678. New Interactive World Shortwave Transmitter Map

Newsgroup: rec.radio.shortwave
Date: 2005-11-17 19:29:29 UTC
From: dxtra <google@dxtra.com>
Message-ID: <1132255769.679996.71600@o13g2000cwo.googlegroups.com>
Source record: 49677

Dxtra has created a free Google map that plots the position of world shortwave radio transmitters. Since the map is integrated with satellite pictures, you can zoom in on the physical transmitter site if you wish.

If you click on an icon, you will see station information, such as frequencies and languages. The map has a control on the top upper left that allows you to scale or move the map around. You can also mouse-drag the map with the left mouse button depressed.

You must be using a recent web browser and have Javascript enabled to see the map. On slower PC's it will take a few seconds for the map to load.

The map loads on the main Dxtra web page, there is also a hyper link at the top of the page to direct you to the map.

The map URL is:

http://www.dxtra.com

2679. Lightning Detector (amusing devices)

Newsgroup: rec.radio.shortwave
Date: 2005-11-17 19:32:51 UTC
From: Ron Hardin <rhhardin@mindspring.com>
Message-ID: <437CDAE9.3616@mindspring.com>
Source record: 49678

The ``First Strike'' lightning detector is entertaining.

I don't know what band (if any) it works in. It wants a vertical
electric field, whatever it is. Maybe it's capacitive, who knows.

Its most entertaining mode is sitting on a window sill, sounding
1 beep for 24-40 miles, 2 for 12-24, 3 for 6-12, 4 for 0-6 ; and you
can hear the strikes coming, surrounding, and going pretty reliably.
The pretty good range announcement is what makes it more than a
radio listening to static would be. (You hear all the static between
here and Australia at night on the radio ; and no range information.)

But it also detects lights being turned on and off, pickup trucks with
unsuppressed ignition and electric fences, should you clip it on your
bicycle. Having heard a storm system, there's no difficulty telling
these false alarms from a thunderstorm. Until then, though, you'll
have to make do, wondering.

I like it on the window sill at night when there's a chance of
Tstorms. It's better than listening for thunder ; say you want
warning to disconnect your outdoor antennas.

It turns itself off after two hours with no alarms, which I wish it
would not do, since after all the storms may come later.

Mine had a defect (draws power even when turned off, so the batteries
go dead in a week) so it's on its way back to the manufacturer now that
lightning season is over in Ohio

lessee
http://www.celestaire.com/catalog/products/5530.html $59

Fairly pointless unless it's tstorm season, I guess. I enjoyed it
though. More interesting than you would think to listen to.

This is quite important for some people. For over 15 years I've had an end fed wire antenna for my shortwave receiver and some sort of resonant (usually vertical with a dipole or two) for the ham bands connected to a ham transceiver.

It is important to note that they are in different rooms, but I am more interested in hearing weak signals on the shortwave than on the ham receivers when they are not "in band".

One can easily overcome it with a tuner with end fed wire connections, which one is likely to have with a ham rig.

I am surprised with that. I have in my receiver a 6kHz narrow skirt and 4kHz filter for AM, I've never heard anything that would sound better on AM broadcasts either on medium wave or shortwave with a wider filter, YMMV.

> No transceiver I know of has the synchronious detection that is now
> commonplace on many receivers, which minimizes signal fading.

But most ham rigs are stable enough for ECSS where you tune in an AM signal in SSB mode.

> Receivers may offer better audio quality; transceivers often are

Depends upon the rig. Some receivers have lousy audio, some transcievers have good audio. It varies from model to model and manufacturer to manufacturer.

You've never been to Iraq have you, either before or after the invasion. Lets be honest here (if you can be) you really don't know what your talking about. You've just bought into some bizarre ideology of hate of the US because you think (not know) it's the right thing to do right? I questioned the invasion at one time too, but after being there and seeing how people were living and learning (yes from actual Iraqis, not a news show with "experts") I decided that I would support it enough to reenlist and go back a couple of more times. I suggest that you do more than watch CNN when you form your opinions, you might not seem like such a moron when you express them that way.

Bottom line is we are in Iraq at the behest of the Stste of Israel.

Once again the USA plays the part of the "jew lap dog" and
does all the dirty work in the Middle East while the Bignose
Bankers laygh all the way to the same. One would think that
the stupid Americans would have waken up by now to
the fact that GWB is a stooge for the war criminal Arial Sharon.

The most likely event that could happen is if a small nuclear device
were to blow up in the middle of the daytime weekday someplace
in Tel Aviv or Haifa. Teach the dog zionist scumbags a
lesson and give them their own version of an "American 9/11"
which they so greatly deserve!

> or other mistakes.

Just like when the IDF fires American made missiles from Apache
gunships onto clearly civilian targets in Gaza and the West Bank.

Mark my words that someday soon both the USA
and Israel will pay a heavy price for their neo-facist colonialism

and overt military activities in Iraq and elsewhere.
It could even take the form of a medium sized tactical
nuclear device suprise detonated inside of a large population
centre someplace. Is that what the USA and the Israelis want ?

Israel and the USA have killed thousands of Moslems and
Arabs since the creation of the State of Israel in1948.
Do they really think these crimes will go un-retributed forever?

I can't get over how brave you are, Jay, considering the injuries you
sustained there last time. I know that you would make a decision to return
a couple more times based on the good you feel you and your comrades have
done for the Iraqis. You're a good man, Jay, although prolly your decisions
scare the bejeebus out of your family ..%)

Yeah, that's interesting. The war is going so badly that now the Repubs have to blame the Dems for it. Then again, the Repubs blame everything that goes wrong on the Dmes, yet the Repubs are the ones in power.

If you want to blame a Dem for the war, put a Dem in as President next time.

All of this comes just as former Marine Corps General and former CENTCOM commander Anthony Zinni has begun to speak out about the war in Iraq. Zinni is the subject of a multiple page article in the Washington Post in which he says "If I'm ever in a position to say what I think is right, I will. . . . I don't care what happens to my career."

Zinni is indeed telling it like it is. To quote the Post:

"Iraq is in serious danger of coming apart because of lack of planning, underestimating the task and buying into a flawed strategy," he says. "The longer we stubbornly resist admitting the mistakes and not altering our approach, the harder it will be to pull this chestnut out of the fire."

Apparently the time that Zinni turned against the Bush Administration (he endorsed Bush in the 2000 election) was when he saw Vice President Dick Cheney speak to a VFW convention.

"Simply stated, there is no doubt that Saddam Hussein now has weapons of mass destruction," Cheney said. "There is no doubt that he is amassing them to use against our friends, against our allies, and against us."

Cheney's certitude bewildered Zinni. As chief of the Central Command, Zinni had been immersed in U.S. intelligence about Iraq. He was all too familiar with the intelligence analysts' doubts about Iraq's programs to acquire weapons of mass destruction, or WMD. "In my time at Centcom, I watched the intelligence, and never -- not once -- did it say, 'He has WMD.' "

That's right. Zinni says that "never ï¿½ not once ï¿½ did [the intelligence] say, 'He has WMD.'" It was uncertain. It was always uncertain. Once Cheney left the stage Zinni was conviced of two things: first, that the Bush Administration was determined to invade and occupy Iraq. And, second, "These guys don't understand what they are getting into."

On Thursday, President Bush claimed that: "Nearly 100,000 fully trained and equipped Iraqi soldiers, police officers, and other security personnel are working today." ï¿½- President Bush, Press Conference, Sept. 23, 2004

However, the Pentagon said last Monday that of these ï¿½nearly 100,000 fully trained and equipped Iraqi soldiersï¿½ only about 53,000 Iraqi troops have undergone training.

In addition, Reuters reports that of the nearly 90,000 Iraqis currently in the police force, only 8,169 have had the full eight-week academy training. And it will be July 2006 before the administration's new goal of 135,000 fully trained police is met.

The Associated Press
PANAMA CITY, Panamaï¿½Nov 7, 2005 ï¿½ï¿½President Bush vigorously defended U.S.
interrogation practices in the war on terror Monday and lobbied against a
congressional drive to outlaw torture.
"There's an enemy that lurks and plots and plans and wants to hurt America
again," Bush said. "So you bet we will aggressively pursue them but we will
do so under the law."
He declared, "We do not torture."

Yep and even though uncertain one has to make a decision. Had President Bush not made the decision that he did, and Hussein did use WMD's then you stupid Liberals would be bitching about that and asking why nothing was done.

There's no pleasing you Kool-Aid drinkers.

Actually, I would prefer to have seen Osama killed or captured and Al Qaeda
destroyed in Afghanistan. But, like you, our commander-in-chief has a small
attention span. As to operating torture camps - isn't that what we're
supposed to be opposed to?

bush's troubles mount as Republican defections increase.
www.globalnewsmatrix.com

There are similar aricles all over the internet news sites.I don't think the GOP will ever be popular again as long as bush and cheney are in there.It is a down hill skid that has no stopping.Anyway,don't blame it on me,I had nothing to do with it.

Why don't you just answer the question instead of avoiding it?

Point well put! It would have been the United States fault for not
doing anything and I guarantee you that Canada would have done nothing
as usual.

Guess it depends on what is considered 'torture'. As I said, 'Tard boy liberals such as yourself would rather give the terrorists some milk, cookies and a pat on the head.

Run along now, boy, and practice those listening skills.

Did you ever stop to think that there were some trained Iraqi soldiers
before the war started? We did not kill them all you know. Do you
think that the Pentagon might have meant that we have only trained
53K?

Because the Liberal 'tards are fixated on WMD's. I know a fellow here who manages to bring up WMD's in every other sentence. It reminds me of a one time friend with whom it became impossible to carry on a conversation with because every other sentence that came out of his mouth had to do with Y2K and the gloom and doom that was to follow.

Actually, I don't think making people pose naked is torture, but the
liberal media got the attention of all the bleeding heart liberals. It
was the only way they had to fight back. They whined about some naked
pictures. What happened to the Jews at the hands of the Nazis, that
was torture.

Defections? Heck, just today I read that the head of the NAACP in Orlando switched to the Republican party.

That's progress!

Now as soon as the rest of Black America realizes that the Liberal/Democrats really don't have their best interests at heart the better off the rest of us will be.

I love these guys that just post links to some obscure news story. Do they actually have the ability to think critically for themselves. Barnard, Mike, Greg, David, and others they are all cut from the same mold I think. They remind me of a big turd swirling down the toilet. Do you think they make up this stuff as they are swirling side by side on the way down?

www.devilfinder.com Clarion Ledger bush is a hindrance to business in Mississippi

About two years ago,there was an article in the Clarion Ledger about what a hindrance bush is to businesses in Mississippi.I hope all of the Republicans (I am talking real real Republicans and most Republicans here in Mississippi are real Republicans,not so-called republicans) in Mississippi are nowdays distancing themselves from bush and cheney. The other day,cheney came out of that hole in the ground and kissing up for bush.It isn't working,cheney,and you might as well know that Right Now!

= = = "W. Curt Deegan" <WWWR@e...> wrote:

Excellent list, thank you.

While you mention two models from LF Engineering, you did not
include the M-601C, possibly because it is an AM BCB only active
vertical. I have it and the H-800 which you did include, and use
them phased together to great advantage on the MW band, for

both the directional characteristics achieved and to reduce ambient noise, especially during daytime.

There are also the L-400B LF/VLF active vertical, and the L-111 -- which I have -- that combines the L-400B with an up-converter for tuning in the 4.0-4.5MHz range. LF/MF/HF and LF/VLF marine versions are also produced by LFE.

Except for the H-900 -- an enhancement to the H-800, both of which are still in production -- all of these active verticals are available directly from LF Engineering. Because of some marketing arrangement, the H-900 while an LFE product, is only available for order through Grove, as well as the H-800 as you mentioned.

The LF Engineering web site is at:
http://www.lfengineering.com/products.htm
(For the record, I am unaffiliated in any way with LF Engineering.)

Following hurricane Wilma, I picked up the three LFE verticals from my yard and patio, placed them and the Christmas tree stands on which they are mounted back on the flat roof from which they had been unceremoniously removed, and turned them on, all was back in business without a hitch. I've been very happy with these LFE active verticals, both for their antenna performance and their weather resiliency.

2730. Re: US admits use of white phosphorous against people in Iraq

Newsgroup: rec.radio.shortwave
Date: 2005-11-17 23:52:09 UTC
From: SeeingEyeDog <lookin@u.org>
Message-ID: <11nq5ule047ip23@corp.supernews.com>
Source record: 49629
Cross-posted to: alt.crime,alt.politics.republicans,rec.radio.shortwave,us.military.army

Napalm or napalm-like incendiary weapons are not outlawed.
International law permits their use against military forces.

Incendiary devices like white phosphorous were banned by the Geneva
Convention.
The U.S. did not sign the relevant protocol to the convention.

The use of white phosphorus or fuel air explosives are not prohibited or
restricted by Protocol II: http://www.nawcwpns.navy.mil/~treaty/CCWC.html

What is restricted is the purposeful and malicious targeting or making
civilian populations the object of attack by incendiary weapons and
restricts the use of incendiary weapons against military targets located
within a concentration of civilians, and from what evidences are given and
shown, there is little to no evidence given to conclusively indicate or
prove that the US did in fact purposely and maliciously target civilians for
attack with white phosphorous or other incendiary weaponry or devices in or
within Fallujah.

What appears to be white phosphorous in the Italian Neo-Kommie propaganda
video has not been substantiated by any type of forensic evidence
whatsoever.

Probably will not be long before reports start circulating that the US
somehow used Agent Orange in Fallujah and parts of Iraq, as well.

Did you try reading about this from more than one source? Me thinks
not. Do some more research. You might finally draw a correct
conclusion. Then again, being the liberal that you are, it's doubtful.

++++++++++++++++++++++++++
Unless you have a very quite car, dont bother!

The high energy ignition systems, engine control computer, ABS computer and other nice elctronincs are very noisy. I borrowed a nice grey market Sony from a friend and tried it for 4 months in my 1985 Celica. When parked, well away from power lnes and other noise sources it worked great. Inspite of my various attmepts to reduce the noise in my Celica I was unable to do more then listen to power houses international outlets like the BBC.

Even my efforts at RFI reduction were somewhat wasted because if there was any traffic I could hear their engines over even the stronger SW stations.

Go for a SW converter from MFJ first to see how it will work. Much cheaper and easier to install, the Sony was deeper then the stock radio and I had to improvise.

Same reason why the left-wing newspapers are on the skids.
Readership is going way down.

Heading down to Sacramento in mid-December and I'm wondering if there are any good radio retailers in the region. Looking for a wide range of things, actually: scanners, frequency counters, shortwave... that sorta thing.

Hard to find good retailers these days.

If anyone out there knows of anything please re-post and lemme know. Thanks.

Randy

2740. Re: ABOUT - "Omni" {Non} Directional Vertical Active Antennas

Newsgroup: rec.radio.shortwave
Date: 2005-11-18 00:20:23 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1132273223.617976.161350@z14g2000cwz.googlegroups.com>
Source record: 49640

FO&A,

The Secret to most of these Small Vertical Active Antennas seems
to be Location and Placement of the Active Antenna Element.
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6561

OUT-AWAY-AND ABOVE :

Out from the House or Building by 15-25 Feet or more away from
the House's RFI/EMF Fields and Man Made Noise.

Away from any exterior sources of RFI/EMF by 15-25 Feet or more.
- Other Buildings, Lighting and Power Lines.

Above the Roof and Up and Away from the House's RFI/EMF Fields
and Man Made Noise by 15-25 Feet or more.

Any combination of : 15 to 25 Feet Out, Away and Above will work.

10 Feet Out and 15 Feet Up is 25 Feet Away

15 Feet Out and 10 Feet Up is 25 Feet Away

One Foot Out and 14 Feet Up is 15 Feet Away

Three Feet Out and 21 Feet Up is 24 Feet Away

30 Feet Out and 5 Feet Up is 35 Feet Away

25 Feet Out and 25 Feet Up is 50 Feet Away

TIP - With the Coax Cable Feed-in-Line Attached.
Use a 50 100 Foot piece of Nylon-Poly Rope and
starting in the 1/3 the Length of the Rope. Tie a
Clove Hitch at the Base; with a Clove Hitch in the
Middle; and a Clove Hitch at the Top of the Active
Antenna Element. Leaving 1/3 of the Rope at the
Bottom and 2/3 of the Rope at the Tope. Rig the
Rope over a Tree Limb so that the Vertical Antenna
is about 3-5 Feet from the Limb and the Rope Falls
directly to the Ground with a Stake in the Ground to
Secure the Bottom Ends of the Rope.

hope this helps - iane ~ RHF

That's the longest post I've ever seen from you Drakeman! I

'm really not fixated on WMD's. But Clifto asked for examples of lies from Bush & company and that's one of the most obvious, and arguably, most significant. Not that "Saddam has WMD's", honest men still debate what his WMD capability was. It's the: "there is no doubt that Saddam Hussein now has weapons of mass destruction. "There is no doubt that he is amassing them to use against our friends, against our allies, and against us." (Cheney)

There was doubt, of course, in the intelligence community. That's the part that Bush & company didn't share with Congress, or the public.

Greg

2743. Flailing Democrates Surrender in Iraq to Try to Win White House in 2008

Newsgroup: rec.radio.shortwave
Date: 2005-11-18 00:27:42 UTC
From: SeeingEyeDog <lookin@u.org>
Message-ID: <11nq890oojl7l50@corp.supernews.com>
Source record: 49643

HUNTER: Ladies and gentlemen, I'm Duncan Hunter, chairman of the House Armed Services Committee. And I'm joined by my colleagues today to make some comments regarding the recent congressional initiatives that would call for an immediate pullout of American forces from Iraq.

You know, American military operations have two phases. In the attack phase there's great patriotism, there's a groundswell of support for the troops and much flag waving.

The second phase is a more difficult phase. That's a time when you have casualties. That's the time when you make incremental gains. And it's a time when you sometimes see faltering political support. That always happens. And right now in the war-fighting theater in Iraq, we're in the second phase.

And I thought that we would talk a little bit about what's at stake, because I think that the attack on 9/11 is something that Americans have not forgotten, and I think they understand that the aggressive operations of America's military have helped to keep the insurgents in the war against terror off balance.

That's why Americans today are able to go to parks, go to schools, go to the grocery store, live life without fear of having a second 9/11 attacks, and that's why four years have expired without a second attack on our homeland: because we've aggressively projected America's fighting forces in the theaters in Afghanistan and Iraq, and they are doing a superb job.

Interestingly, this fall-off of support among Democratic ranks is not shared by the war-fighting forces. It's not shared by our troops. In fact, we're seeing now letters coming out of Iraq, with some that point with dismay toward the initiatives in the Senate that, thankfully, were rejected, that would call for a timetable for withdrawal.

HUNTER: And now we have an initiative in the House that calls for immediate withdrawal.

You know, one thing that we've learned in this century -- in winning the world for freedom in World War I, World War II and the Cold War -- is that freedom around the world is in America's interest. We have freed hundreds of millions of people in Europe, and that's accrued to the benefit of generations of Americans.

And we are in the process of delivering a free Iraq and delivering a nation that will be, instead of an enemy of the United States, a friend of the United States in a very strategic area of the world, that will not be a platform for terrorists, that will have a modicum of democracy and therefore not be a threat to the United States.

And I just wanted to remind our friends that now is the time for endurance. It's easy to be a flag-waver and to be patriotic and to support the troops when you're in the initial attack phase and it looks like you may have only a two-week war.

Lots of our enemies think America is only capable of a two-week war and that we don't have the endurance for the hard, tough battle of winning a war, securing the peace, providing the military shield and building up a country and building up its democratic institutions at the same time.

In fact, we do.

And I think that the Democrats who have undertaken this initiative have made a mistake. I think they've underestimated the toughness of the American people and the understanding that if we don't change the world, the world is going to change us.

And right now, in Iraq, we are changing the world. We're changing a very strategic part of the world in such a way that it will not be a threat to the United States and, in fact, will be an ally in the global war against terror.

So I just wanted to offer those words today, as the other side in this debate, as opposed to the statements that have been offered on the Senate side and now, regrettably, on the House side also, calling for withdrawal from the war-fighting theaters in Iraq.

HUNTER: And Kay Granger put this conference together, and I'd like to ask Kay Granger of Texas to make a few comments.

GRANGER: Thank you very much.

Like most of the members up here, I've traveled to Iraq. I've stood at the foot of a mass grave that held thousands of the remains of Iraqis that were killed by Saddam Hussein.

And I traveled to Iraq and I listened to our men and women in uniform who told me how proud they are of what they're doing, and some with tears in their eyes, because they say, The people understand it back home? Do they still support us? Are they still with us? And I've also worked with the women of Iraq who literally risked their lives to run for office so that they could be a part of writing a constitution and having a form of democracy -- and, as they said to me, and having the freedoms, Kay Granger, that you have in the United States.

That's all I can speak of as far as being a member like that. But I think it speaks best, and I'm going to quote Army Major General William Webster, who just yesterday -- now, he's the commander of the 3rd Infantry Division; he's responsible for three-fourths of the security in Iraq's capital.

And this is what he said. No one can say it better than he said.

Setting a date would mean that 221 soldiers I've lost this year -- that their lives would have been lost in vain. Our troops are trying to get this accomplished. They believe they're doing the right thing. The soldiers

believe they're helping. I think this: Bringing them home now is a recipe for disaster. Setting a date is a loser. That's what he says. He's there. He's risking his life and the lives of men and women. That's what we're all about.

http://www.nytimes.com/2005/11/17/politics/17text-gop.html?adxnnl=1&adxnnlx=1132272250-k0ODYVr2EG35wISl5Q2zNg&pagewanted=print

Chinese spy ring may give Communist military ?a strategic advantage?

http://www.washingtontimes.com/national/20051116-111007-5307r.htm

Canadian military secrets could also be compromised

http://www.asianpacificpost.com/news/article/863.html

"They are buying and developing capability whose only use is against the US military"

In particular, the Pentagon is concerned about how much China spends, and what it is buying. China's exact military spending is shrouded. US experts say it spends $50 to $90 billion annually. Yet Defense Minister Gangchuan insisted to Rumsfeld that the figure is about $27 billion. Days later, the London-based International Institute for Strategic Studies noted that China's purchase of Russian equipment alone nearly matched the Chinese official estimate; the IISS says China is at $62.5 billion.

"The PLA is getting in a position to considerably constrain our freedom of maneuver"

As one rather "liberal intellectual" told the Monitor, "In our hearts, most of us want China to be great - we feel deeply a desire to help run Asia AND THE WORLD."

Hi Mike,

Some years back, I had picked up one of those Sony car stereos w/sw tuner. Decent all-around product. The model I had purchased was # XR-4950X. Got it from that jackys.com in Dubai. I'm sure the tuner is the same as is to be found in the XRF5100 that Brian provided the link for. At the time that I had purchased, Sony had a number of these models out there, and basically, the tuner internals were the same, according to what info I was able to gather. Frequency coverage for the model I had used was the same as this XRF5100. The gaps were kind of annoying, but not horrendously bad: SW1 : 2940 - 7735 kHzSW2 : 9500 to 10140 kHz plus 11575 to 18135 kHz. Tunes only in 5 kHz increments. Selectivity adequate for listening to major broadcasters. At the time that I installed the unit, I had also installed a power line filter and antenna line filter purchased from Crutchfield. Given that I put these in at the same time that I installed the Sony, I can't say one way or another if either of the line noise filter REALLY helped any. But, in any case, reception was pretty decent for the time that I was using it. Driving at night in the U.S. southeast and mid-Atlantic regions, there was generally plenty to pick up: V. of Russia, China R. Int'l., V. of Vietnam, R. Canada Int'l, R. Prague, Radio Bulgaria, R. Australia, R. Austria, R. Taiwan Int'l, R. Havana, KBS, R. Vilnius, R. Netherlands, R. NZ, V. of Turkey, BBC, R. Japan... Mornings could yield some interesting stuff, too: I used to listen to R. Australia, BBC's Caribbean service, KBS on the way to work. Also, if interested, domestic U.S. sw broadcasters were easy to pick up.
At that time, I also had one of those C. Crane car antennas hooked up to the car's antenna jack.

Anyway, it provided respectable performance overall, both on the interstate and in city traffic. The car was an old one, so I guess I didn't have to worry about computer generated noises and that sort of thing.

MW reception was decent on the Sony, with one exception: it was impossible to scan in any useful way (it would stop on EVERY frequency, regardless of whether there was anything to be heard or not...perhaps the C. Crane antenna was doing too good a job). The FM reception was pretty decent, too; so switching over to hear Death Cab for Cutie or the like was always an option.

Junius

> keep his weapons of mass destruction, is determined to make more."

On July 21, 2003, Bill Clinton said on the Larry King Show, "People
can quarrel with whether we should have more troops in Afghanistan
or internationalize Iraq or whatever, but it is incontestable that
on the day I left office, there were unaccounted for stocks of
biological and chemical weapons."

Same day, same show, same Clinton, actually defending Bush: "You know,
everybody makes mistakes when they are president. I mean, you can't
make as many calls as you have to make without messing up once in
a while."

> I don't believe that Hussein was able to go on a WMD after the Powell/Rice
> statements and managed to obtain a huge aresenal between then and 2003.

Even if I were to take your Powell quotes, and disregard that he's a
flaming Bush-bashing liberal, your Powell quotes are a good sample in
that they show how often Powell contradicts himself. In any event, I
trump your flaming liberal Powell with a flaming liberal Clinton.

And even if all your quotes and materials were 100% true and factual,
we still don't have a lie, only bad intelligence relayed to the public.

So keep on chanting about how Bush lied. Just don't do it around
thinking people or people who are affected by reality or facts.

We do know that the US has been using depleted uranium [DU]
in several types of ordinance. Nasty crap. Has a half life of
about 50K Years and atomizes into fine particles when it
is dispersed by the resulting explosive charge around which the
shaped DU is wrapped. Nice shit. Great way to get rid of
the depleted nuclear waste from our reactors eh folks ???

Parts of Iraq will literally be radioactive
HOT half a million Years from now.

This is FAR WORSE than any alleged uses of WP.
Adleast that crap is inert after it burns out. DU is HOT
for 50,000 Years !

See: http://www.iacenter.org/depleted/du.htm

Local Soldier makes big find in Iraq. www.wnep.com Sergeant
Brian Packer of the Pennsylvania National Guard's 109th Mechanized
Infantry (he is probally one of those guys whom trained at Camp Shelby
near Hattiesburg,Mississippi before they shipped out to Iraq a few
months ago.Hey,I have to get my dig in there too,ya know) found a big
cache of weapons in Iraq.Good on yer,Sergeant Brian Packer.

> If you want to blame a Dem for the war, put a Dem in as President next time.

Agree..

- Pathetic Neocon rant..

Bush has Totally f**ked UP

TOTALLY

No Osama..

No WMD's

Cherry Picking rumors to support his invasion

No Exit Strategy

Ignoring the War College

Ignoring everyone who Disagreed with him

GW Bush... A pathetic excuse of a President ,

an embarassment for our Nation'

Making the U.S. The Laughing stock of the world

2,000 U.S. casualties and counting

No end in sight

That's amazing! You can have two thoughts at once! That is surprising
for a single celled amoeba like you. You should rate high on the
liberal list.

Yeah, I guess 2000+ American kids dead, 19,000 American kids mutilated
and tens of thousands of dead innocent civilians is just a little "once
in a while mess up". Shame on us for being so critical of Bunnypants' lies.

Use of incendiary devices agains civilains and "civilian objects" is
banned by a 1983 UN convention (Convention Concerning Some Conventional
Weapons) not the Geneva Conventions. I provided a link to it before.
The US did not sign the convention because the language was found to be
too broad.

> The use of white phosphorus or fuel air explosives are not prohibited or
> restricted by Protocol II: http://www.nawcwpns.navy.mil/~treaty/CCWC.html

DU is 0.7 times as radioactive as natural uranium, which is considered "slightly radioactive". Since DU has a half-life of 4.5 billion years, there is very little decay of those DU.

DU does not atomize. Recent research suggests that the particles of DU when pulverized by such actions a armor impacts are too large to be retained in the human body for any appreciable time and will be rejected. If so, there is little or no danger that DU will build up in a human even with repeated exposures.

2769. What About - An LF Engineering Vertical Active Antenna + Plus a Slinky Jr. ?

Source record: 49569

FO&A,

With one of the LF Engineering Vertical Active Antennas
sometimes a Slinky Junior (Jr.) can be use with good effect.
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6563

HOW TO :
Place the Slinky Jr. over the Antenna Element and Secure
the Bottom of the Slinky Jr. to the Bottom of the Antenna.
* Two to Three Plastic Wire Ties will do the job.
* Attach a piece of Fish Line or Mason Line to the Top
of the Slinky Jr. and Rig it to a Higher Object/Structure
above the LF Engineering Vertical Active Antenna.
- OR - Lay the LF Engineering Vertical Active Antenna on it's
Side Horizontal [Flat] and Rig the Slinky Jr. as a Horizontal
[Flat] Antenna (Mini-Random-Wire / Micro-Long-Wire).

Now - Extend the Top of the Slinky Jr. so that it is Stretched-Out
about Four Feet Overall and try your Radio Reception for improvement
with the LF Engineering Vertical Active Antenna.

Next - Extend the Top of the Slinky Jr. so that it is Stretched-Out
about Six Feet Overall and try your Radio Reception for improvement
with the LF Engineering Vertical Active Antenna.

Continue to Stretch-Out the Slinky Jr. Two Feet at a Time until
you notice Signal Overloading and Images with the LF Engineering
Vertical Active Antenna.
= Four Feet (4') = Minimum
= Six Feet (6')
= Eight Feet (8')
= Ten Feet (10')
= Twelve Feet (12') = Maximum

NOTE - The Slinky Jr. {Junior} which has about 85 Turns with a
Diameter of 1 7/8 Inches and a Circumference of 5.89 Inches
for a Total Wire Length of "41.7" Feet.
* Optimum "Stretched-Out" Length about 13.3 Feet

Once Again - Sometimes this works in getting that 'little extra out'
of the LF Engineering Vertical Active Antenna; and sometimes it
is a case study in Signal Overload using and Active Antenna.

try it and see - iane ~ RHF

You'd never know it from the blinders you wear and the chip on your shoulder.
You should get rid of the chip as it skews your balance.

This person seems to be very, well, deficient, all its posts say the same thing.
Perhaps it has no choice.
Can any of the regulars here verify this?

How is it possible to have lived during the past few decades without some
knowledge of illicit substances?
Hell, even presidents have been known to publicly admit to more than a
passing knowledge of such things.....

The current US gov't always refers to ITS intel as being flawed and I have yet to hear any of
the higher-ups admit that it was due to over-inflated intel from the Clinton years. Read Powell's comments as well as the comments from various US generals and intel experts; they don't blame Clinton. But they seem to like to point to GWB to some selective interpretation of the info.

From what I have seen so far, you and the word "right" just don't go well together.

Nah, wrong again. But I think that you being named Tracy has had an ugly effect on you over the years. It's one of those things that screams out that you were an accident.

How's the treatment for post-traumatic stress coming along? The gov't should do something to make sure you get the right treatment - it'll take care of your necro fetish.

No likely as the US government proceeded to abandon them after they got back. But then again the US gov't seems to like to do that.

After the jethro klintin 8 year reign of terror and 5 years worth of
braindead bush bloodbath you'd think these folks would see the bigger
picture.
But no, they stick their fingers in their ears and go la-la-la-laaaaa, just
like little kids at a birthday party.
This is what the public schools have done to this once great country.
Remember that when that big yellow bus pulls out in front of you tomorrow on
your way to work.
It'll be slammed full of tomorrows voters......

I was in Cuba of January this year. The people are remarkably inventive and resourceful. Some of those 1950's cars that they somehow manage to maintain - way too cool! I' m glad that I had the chance to get to visit before the hurricane season. They have a very good medical system and quite the number of well-trained specialists and their doctors are in big demand in that part of the world.

I've seen various reasons as to why the USA has a relatively high (for a first world country) infant mortality rate. Some say it's due to less than adequate universal health care, some say it's due to the high number of Cesarean births, or it may be due to the use of drugs to induce labour and so on. In all likelihood it's a combination of all those reasons. Part of the problem is the "drugs for everything" mentality of Big Pharma. Unfortunately, this leads to the "thalidomides" and the "vioxxes" of the world. Lifestyle management (diet, exercise, etc.) tends to get tossed by the wayside when pills are available.

Yep, good stuff, that Death Cab. Their newly released Plans is
something else, although I guess the concensus is that Transatlanticism
remains their most mindblowing album to date.

Stealing from one, to give to another, is not compassionate.
As an educated person you know this to be true.
So the only question is, why are you lying?

I hear HE is the main purchaser of baby seal carcasses in the US. Hew insists they be still warm and gets them delivered by the truck load.

If these perverts and fur wearers would stop ordering, the 'industry' would die a quick death.

Seal hunters are the Neocons of the Corporate hunting ghouls.

That costs money. Illegal labour MAKES money for their employers.When a
business can't pick up and move to China, they bring third world labour
and wages HERE.It's the next best thing.

Most likely none ever will. The cheap labour is a real money maker for
the corporate political contributors. If business needs cheap labour the
politicos will bend over backwards to provide it AND use it themselves.

When it's illegal to make welfare recipients *DO* something for their
money, another means is found.

Take a look where Rice says that Iraq and WMDs weren't an issue. Does that make
Rice a "flaming liberal" as well? Does anyone that disagrees with the
Chimp-in-Chief make them a "flaming liberal" in your eyes? No way in hell is

Powell a "flaming liberal". You might want to check out the part where Tenet told Powell a load of bullshit with regards to the WMD issue and that caused a large rift between the two. Powell, much to his credit, was intelligent to leave the current ship of fools.

>
>
> And even if all your quotes and materials were 100% true and factual,

Sorry to bring reality to your attention but Bush took the intel available and treated it as a menu. In other words, he cherry-picked the intel. If this were a sports match it would be akin to fixing the outcome and he would have been turfed a long time ago. Too bad that the Chimp-in-Chief didn't inherit Bush, Sr's intelligence who appears to have a greater insight into the folly of trying to remove Saddam (Time, 2 March 1998).

>
>
> So keep on chanting about how Bush lied. Just don't do it around

I think drugs have much to do with the higher than normal infant mortality rate in the US.. but not the ones from pharmaceutical companies. I suspect that it's high drug use among women of child bearing age (along with smoking, drinking, etc. during pregnancy.)

> chicken little and his mom!,

It wasn't the other reasons that the Chimp-in-Chief used as the premise to invading Iraq. The US can't claim the Human Rights card as it didn't do much to curb those crimes while they were happening. It isn't the 9/11 terrorist angle as Powell was saying that he didn't see any evidence of a connection (20/20 interview, 9 Sept. 2005). One of Ahmed Chalabi's (remember him?) associates gave unreliable evidence as to the an Iraq-Al Qaeda connection but it was never corroborated by NSA, CIA or FBI.

You may also want to take a look at the Downing Street memo which states "...Bush wanted to remove Saddam, through military action, justified by the conjunction of terrorism and WMD. But the intelligence and facts were being fixed around the policy..." The British gov't doesn't dispute the authenticity of the memo.

The Chimp pulled a cruel one on you.

You argument is specious. How could Hussein use that which he did not have? Bush cherry picked the intel and rigged the game. Powell, intel experts and American generals all agree that the WMD premise was a non-issue. Even Rice in 2001 wasn't worried about Saddam and WMDs.

It's a bad sign when Buchanan and GF Will start to criticize a Republican
administration.

Definitely some PNGs to be had in that frequency range but they are
turning into a vanishing species.

RAI used to reply very quickly (about 20 yrs ago when I last QSLed them)
and were very religious about sending out their monthly magazine. They kept
on sending years after I had first written in.

No luck at all with getting a reply from SLBC when I tried to QSL them
(over 20 yrs ago!). I sent 4 or 5 follow-up reports over the course of 2
years and ended up with nothing to show for the effort.

Good luck with trying to get a reply!

It is obvious that the lefties and terrorists are really on the same
side. (BTW, please quit calling the 'lefties' the name 'liberal', because
the 'lefties' tend to be the most narrow-minded, single subject, and
politically blind people.)

Rush should have NEVER started calling the left as 'liberal', even though
it was common terminology from back when there was SOME amount of liberalism
on the left... Such liberalism is long dead, and now the lefties are much
more doctorinaire and narrow minded than all but the most far right nazi
wakko...

2810. Re: Lightning Detector (amusing devices)

Newsgroup: rec.radio.shortwave
Date: 2005-11-18 08:12:39 UTC
From: James Douglas <james.douglas@genesis-software.com>
Message-ID: <vrKdnb7rNZFFFuDenZ2dnUVZ_tydnZ2d@comcast.com>
Source record: 49710

I just downloaded a schematic which I will build a couple of boards,
throw the parts on it and see how it works, it utilizes the one-wire
interface. I want to interface it to my PC to record daily during the
stormy season the number of lightning strikes. I also want it so I can
upplug ALL my electronics before a storm get's close enough to me to do
any type of damage.

Ron Hardin wrote:
> The ``First Strike'' lightning detector is entertaining.

That was the original thinking. Studies have since shown that DU
particles become small enough to become wind borne and have been found
up to 25 miles from the impact site.

> Recent research suggests that the particles of DU

Also not true. The latest studies *have* found significant amounts of DU
retained in humans.

2823. How Many : Inverted "L" Antenna Radials for a Receiving Only Antenna ?

Newsgroup: rec.radio.shortwave
Date: 2005-11-18 12:36:17 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1132317377.368829.310880@g14g2000cwa.googlegroups.com>
Source record: 49723

Tim [WB8UHZ],

How Many : Inverted "L" Antenna Radials for a Receiving Only Antenna ?

http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6572

Most Receive 'only' Inverted "L" Antenna (Random Wire) designs
(drawings)
usually do not indicate any Ground Radials.
[Side View] "NONE"

```
......00|------------------------00......
|
|
|
|
|
Radio <==============$
GR
```

Reversing the Lay-Out of the Inverted "L" Antenna allows
the Coax Cable to be placed on/in the Ground under the
Horizontal Antenna Element and have it act as a single
Ground Radial.
[Side View] "ONE"

```
....00|----------------------00.........x
|
|
|
|
|
$============================> Radio
GR
```

IIRC - There is one Inverted "L" Antenna design (drawing)
with Two Ground Radials at the Base of the Up-Leg of the
Inverted "L" Antenna with the Radials Perpendicular to
the Horizontal Out Arm when viewed from the Top.
[Top Down View] "TWO"

```
|
|
|
|
|
GRX$------------------------00........
```

|
|
|
|
|

Drawing Symbols :
"GR" = Ground Rod
"$" = Matching Transformer
"X" = Connection
"00" = Insulator
"|" or "-" = Wire Antenna Element
"=" = Coax Cable
"." = Rigging Rope

something to think about - iane ~ RHF
.
.
. .
= = = In Shortwave-SWL-Antenna@yahoogroups.com,
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6509
= = = <amfone@s...> wrote:

Yodar
You can get away with one radial on the bottom , that is it will work ,
there will be losses at the connection, adding two more will help,
there still will be losses but in reality to work "perfect" you would
need to lay about a 150 radials. Fortunatly for good performance this
is not necessary. What your doing by adding the radials is limiting the
ground losses and lowering the take off angel of the antenna , which is
what the inverted L will do for you, its is meant to look at a very low
angel of radiation, hence an excellent DX antenna but not much good for
close in stations. You can use any form of good conduction metal , but
to be most effective the concept is to stretch it out at least a quater
wave length from the (L) portion feed point. I would use for both the
(L) portion and the radials number 14 copper stranded wire insulated. I
think you can get a spool of 500 feet at Home Depot for about $20.00

I QSL'd SLBC on my first attempt (I believe) for reception on 19 January 1987.
Frequency was 9720, time was around 1300.

Verification took around 5 months.

Also have Adventist World Radio QSL'd from Sri Lanka for a 1983 reception.

Keep plugging away.

2837. On-topic question for D. Peter Maus

Newsgroup: rec.radio.shortwave
Date: 2005-11-18 16:00:43 UTC
From: "Eric F. Richards" <efricha@dim.com>
Message-ID: <e8prn1p22m0cud69hfp7v8i83vpu7bdcau@4ax.com>
Source record: 49737

I'm directing this one to Peter, because I know he has both the professional background to answer this as well as having a solution for this one at home. (Does that make sense?)

Anyway... I'm looking for a simple stereo mixer to handle line-ins from all my radios. The idea would be to take the line-in, set the pan to an appropriate "virtual" spacing in the soundstage, and output to an amp (or powered speakers, or even directly to speakers).

Unfortunately, I haven't found appropriate products to do this. I've found overpriced, underfeatured units targeted to hams, overpriced DJ mixers but not simple PA quality mixers. Where should I be looking for such a thing?

Regards,

Eric

There is at least 14 SWBC bands:
120
90
75
60
49
41
31
25
22
19
16
15
13
11

There are more SW bands for different uses though.

Many of these radios have developed the "bad LCD" problem due to bad solder joints. If you are comfortable with soldering ICs, you should be able to fix it easily.

I found that a good ground at the antenna end of the coax was essential to keep the ignition noise down.

If he was confusing short wave with ham, then the answer could be 9
120,80,40,30,20,17,15,12,10 (but only if you consider 120m as sw, and not mw)

You mean 160 meters, and yes that is mf. But there's also a "band" around
5MHz now (actually disrete channels).

Well you can search the ITU Frequency allocations and end up in a loop

But here is a difinitive answer (I think)

http://en.wikipedia.org/wiki/Shortwave

As I posted before -- 15 bands

--
CL -- I doubt, therefore I might be !

Yes I did mean 160m -- its been a long day already,
and I don't do 60m (or 160m) myself

The K7RA Solar Update

SEATTLE, WA, Nov 18, 2005--Just last week we saw no sunspots.
Then on November 13 we saw Sunspot 822 peek around the
eastern side of the visible solar disk. By November 15 we could tell
it was a big one. By today, November 18, the spot should be
squarely facing Earth. The daily sunspot number rose from 26 on
Monday, November 14, to 32, 58 and 62 on November 17.

Daily solar flux is based on the 2.8 GHz energy received from the
sun at an observatory in Penticton, British Columbia, Canada, at
local noon, which is 2000 UTC. The observatory has a parabolic
dish antenna aimed at the sun, and it produces three readings per
day at 1800, 2000 and 2200 UTC, although the 2000 UTC
measurement is the only number recorded as the official daily solar
flux. This number is related to the area and number of sunspots
facing Earth, but does not track it precisely. But it is more objective
than counting sunspots and measuring their area, which is how the
daily sunspot number is derived, and it has the advantage of being
able to take readings on overcast days.

For the past two days, November 16 and 17, the three daily
readings were 93.2, 94, 96, 97.1, 100.5 and 103.2. The 94 and
100.5 readings taken at local noon each day were the official solar
flux numbers for those days, so as you can see, the trend is up.
Currently the interplanetary magnetic field is pointing south, which
means Earth is vulnerable to any flares from Sunspot 822.

This weekend is the ARRL November Sweepstakes (SSB) contest.
Sunspot numbers and solar flux both are expected to remain
relatively high, with solar flux remaining around 100 for the next
week. Geomagnetic activity is expected to remain low over the
weekend, with the planetary A index for November 18-21 at 5, 5, 7
and 12. Geophysical Institute Prague predicts quiet conditions on
November 24, quiet to unsettled November 20, 22 and 23, and unsettled November
18, 19 and
21.

Tom Coates, N3IJ, wrote to ask about getting the WWV geo-alert messages via the
Internet.
These alerts are transmitted at 18 minutes after each hour, and you can also
read the latest
copy on the Space Environment Center Web site. The same report is available via
telephone at
303-497-3235. The broadcasts are updated every three hours, after 0000 UTC, 0300
UTC,

0600 UTC, 0900 UTC and so on.

Osten Magnusson, SM5DQC, observes that the lower the solar flux, the better 160 meters
seems to be. "Around October 25 the 160 meter band was as good as it can be," he wrote
November 11. "Now it's down again as sunspots have increased. Maybe it's not scientific, but
this is my experience!"

We received several interesting and informative emails concerning 10 meters. Ten seems to be
open over various paths quite often, although with the solar activity lower many people are not
showing up and operating. Those that do operate sometimes observe interesting propagation.

Joe Murray, K0VTY, of Ithaca, Nebraska, said he heard LU6GB working NL7Z on 28.49 MHz at
2012 UTC on November 6. When Joe worked LU6GB, signals were S9 both ways for 30 to 40
minutes. Of course, it helps that Joe runs a 7-element homebrew monoband Yagi that he built
more than 40 years ago. He had it AZ-EL mounted in 1965 with stacked 11-element 2 meter
Yagis for satellite work, back when only the 2 and 10 meter bands were used for OSCAR. On
November 13 Joe wrote again to say that from 1805 until 1820 UTC that day he worked Brazil
and Chile on 10 meters with solid signals.

Joe Living, W3GW/KH6, lives on Maui, and he listens to 10 meters every Saturday. He hears
many mainland US stations that cannot hear each other and often copies beacons. On
November 12 at 1900 UTC he heard the K5AB beacon in Texas at S5. On September 5 he
worked George, KA9YCB, in Southern Illinois. George was using a tiny indoor magnetic loop
antenna. On November 13 Joe worked K7LEK in Nevada on 28.4 MHz, then KD6AXR in
Fullerton, California, broke in, and of course he and K7LEK could not hear each other. Joe
mentioned that he would like to monitor 28.31 MHz every Saturday, SSB or CW, for readers of
this report who wish to check the 10 meter path to Maui.

Most interesting this week was an e-mail from Martin McCormick, WB5AGZ, of Stillwater,
Oklahoma. Martin was amazed on the morning of November 14 at 0200 CST local time (0800
UTC) to record the KQ2H repeater system in New York on 29.62 MHz FM. The repeater faded

out, then began coming in again around 0530 local time with New York drive-time traffic,
probably from its 2 meter link. By 0600 CST it was full-quieting. He tuned around the rest of 10
meters and on the 11 meter band but heard no other activity except the tail end of an FM signal
briefly on 29.64 MHz. Note that all this activity was overnight; for most of the time it was dark at
both ends of the path.

I contacted Alex Muzyka, KQ2H, who said the 10 meter transmitter is running 1300 W. The
antenna is a vertical at 300 feet on a tower in Wurtsboro, New York, about 1950 feet above
mean sea level.

Carl Luetzelschwaub, K9LA, comments that this propagation could be due to F2 region
ionization from geomagnetic field activity. Martin thought perhaps this was very early winter
E-skip.

For more information concerning propagation and an explanation of the numbers used in this
bulletin see the ARRL Technical Information Service Propagation page. An archive of past
bulletins is on the ARRL Web site.

Sunspot numbers for November 10 through 16 were 0, 0, 11, 16, 26, 32 and 58, with a mean of
20.4. The 10.7 cm flux was 77.9, 78.6, 83.1, 87.8, 92.4, 100, and 94, with a mean of 87.7.
Estimated planetary A indices were 2, 5, 10, 14, 10, 4 and 3, with a mean of 6.9. Estimated
mid-latitude A indices were 1, 3, 7, 12, 7, 5 and 1, with a mean of 5.1.

If you're looking for something that fits in a standard 19" rack, the Alesis Studio 12R or Mix 12R is a good choice. You've got 12 channels, two Aux sends to recorders, separate main and monitor outs, a couple of stereo channels, the rest mono, panable, with completely intuitive operation.

Even simple shelving eq on each channel for trimming audio to your liking.

Alesis isn't as ruggedly built as some, but it's audio performance is overkill for what you need, and if you don't abuse your hardware, which you clearly do not, it will outlast you.

If you're looking for a desktop mixer, Mackie does about the best at this. Same feature sets, a little more versatile with the aux sends and returns, and eq. Bulletproof build.

Balanced and unbalanced audio ins and outs are standard on both lines.

Mackie also fields a simpler line of toys under Greg's original TAPCO handle.

Fewer features, lower cost, bulletproof build quality. More than adequate audio performance. Far better than you'd need for your application.

Self noise is lower on the Mackie products than the Alesis, but you'll not be able to tell the difference in real world settings.

Behringer is a less costly alternative to the Mackie, but I don't endorse Behringer, since their R&D department consists of a couple of techs that reverse engineer other companies' products. They've been in some pretty tasty lawsuits for it, too.

Mackie you can research at Mackie.com

Alesis at alesis.com.

And the best prices for the product you want are at e-Bay. I bought a Studio 12 R for a couple of hundred bux, and use it to tie all the audio outputs in my office together. Radios, computers, mp3 player, dog whistle...all of it. All through a single sound system, balanced and trimmed to taste through the mixer.

E-bay will also have some Teac/Tascam mixers for less cost, but with more primitive features than the Mackie and Alesis lines. They're usually quite compact. Not quite as versatile as the others. The search engine will come up with everything you're interested in under "Tascam Mixer" or "Teac Mixer." Tascam is usually better build quality than Teac. Tascam is usually better audio quality than Teac. They come out of the same plant, and both will meet your needs.

I had a Teac model 1 here some years ago that would be good for what you're doing. Sold it for next to nothing. You can find them for about that, now.

All the companies field powered mixers, but they would be horrific overkill for you. Unless you intend to hit your listening station with about 200W/ch of NBFM comms.

> Unfortunately, I haven't found appropriate products to do this. I've
> found overpriced, underfeatured units targeted to hams, overpriced DJ
> mixers but not simple PA quality mixers. Where should I be looking
> for such a thing?
>

Well, there is another option....if you're going to just set the mixer levels and not screw with them, Radio Design Labs makes modules that may accomplish what you're trying to do. The stereo staging may take some innovative configuration, but with a combination of modules, you can pretty much build anything.

Similarly, I've used modules from OpAmp Labs to build mixers, preamps and distribution systems. Cost is managable, and the builds are simple. With many flexible options for each module.

Where you're going to run into obstacles, is the distribution of receivers across the stereo stage. You can do it, of course, but with roll-your-own products like Radio Design and OpAmp, you'll invest as much in time and components as to buy a used mixer.

Start looking on e-Bay. As you find products that get close to your needs try to find the manufacturer's website. If they've got something close, they'll likely have something closer.

Then just keep an eye peeled for the right price.

I have the radio system on a Switchcraft system that came out of a stereo shop. I can punch up any, all, or any combination of radios for monitoring, diverting to a recorder, or distribution though the grounds with the touch of a few buttons. Found a pair of those on eBay for less

than $100 a few years ago. Combined with the mixer, and stereo
amp/speaker system, it makes for virtual effortless selection of content
depending on what's happening at any given moment.

Source record: 49764

Except for a 1/4 wave vertical, why would one need ground radials?

For receive, you really don't need any to "work". But like one said,
adding more will lower the overall angle of radiation and would improve
it for low angle long haul stuff. But how much vs the price of wire
would depend. For receive only , I doubt I would use too many radials.
The payoff is not really worth it, if you don't intend to transmit. Of
course,
if time, $$$$, etc, no object, many radials are better than just a few.
So for some of the harder core, it might be worth the trouble.

I'm afraid I was looking for recent studies from peer-reviewed medical
journals or conferences, or at least from research centers that
published the detailed experiements. This seems to be a bibliography at
a partisan site.

2868. Re: Shortwave in the car?

Newsgroup: rec.radio.shortwave

Source record: 49767

>Not cheap, though; last one I noticed went for over $500, I think.

dang...kinda steep...I'd rather use what I use, which probably could
also be found for about that price if used..
http://www.icomamerica.com/products/amateur/706mkIIg/
Of course, it's a tranceiver, but for SWL in the car, it's quite good.
Covers VHF/UHF also. It's a 900-1000$ radio new, but I see them used
fairly reasonable. One advantage, is they are designed as a mobile
radio. So the antenna connections, etc, are straight forward, and if
you use a good antenna, with a good body ground, noise is not
too much of an issue. I'd rather use a 12v radio designed to use
coax, etc, than try to rig a portable up in the car. Maybe the DC777
is a car radio, not sure...
And most of the actual "car" SW radios seem to be kinda lame
to my tastes..Or at least after you use a ham rig for a while... :/
It doesn't have the fancy AM toys like ECSS, etc, but I don't need that
in a car. When that radio is not in the truck, I use it in the house.

>I found that a good ground at the antenna end of the coax was essential
>to keep the ignition noise down.

very important. I use a 80-10 m ham antenna, so I'm covered in
that dept...Also have a 1/4 wave VHF whip on the cab.

BM & David,

Using the Coax Cable as a Counterpoise under the
Inverted "L" Antenna as shown.
{ Counterpoise = A Single Ground Reflector / Radial }

Reversing the Lay-Out of the Inverted "L" Antenna allows
the Coax Cable to be placed on/in the Ground under the
Horizontal Antenna Element and have it act as a single
Ground Radial.

Pretty much the same, from my experience. I still have a Teac 3340 that I use from time to time. But not often. I prefer the Technics 1600 when I need to play tape. Teac factory heads were wildly inconsistent. Setting up a machine was maddening, especially if you were looking for channel to channel tracking. From one channel to the next it was nearly impossible to get a TEAC to come up to something consistent. And the gap scatter on the 4 track heads made azimuth compatibility with other machines flat out impossible. Tascams were better. But not by any great leagues.

I don't think they've fielded a straight analog mixer in a while.

Of the Teac product that's current, I use a couple of disk drives,
and that's about it.

They work. Well.

But that's the limit of my Teac current product experience.

Their product lines I've recommended here are largely discontinued
products that are simple enough to service that would easily be able to
effect repair or modification.

I prefer napalm to Willie Peter in almost every situation.

You smell that? Do you smell that? Napalm, son. Nothing else in the world smells like that. I love the smell of napalm in the morning. You know, one time we had a hill bombed, for twelve hours. When it was all over I walked up. We didn't find one of 'em, not one stinkin' dink body. The smell, you know that gasoline smell, the whole hill. Smelled like... victory. Someday this war's gonna end...

This is someting I've been trying to follow. Can you offer a poiner to
a study or a sory about it?

Failing that, do you know how long between exposure and measuring the
DU in the system?

2881. Cleaning and Protecting 'old' and "New" Coax Connectors for Use / In Use {Maintenance}

Newsgroup: rec.radio.shortwave
Date: 2005-11-18 23:02:33 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1132352999.704682.60310@g14g2000cwa.googlegroups.com>
Source record: 49782

For One and All,

Cleaning and Protecting 'old' and "New" Coax Connectors for Use
and for In-Use {Maintenance}
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6583

IMHO - Less is Better.

First - The Outer Threaded Area of a PL-259 Plug and SO-239 Jack
will generally give you ample Mechanical and Electrical Contact
Area for a Very Good Electrical Connection.

Second - Inner Male and Female Mating Pins is where you should
focus your attention. The Inner Male and Female Mating Pins
of the PL-259 Plug and SO-239 Jack represent a smaller [Hidden]
Contact Area that should be cleaned prior to Assembling the
PL-259 Plug to the SO-239 Jack. This is the Critical Coax Cable
"Connection" - IMHO - That needs to be Cleaned and Protected.

FWIW - I have usually used some DeOxIt ! type Spray-On
Contract Cleaner with a "Q" Tip
RadioShack Catalog # 64-4338 => http://tinyurl.com/9e52r

READ - Contact Cleaners, Protectors & Enhancers for Electronics
CLEANER => http://www.pitt.edu/~szekeres/cleaner.htm
In the Search for the Ultimate Cleaners, Cleaning Methods,
and Protectors . . .

DeoxIT Brand { De Ox It ! } :
http://store.caig.com/s.nl/sc.2/category.188/.f
- Contact cleaner, conductivity enhancer and lubricant.
- Dissolves oxidation and corrosion on metal surfaces.
- Fills in microscopic gaps and reseals surface for
better contact and an enhanced flow of electricity.

NOTE - This general advise also applies to BNC and "F" and
other 'connectors' as well.

clean - it's about making the connection - iane ~ RHF

Depleted Uranium Tank Ammunition sharpens upon impact and also self ignites (very high heat) causing atomized particles which carry far and wide in the air and that stuff gets into body tissues and body organs and lungs.There are some Depleted Uranium contaminated Tanks in Kansas sitting out in open areas and kids have been playing on those Tanks.I think it was at www.rense.com (scroll down the middle isle at rense.com) where I read an article about that earlier this week.

2886. How High should a Shortwave Listener (SWL) Inverted "L" Antenna be . . .

Newsgroup: rec.radio.shortwave
Date: 2005-11-18 23:30:32 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1132356632.201669.266170@z14g2000cwz.googlegroups.com>
Source record: 49784
Body handling: HTML body converted to readable text

Bill,

How High should a Shortwave Listener (SWL) Inverted "L" Antenna be...
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6585
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6586

If you are simply using the Inverted "L" Antenna as a
Receive 'Only' Shortwave Listener's (SWL) Antenna.

Then the Shortwave Listener (SWL) Inverted "L" Antenna can
be viewed as an "Available Space" RANDOM WIRE Antenna
that is configured in the shape of and Inverted "L".
- - - It is as Big as you can get it and as Long as you can
make it in the Available Space that you have to work in for
your location and conditions.

NOTE - The Shortwave Listener (SWL) Inverted "L" Antenna
is not 'cut' to any specific Wave Length of Fraction of a
wave length for any specific Frequency of Band.
= = = It is simply a Bent "Random Wire" Antenna

First - Take the Wire Antenn Element Vertical-Up-Leg from
the Ground Level (Top of the Ground Rod) to as High as it
can go : 10/12 > 15/18 > 20/21 > 24/25 > 27/30 Feet or more.

Second - Take the Wire Antenn Element Horizontal-Out-Arm from
the Corner-Top-Rigging-Point to as Far Out-and-Away as it
can go : 20/25 > 30/35 > 40/45 > 50/60 > 75/90 Feet or more.

Usually the Shortwave Listener (SWL) Inverted "L" Antenna
has a Vertical-Up-Leg to Horizontal-Out-Arm "Aspect Ratio"
{Sizing} of One-to-Two (1:2) or One-to-Three (1:3)

For those who want a Set-of-Numbers :
Vertical-Up-Leg (1X) : Horizontal-Out-Arm (2X to 3X)
10 Feet : 20 Feet to 30 Feet - Small (Tip - Use Litz Wire)
12 Feet : 24 Feet to 36 Feet
15 Feet : 30 Feet to 45 Feet - Average
18 Feet : 36 Feet to 54 Feet
20 Feet : 40 Feet to 60 Feet - Large
25 Feet : 50 Feet to 75 Feet
30 Feet : 60 Feet to 90 Feet - BIG !

NOTE - Unless you are using an Inverted "L" Antenna for a
Amateur / Ham Transmitting Antenna.

You know what? Fuck Iraq and the war. I just don't give a shit anymore.
There I said it. I don't give a shit what happens anymore over there.
I'm sick of hearing about it.

I was for it at first but we've been there far too long now. Screw it,
I just don't give a fuck anymore. More of our troops will die and
there's nothing we can do about it.

Actually, Sterwart is in Newburgh,N.Y., I know, I live a few miles north of it. That plane passed only about 2 miles west of my house. I came to realise this after I got home from work and saw the flight maps on the news reports. If I had been home and looking west I would have no doubt watched that plane go down the Hudson. I would of thought it odd too seeing as though commercial flights don't take a route like that, helicopters do all the time but not commercial flights. The commercial flights usually travel diagonally across our area and C5A's fly over here all the time and sometimes VERY low, those come from Stewart.

I saw a plane fly over my house today, it freaked me out seeing as though there's been no air traffic since Tuesday. I momentarily jumped when I first heard it coming then watched it fly over. Man this really messes with your head...

My birthday is 5/4/1958

When one examines our enemies in the War on Terror

&#65533; the Taliban, al Qaeda, the Ba&#65533;athists in Iraq, and for the more expansive among us, the regimes of Syria, Iran, and Stalinist North Korea &#65533; one finds only two things they all hold in common: hatred for America, and support from the Chinese Communist Party. http://www.dragoninthedark.com/

In 1999, a book by two Communist Chinese officers presented a scenario in which the World Trade Center is attacked as a situation that the United States would find difficult handle. The two colonels recommend Osama bin Laden by name as someone with the ability to orchestrate the attack of that magnitude via his al Qaeda group
http://www.newsmax/archives/articles/2002/9/24/143618.shtml

Communist China signed a pact on economic cooperation with the Taliban on the morning of September 11, 2001, the very day the World Trade Center fell
http://www.washingtonpost.com/wp-dyn/articles/A34491-2001Sep14.html

Communist China&#65533;s Xinhua press agency later produced a video on the 9/11/01 attacks &#65533;glorifying the strikes as a humbling blow against an arrogant nation&#65533;
http://www.portal.telegraph.co.uk/news/main.jhtml;$sessionid$431SABQAAB2BBQF IQMFCFGGAVCBQYIV0?xml=/news/2001/11/04/wchin04.xml&sSheet=/news/2001/11/04/i xhome.html

After September 11, U.S. intelligence caught the Communist Chinese military&#65533; s favorite technology firm &#65533; Huawei Technologies &#65533; building a telephone network in Kabul http://www.washtimes.com/national/20010928-343125.htm

Raids of al Qaeda hideout by U.S. Special Forces and allies have netted, on more than one occasion, a large cache of weapons from Communist China, including surface-to-air missiles,
http://www.washingtontimes.com/national/20051116-111007-5307r.htm mere weeks after the U.S. government warned that al Qaeda terrorists in the U.S. would try to use said missiles to take down American planes
http://www.washtimes.com/national/20020601-74768506.htm
http://asia.cnn.com/TRANSCRIPTS/0112/18/nr.00.html

In the late summer of 2002, almost a year after Afghanistan was liberated, a three-man delegation from the Taliban, - led by Ustad Khalil, purported to be Mullah Omar&#65533;s right-hand man &#65533; spent a week in Communist China meeting with cadres, at their invitation.
http://www.newsmax/showinside.shtml?a=2002/9/9/155340

In mid-2004, it was revealed that the Communist Chinese intelligence service had used some of its front companies in financial markets around the world

to help al Qaeda raise and launder funds for their operations.
http://www.geocities.com/china_e_lobby/05May2004.html

In January 2001, Communist China was found to be selling Saddam Hussein missile technology
http://www.washingtontimes.com/national/default-200112622320.htm

In November of 2002, a Communist Chinese shipment of missile launching patrol boats to Iraq was intercepted by the U.S. Navy
http://www.washingtonpost.com/wp-dyn/articles/A42786-2002Dec11.html

Much more:
http://china-e-lobby.blogspot.com/2005/09/on-war-on-terror-part-iii-communist_11.html

Moving on, notice all these former CIA operatives coming out of the woodwork lately with allegations against Bush?
Now read this: http://www.brookesnews.com/052609cia_print.html

If we cut and run out of Iraq like we did in Vietnam the democratically "elected" government in Iraq will fall. The result? Absolute Turmoil! And I guarantee, that by Sept 11th, 2006, Communist China will sign an oil deal with the Taliban, al Qaeda or the Ba�athists in Baghdad.
http://www.dragoninthedark.com/

Why? Read on...

Last February, the Kremlin imposed a prohibition on any majority participation by foreign companies in the country's hydrocarbons. Two months later, Moscow inflicted a punishment on BP's Russian subsidiary that was more or less the same as the one employed against Yukos - the former oil giant that escaped Putin's control - by presenting a billion dollar bill for a suppositious fiscal infraction. The objective of the maneuver? To discourage BP from taking over any remains and to give them back to Gazprom, the huge State company that profited enormously from the Yukos implosion.
Let's stick with Russia:

The day after the bittersweet dialogue between Presidents Bush and Putin during the celebrations for the sixtieth anniversary of the fall of Berlin, the Russian autocrat made a discreet announcement. He is ready to negotiate with Beijing for the construction of an oil pipeline that would carry 30% of the energy resources which China imperatively needs to maintain its present rhythm of economic progress. One must remember that once the project is concluded, China will be more captive to Russian black gold than to that of any other producing country.

If China is tributary to Russia first, then to Iran for all that concerns hydrocarbon supplies, that doesn't prevent it from all-out stimulation of energetic nationalism. Unlike other spheres of economic activity, the [Communist] State's presence in the oil business is dominant. There is no question of opening the door to private interests in this area. For example, Beijing fooled Exxon and Shell into believing that, if they got involved in the construction of an oil pipeline between the country's West and Shanghai,

they would have access to the Chinese automobile market. To make a long story short, Beijing let things drag along until it had obtained the technology transfer it wanted. Once that was complete, the Chinese terminated any further work.

When all these facts are taken into consideration, all given their proper weight, then - unless you are either totally credulous or fanatical - you will have to admit that the resources of a certain country take on a particular importance. What country might that be? Iraq.

http://www.truthout.org/cgi-bin/artman/exec/view.cgi/37/11131

It's all very simple really.
To which Dear Leader do you wish to be captive? Saddam? China's Hu Jintao? Russia's Putin? Who?

Instead of pumping your gas from BP petrol stations, we could well be filling up at SINOpec.

Continuing...

China's Hypocritical Energy Stance

British Petroleum (BP) and its chairman Lord Browne attempted to take a significant financial interest in China's largest oil refiner and fuel marketer, Sinopec. Under the conditions of the proposed deal, BP would have traded access to certain oil and gas fields in return for an equal or majority stake in Sinopec which is 80 percent owned by the Chinese government.

Beijing would have become an equal or minority partner in a high-profile, state-run enterprise with national security significance; something the communist government was not prepared to do. "BP has misread what the Chinese want. They said no; they've said they're not doing it," one source close to the deal said.

Does This Sound Familiar?

Beijing's move to protect one of its most treasured oil assets from foreign investors brings to mind comparisons of CNOOC's failed bid to purchase U.S. oil company Unocal in June.

In response to the failed Unocal bid, the Chinese foreign ministry released a statement in July saying, "We demand that the U.S. Congress correct its mistaken ways of politicizing economic and trade issues and stop interfering in the normal commercial exchanges between enterprises of the two countries." Recent protectionist actions taken by Beijing involving BP and Sinopec make these statements all the more hypocritical.

The Bush administration and members of the U.S. Congress took an unbelievable beating at home and abroad last summer for their stance regarding oil company Unocal. At that time, legitimate national security questions related to the deal were roundly criticized as protectionist

attempts by U.S. hawks who feared China's global rise and influence. Yet, China has essentially taken a similar protectionist stance with Sinopec, eliciting little debate in the international community. Why the lack of scrutiny?

The reason is quite simple -- the world community has come to rely upon China's unprecedented economic growth for its own economic vitality. As a result, countries that normally would object to such protectionist actions have remained eerily silent for fear of offending a rising China. This position of tacit appeasement, however, has created a dangerous precedent that if permitted to continue, will certainly challenge the basic principles of free enterprise. In essence, an acceptable double standard will be created exclusively for China. By looking the other way when Beijing violates the very same open market principles it publicly espouses to support, the global economic system is compromised.

It is becoming clear that Beijing wants to maintain control over strategic assets in order to build global dominance in core industries such as energy, financial services, technology and manufacturing. Why? This will allow Beijing to influence the geo-political landscape for decades to come.

http://www.frontpagemag.com/Articles/ReadArticle.asp?ID=20223

Now hold your breath, read this Holy Grail for the Left-wing piece from an ex-CIA operative, and prepare yourself to confront China over oil Globally.
http://www.truthout.org/docs_2005/printer_111805N.shtml

Be careful what you wish for.

2904. ABOUT - The "Eton Elite E2 DRM IBOC Radio" Group on YAHOO !

Newsgroup: rec.radio.shortwave
Date: 2005-11-19 01:00:12 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1132362012.583500.179170@g43g2000cwa.googlegroups.com>
Source record: 49905

For One and All,

ABOUT - The "Eton Elite E2 DRM IBOC Radio" Group on YAHOO !
http://groups.yahoo.com/group/Eton-Elite-E2-DRM-IBOC-Radio/
Eton "Elite" [Grundig Satellit] Radio with DRM and IBOC
http://groups.yahoo.com/group/Eton-Elite-E2-DRM-IBOC-Radio/message/37

QUESTION - WHAT'S NEXT ? ? ?
After the Grundig Satellit 800 Millennium Radio / Receiver ?

Now that the Eton E1 AM/FM Shortwave Receiver with XM Satellite
Radio has come to market and is "Assembled in India".

Will the Eton Corp began work on a newer undated
Grundig Satellit 800 Millennium ?

Will it bear the good old "Grundig" Brand Name ?

Or will it bear the newer "Eton" Brand Name and be called
the Eton {Elite Series} "E2" AM/FM Shortwave Receiver
and feature "DRM" Digital Radio Mondiale reception ?

In the Future - What will becoming off the Tecsun GEM
assembly line in China (PRC) to replace the Grundig
Satellit 800 Millennium "Big Box Receiver" ?

FWIW - Here are Two Groups on YAHOO ! for the 'older'
Grundig Satellit 800 Millennium Radio and the "New"
Eton E1 AM/FM Shortwave Receiver with XM Satellite Radio
- - - If interested I would suggest that you Join them :

* Grundig Satellit 800 Millennium Radio/Receiver Group
on YAHOO !
GS800 => http://groups.yahoo.com/group/Satellit800/

* Eton E1 AM/FM Shortwave Receiver with XM Satellite
Radio Group on YAHOO !
E1 => http://groups.yahoo.com/group/ETON-E1-XM-Radio/

CONCERNING - DIGITAL RADIO MONDIALE :
DRM => http://www.drm.org/

Digital Radio Mondiale (DRM) System Info
DRM INFO => http://www.drm.org/system/technicalaspect.php

Source record: 49908

Ahhhhh,lie detectors are phoney.Look at the pupils of peoples eyes if you want to know if they are telling the truth or not,if they aren't telling the truth,the pupils of their eyes will get smaller.When I was in boot camp,an Officer picked out three or four of us guys for the reason he was testing out a lie detector.He couldn't get a good reading from my fingers because my fingers have thick tough skin on them.he then put some sort of a salve or what ever it was on my fingers so as to get a better reading on that lie detector.Of course I passed with flying colors.China has had guards in the Sudan for about six years or more protecting oil rigs over there.

wow. the taliban and al qaeda, who are the remnants of the mujahadeen
we supportedin their fight against the spread of communism in the region
are now commies? hahahaha!!!...and the baathists who spent their career
torturing islamic radicals (like us!) are now islamic
terrorists...WOW!seeingeyedog...get that tinfoil hat out

and specially quoting (uncited) the ramblings of D.J. McGuire even
sinks BEYOND crazy

this is the same comic who said in the 80s the USSR would discard their
Warsaw pact borders and overrun the NATO forces in a ten day
Blitzkrieg...MAN IS HE INTUITIVE OR WHAT? AAAAAAAHAHAHAHA!!!

interesting while you drone on about syria and iran and this vast commie
conspiracy, you just as consistently conceal FACTS about alleged "allies"

http://www.strategypage.com/dls/articles/200552912350.asp

youre a sleazy weasel. you neocons swindlers are all figured out. go
fuck yourself.

Sadly, you might be right. If we stay, then, as you say, more of our troops will die. If we leave, Iraqi civil war and then major Middle East destabilization. A truly classic case of "damned if we do and damned if we don't".

Too bad Bunnypants didn't read Poppy's book about the first Gulf war that said this is *exactly* what would happen if Iraq was invaded. (however, credit where it's due-- Bunnypants *did* admit he doesn't read and gets his information by being spoon-fed by his handlers).

"I will unite this country".

Uh-huh, sure.

"Mission accomplished"

Yup, you betcha.

June 7, 1925

Tom Paine has almost no influence on present-day thinking in the United States because he is unknown to the average citizen. Perhaps I might say right here that this is a national loss and a deplorable lack of understanding concerning the man who first proposed and first wrote those impressive words, 'the United States of America.' But it is hardly strange. Paine's teachings have been debarred from schools everywhere and his views of life misrepresented until his memory is hidden in shadows, or he is looked upon as of unsound mind.

We never had a sounder intelligence in this Republic. He was the equal of Washington in making American liberty possible. Where Washington performed Paine devised and wrote. The deeds of one in the Weld were matched by the deeds of the other with his pen. Washington himself appreciated Paine at his true worth. Franklin knew him for a great patriot and clear thinker. He was a friend and confidant of Jefferson, and the two must often have debated the academic and practical phases of liberty.

I consider Paine our greatest political thinker. As we have not advanced, and perhaps never shall advance, beyond the Declaration and Constitution, so Paine has had no successors who extended his principles. Although the present generation knows little of Paine's writings, and although he has almost no influence upon contemporary thought, Americans of the future will justly appraise his work. I am certain of it. Truth is governed by natural laws and cannot be denied. Paine spoke truth with a peculiarly clear and forceful ring. Therefore time must balance the scales. The Declaration and the Constitution expressed in form Paine's theory of political rights. He worked in Philadelphia at the time that the first document was written, and occupied a position of intimate contact with the nation's leaders when they framed the Constitution.

Certainly we may believe that Washington had a considerable voice in the Constitution. We know that Jefferson had much to do with the document. Franklin also had a hand and probably was responsible in even larger measure for the Declaration. But all of these men had communed with Paine. Their views were intimately understood and closely correlated. There is no doubt whatever that the two great documents of American liberty reflect the philosophy of Paine.

We may look in other directions, where the trace is plainer, easier definitely to establish, for evidences of his influence. Paine, you know, came over to the Colonies after meeting Franklin in London. He had encountered numerous misfortunes, and Franklin gave him letters to

friends back home which resulted in his becoming editor of the Pennsylvania Magazine in January of 1775. It is highly interesting that circumstance should have brought him to America at that time and placed him in such a position. Paine had little education, in the school sense of the term, but he had read avidly and written a great deal before meeting Franklin. Once placed at the editor's desk of a new American periodical, he found time and opportunity exactly suited to his spirit and his genius.

The Pennsylvania Magazine began to bristle -- so much so that its owner, and the cooler heads of Philadelphia, were worried by Paine's writings. Looking back to those times we cannot, without much reading, clearly gauge the sentiment of the Colonies. Perhaps the larger number of responsible men still hoped for peace with England. They did not even venture to express the matter that way. Few men, indeed, had thought in terms of war.

Then Paine wrote 'Common Sense,' an anonymous tract which immediately stirred the fires of liberty. It flashed from hand to hand throughout the Colonies. One copy reached the New York Assembly, in session at Albany, and a night meeting was voted to answer this unknown writer with his clarion call to liberty. The Assembly met, but could find no suitable answer. Tom Paine had inscribed a document which never has been answered adversely, and never can be, so long as man esteems his priceless possession.

In 'Common Sense' Paine flared forth with a document so powerful that the Revolution became inevitable. Washington recognized the difference, and in his calm way said that matters never could be the same again. It must be remembered that 'Common Sense' preceded the declaration and affirmed the very principles that went into the national doctrine of liberty. But that affirmation was made with more vigor, more of the fire of the patriot and was exactly suited to the hour. It is probable that we should have had the Revolution without Tom Paine. Certainly it could not be forestalled, once he had spoken.

I have always been interested in this man. My father had a set of Tom Paine's books on the shelf at home. I must have opened the covers about the time I was 13. And I can still remember the flash of enlightenment which shone from his pages. It was a revelation, indeed, to encounter his views on political and religious matters, so different from the views of many people around us. Of course I did not understand him very well, but his sincerity and ardor made an impression upon me that nothing has ever served to lessen.

I have heard it said that Paine borrowed from Montesquieu and Rousseau. Maybe he had read them both and learned something from each. I do not know. But I doubt that Paine ever borrowed a line from any man. Perhaps he gained strength from the fact that the springs of his wisdom lay within himself, and he spoke so clearly because the man's spirit yearned to reach other spirits.

Many a person who could not comprehend Rousseau, and would be puzzled by Montesquieu, could understand Paine as an open book. He wrote with a clarity, a sharpness of outline and exactness of speech that even a schoolboy should be able to grasp. There is nothing false, little that is subtle, and an impressive lack of the negative in Paine. He literally cried to his reader for a comprehending hour, and then filled that hour with such sagacious reasoning as we find surpassed nowhere else in American letters -- seldom in any school of writing.

Paine would have been the last to look upon himself as a man of letters. Liberty was the dear companion of his heart; truth in all things his object. Yet he has left us such stirring lines as those of 'The Crisis,' where he says: 'These are the times that try men's souls.... Tyranny, like hell, is not easily conquered!' Even an unappreciative posterity knows that line, but we, perhaps, remember him best for his declaration: 'The world is my country; to do good my religion.'

Again we see the spontaneous genius at work in "The Rights of Man," and that genius busy at his favorite task -- liberty. Written hurriedly and in the heat of controversy, "The Rights of Man" yet compares favorably with classical models, and in some places rises to vaulting heights. Its appearance outmatched events attending Burke's effort in his "Reflections."

Instantly the English public caught hold of this new contribution. It was more than a defense of liberty; it was a world declaration of what Paine had declared before in the Colonies. His reasoning was so cogent, his command of the subject so broad, that his legion of enemies found it hard to answer him. "Tom Paine is quite right," said Pitt, the Prime Minister, "but if I were to encourage his views we should have a bloody revolution."

Here we see the progressive quality of Paine's genius at its best. "The Rights of Man" amplified and reasserted what already had been said in "Common Sense," with now a greater force and the power of a maturing mind. Just when Paine was at the height of his renown, an indictment for treason confronted him. About the same time he was elected a member of the Revolutionary Assembly and escaped to France.

So little did he know of the French tongue that addresses to his constituents had to be translated by an interpreter. But he sat in the assembly. Shrinking from the guillotine, he encountered Robespierre's enmity, and presently found himself in prison, facing that dread instrument.

But his imprisonment was fertile. Already he had written the first part of "The Age of Reason" and now turned his time to the latter part. Presently his second escape cheated Robespierre of vengeance, and in the course of events "The Age of Reason" appeared. Instantly it became a source of contention which still endures. Paine returned to the United States a little broken, and went to live at his home in New Rochelle -- a public gift. Many of his old companions in the struggle

for liberty avoided him, and he was publicly condemned by the unthinking.

Paine suffered then, as now he suffers not so much because of what he wrote as from the misinterpretations of others. He has been called an atheist, but atheist he was not. Paine believed in a supreme intelligence, as representing the idea which other men often express by the name of deity.

His Bible was the open face of nature, the broad skies, the green hills. He disbelieved the ancient myths and miracles taught by established creeds. But the attacks on those creeds -- or on persons devoted to them -- have served to darken his memory, casting a shadow across the closing years of his life.

When Theodore Roosevelt termed Tom Paine a dirty little atheist he surely spoke from lack of understanding. It was a stricture, an inaccurate charge of the sort that has dimmed the greatness of this eminent American. But the true measure of his stature will yet be appreciated. The torch which he handed on will not be extinguished. If Paine had ceased his writings with "The Rights of Man" he would have been hailed today as one of the two or three outstanding figures of the Revolution. But "The Age of Reason" cost him glory at the hands of his countrymen -- a greater loss to them than to Tom Paine.

I was always interested in Paine the inventor. He conceived and designed the iron bridge and the hollow candle; the principle of the modern central draught burner. The man had a sort of universal genius. He was interested in a diversity of things; but his special creed, his first thought, was liberty.

Traducers have said that he spent his last days drinking in pothouses. They have pictured him as a wicked old man coming to a sorry end. But I am persuaded that Paine must have looked with magnanimity and sorrow on the attacks of his countrymen. That those attacks have continued down to our day, with scarcely any abatement, is an indication of how strong prejudice, when once aroused, may become. It has been a custom in some quarters to hold up Paine as an example of everything bad.

The memory of Tom Paine will outlive all this. No man who helped to lay the foundations of our liberty -- who stepped forth as the champion of so difficult a cause -- can be permanently obscured by such attacks. Tom Paine should be read by his countrymen. I commend his fame to their hands.

Uh huh. And here he is, years after the fact, to contradict virtually
every person who's held office in the USA since 1996.

It's certain Zinni is a liberal because (1) he's bashing Cheney and (2)
he claims to know more about running things than everyone else.

If that's the best you have, give up now, avoid the holiday rush.

People used to think it was better to have a liberal fishwrap than no fishwrap at all; at least they could read the funnies, the sports section, etc. Now people are getting sick of the liberal rhetoric and deciding they'll get their sports on television, their funnies on the Internet and they won't be supporting the bastions of liberalism in the process.

There have been other places where buy-and-sell stuff was supposed to go
for years and years, even a newsgroup or two. The excuse the bozos use
to justify posting here and in newsgroups where it's prohibited by
charter is "no one reads those [appropriate] newsgroups".

Bush repeats threat to veto torture curb
By Brian Knowlton International Herald Tribune
THURSDAY, OCTOBER 6, 2005

WASHINGTON The White House repeated an earlier veto threat Thursday after the Senate voted by an overwhelming bipartisan margin for a measure to prevent mistreatment of prisoners held by the U.S. military.
ï¿½The 90-to-9 vote to ban "cruel, inhuman or degrading treatment or punishment" of anyone in U.S. government custody was one of the sharpest political rebukes in Washington of a system under which abuses occurred in Iraq and Afghanistan and at the Guantï¿½namo naval base in Cuba.
(snip)

November 04, 2005

The CIA's Secret Prisons
The Washington Post shook up foreign policy offices at home and around the world yesterday with a bombshell story about a "covert prison system" run by the CIA in eight countries around the world.

The system was apparently so secret that even members of Congress in charge of overseeing the CIA's covert actions didn't know about it. And they are unhappy.

Readership is down across the board. More cable news channels and online
services are taking customers away from newspapers. It's not an
anti-liberal movement at all.

Huh??? Bush chose the "Bush-bashing, card-carrying liberal" Powell to hold a very high position in his administration for four years and additionally made his son Chairman of the FCC. THAT Bush-bashing Powell?? Yeah, right. Get real!

> Everything he [Powell] has said since the start of the Iraq war confirms it.

Are we talking about the same Powell here? The one whose impassioned speech in front of the UN helped *start* the Iraq war???

Do you even remotely consider the possibility that Powell "saw the error of his ways" and was man enough to want to set the record straight?

"We sought to break the will of the American government to continue the conflict." - Vietnam General Vo Nguyen Giap

Vietnam General Vo Nguyen Giap wrote that if It weren't for organizations like Kerry's Vietnam Veterans against the war, Hanoi would have surrendered to the US.

al-Qaeda are not doing anything terribly different from what General Vo Nguyen Giap did. Like Vo Nguyen Giap before them, al-Qaeda knows that they cannot engage American forces directly as they do not have the military strength to do so. Hence, like Giap, they intend to defeat America by targeting not its military might but rather what they correctly perceive to be its critical vulnerability or soft underbelly: the American public.

The real lesson from Vietnam: don't go to war in Vietnam.

The real lesson from Iraq: a rag-tag gang of "dead enders" using weapons manufactured from equipment found underneath the average kitchen sink can wage skirmishes in the "last throes of the insurgency" and bring the world's greatest superpower to it's knees.

Simply laughable!!!

And it only cost America hundreds of billions of dollars, many thousand dead, many thousand more crippled, and America's hard-earned prestige flushed down the toilet. Be sure to tell your kids down the road when they complain about their high taxes paying off Lord Bush's Mesopotamian Adventure that he was a "War President" fighting a "War of Generations."

What a sick joke this administration is. Liars and war criminals, every one of them.

Yeah, shurrrrrr, this wasn't a war of choice, it was a "last resort" where "every option was exhausted" and America was "forced into war" by a neo-Hitler sitting atop "stockpiles" of "the most lethal weapons mankind has ever devised." Dude, "there can be no doubt."

Ergo, the real lesson from Iraq: P.T. Barnum was right.

At the very same time we are fighting a
so-called "War on Terror" about 65%
of our consumer products are
being MADE in China.

This is VERY curious seeing that Al Quada and China
are allegedly "drinking buddies" from a sociological standpoint!

In fact, try this sometime. You would be hard pressed
this xmas season to NOT find any kind of an xmas decoration
that was NOT made in China. Take a trip to the local Dollar General
or WalMart and tell me how many things you find that came from China
on the shelves. Same goes for Home Depot, Radio Shack and Target.
I must be the last guy on my block with glass xmas balls on his
tree that were made in the USA. (..they are over 40+ years old)

Want to know another one? It is also highly likely that the
motherboard (main circuit board) inside of the computer you
are using RIGHT NOW to process and read this message
came from China. The color flat screen LCD you are reading
this likely came from Korea or Japan, but you can be sure that
the rest of the guts and the plastic case came from a factory in China.

This is why I take everything I read about China with a grain of salt.
There is no way these American companies will stop using offshore
manufacturing from China. It costs more to ship the crap here than it
does to make it. Enviornmental laws in China are also non-existent.
They use chemicals there like DDT, TCE, Lead based pigments
and colorants and others which stay over there, except for when the
pollutant dusts from the THOUSANDS of factories gets into the
upper winds and is carried over to the Western USA. Everything from
Mercury Oxides to Lead Chromates to Vinyl Chloride and Bromides.

The couldn't care less in China. They are making HARD CASH and
that's the name of the game. They are also better than the Japanese

when it comes to copying our technology and ideas. I can vividly recall
at several GSA auctions seeing Chinese bidders buying up tons of
retired electronics and manufacturing equipment from the US Govt.
No doubt their highly trained scientists had the items copied inside of
six months and are now selling the stuff back to us. I had to laugh when
I read about how Lockheed Defense Systems Div. allegedly "misplaced"
seveal thousand key files for the US Navy AEGIS Guided Missile System
and how just a few years later almost perfect WORKING copies of the system
started to appear on Chinese warships, which may be used against us later
if we ever go to war over Taiwan. (..not that I could care less about
Taiwan
mind you, the only difference between Taiwan and China is about 40 Miles
of water and the way they cook their noodles - their not worth it and they
should be part of China as they do $40B in cross-border trade btwn them
on a yearly basis already so their joined-at-the-hip economically already)

So folks, readers, lurkers. Don't worry about China or alleged Al Queda
linkages. China is going noplace. In fact in 5 Years just about everything
you will buy will come from there or India who is the next big economic
powerhouse. Learn how to profit from it instead of crying about it and you
will make good. (why do your think that 8 or the 10 major importers and
wholesale brokers of Chinese goods are run by jews.......get the picture?)

Interesting how a decorated Marine war hero from Vietnam can suddenly become
a simple minded dummycrat when he disagrees with your world view.

2958. Re: Instructions for Kiwa MAP to Kenwood R5000?

Newsgroup: rec.radio.shortwave
Date: 2005-11-19 05:57:24 UTC
From: Guy Atkins <dxnospam@guyatkins.com>
Message-ID: <VI-dnaD8VcFbI-PenZ2dnUVZ_sqdnZ2d@comcast.com>
Source record: 49808

Hi Walt,

My MAP's instructions include information for the R-1000 and R-2000, but not the R-5000. Doesn't the R-5000 have 450 kHz I.F. filtering? If so, 450 kHz is an I.F. that will not work with the MAP...it's designed for the more common 455 kHz I.F. path.

Hmm... I just checked on this, and Radio Nederland's review of the R-5000 states:

"Intermediate frequency
Like most receivers in this class, the R-5000 is a double superheterodyne design. The first intermediate frequency for the R-5000 has been chosen as 58112.5 kHz, the second is 8830 kHz. IF Rejection of these two frequencies is better than 84 and 65 dB respectively which is good. The image ratio was measured as better than 90 dB, also good. Only when FM is used does a third stage at 455 kHz become active. This design is common to other Kenwood products."

So, the answer is unfortunately, no. The R-5000 will not interface to the Kiwa MAP.

Thats exactly right Greg, but people like clifto have their fingers in their
ears while they screech la-la-la-la-la-la
Just like the klintonista's did a few years ago.
I hope all of them die horribly violent deaths, after watching their family
being tortured by DC tyrannists.

For One and All,

US Representative John Murtha was a Vietnam War Hero.
MURTHA => http://www.house.gov/murtha/

However, That War Is Over - But The War-on-Terror Continues . . .

Congressman John Murtha, again did a Service for his Country this Week
by finally getting the Republican Leaders and Members of the US House
of Representatives to Stand-Up and Be Counted in Supporting Our Troops
and Defending The United States of America.

Will the Democrats Answer the Call and Be Counted Too ?
Maybe the Democrats will Again Turn Thumbs Down On Our Troops !
Or, Will The Democrats As A Party - Sit Silently In Their Seats . . .
and simply Abstain.

God's Blessing Be With Our Troops - amen, Amen and AMEN !

May God's Peace and Comfort be with the Family, Friends and
Loved Ones of All Those Who have Died in this War-on-Terror
- amen, Amen and AMEN !

God Bless America - amen, Amen and AMEN ! ~ RHF

True enough. Ruby Ridge and Waco were definitely criminal doings that
happened on Clinton's watch.

However, for good or bad, it WAS Dubya that said "If this were a
dictatorship, it'd be a heck of a lot easier, just so long as I'm the
dictator."

Lesson from Vietnam?
The only possible (unlearned) lesson is the continuation of a "war" than cannot be won, the mis-guided expenditure of manpower and resources while there are problems at home that are being neglected, and the arrogance of a national leader who puts his own importance ahead of what is best for those he claims to lead.
The only parallel between the war in Viet Nam and what is going on in Iraq is that a bad idea gone worse is still being pursued by an administration that cannot admit to being wrong.

Source record: 49948

I've had a 2010 for a few years and find it not very good for UTES. The
tuning isn't >sharp> enough to zeroin on a signal tp decode.
A;most any good wuality tabletop receiver (Sat800, R75 etc.) will
decode without a problem.
Try to get a receiver with afew bandwiths and small tuning steps.
BTW most UTES are USB.

Charlie

2998. Multi-Band Shortwave Listener (SWL) Antennas : Windom - Dipole - Random Wire

Newsgroup: rec.radio.shortwave
Date: 2005-11-19 09:10:09 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1132391409.070663.108950@g44g2000cwa.googlegroups.com>

For One and All,

Multi-Band Shortwave Listener (SWL) Antennas : Windom - Dipole - Random
Wire
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6595

* Multi-Element Windom Wire
- - - Four Fanned 1/4 WL Wire Antenna Elements

* Multi-Element Random Wire
- - - Three Fanned Wire Antenna Elements : 100% + 62% + 38%

* Multi-Element Dipole Wire
- - - Two Fanned 1/2 WL Dipole Wire Antenna Elements

MY CHOICE - Eight Bands On One Coax - The Windom Antenna
Four (4) Wire Antenna Element Off-Center-Fed Windom Antenna.
READ => http://kh2d.net/windom.cfm
IMAGE => http://kh2d.net/images/windom.jpg
- by Jim Kehler [KH2D] http://kh2d.net/

MODIFIED -For the Shortwave (SW) Meter Bands :
49M + 41M + 31M + 25M + 22M + 19M
[63 Feet Long : Tip-to-Tip]

TOP - Horizontal {Flat} Windom Antenna (Two Wire Elements)
49 Meters - 31 Meters - Tip-to-Tip
38.7 Feet - 24.2 Feet - 62.9 Feet = 41 Meter
62% - - - - 38% - - - - 100%

BOTTOM - Inverted "V" {Angled Windom Antenna (Two Wire Elements)
25 Meters - 19 Meters - Tip-to-Tip - Tips Angled 30* Down
19.7 Feet - 15.1 Feet - 34.8 Feet = 22 Meter
57% - - - - 43% - - - - 100%

RIGGING - Center Mounting Height of 24.2 to 34.8 Feet
Also - This Windom Antenna can be Rigged from the Tips of
the Top Two Elements; with the Center Lower without a
Center-Support-Point. Having a Center "Drop" of about
10 to 15 Degrees; with the Bottom Windom Element Tips
"Dropped" about 10 to 15 Degrees. - TIP - Use a Heavier
Wire (12-14 AWG) for the Top Windom Antenna Elements.

= = = "swler73s" <swler73s@y...> wrote:

Years ago I made a multiband SW antenna.

I believe it consisted of 6 300 ohm wires in a dipole.

I got fantastic reception with the antenna.

Unfortunately, both the antenna and plans are long gone.

Anyone have construction details on a multiband dipole for SW?

One covering all the SW bands? I believe Monitoring Times
had plans for a SW multiband antenna a few years ago.

Just my luck...
this was before I began subscribing to the magazine.

Thanks and 73.

I need go no further than our local US Army PX. Very little in there that's made in the US. In the electronics section, everything is made in China, Korea, or Japan, in that order. The toy section.. all China. Clothing section.. China, India, Pakistan. Glassware.. China, Korea, Philippines, and some US stuff like Pyrex. Electrical and automotive, mostly China, except the oil products, and very few tools (even the Craftsman stuff is made in China).

Very little of consequence is made in the US anymore.

That's what happens when you work at a post in the far east. In the
middle east, you can buy a Harley at the BX. Of course, they may be
made in China now.

3005. No CounterPoise - Portable Antenna System

Newsgroup: rec.radio.shortwave
Date: 2005-11-19 11:43:49 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1132400629.452295.18490@g43g2000cwa.googlegroups.com>
Source record: 49955

For One and All,

Check-Out this simple Antenna Design.

No CounterPoise - Portable Antenna System for QRP and QRO
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6596

Note - This is a "CLOSED/COMPLETED" eBay Auction
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5828919956

IMAGE => http://www.bellimelgroup.com/images/Antenn1.jpg

eHam "Reviews" for No CounterPoise Protable Antenna System
NCPAS => http://www.eham.net/reviews/detail/4762

TECHNICALS :
This No CounterPoise - Portable Antenna Antenna Aystem is
50 feet long and consists of a 25 foot long matching section
and an intregral 25 foot long radiator. The matching section
connects to your tuner or rig with internal tuner using high
quality, color-coded, gold-plated connectors. The Manual
provides complete details on how to use this Antenna.

NOTE - At 50 Feet this End-Fed Half-Wave Dipole Antenna
should be roughly Resonant at 9.35 MHz @ 31 Meter Band.

The Wire Antenna Element 'appears' to be Landscaping Cable
(Heavy Duty Zip Cord) that has Half of One Insulated Wire
Removed and the other Parallel Wire Full Length. Basically
like an End-Fed Dipole or "Zepp" Antenna.

FWIW - This type of "Zepp" Antenna is as old as Radio and is
best known as the "Zepp" Antenna named after the Zeppelin
Airships it was commonly used on.
http://webpages.charter.net/aa5tb/efha.html

What is a Zepp {Zeppelin} Antenna ?
http://www.eham.net/forums/Elmers/80122
The Zepp Antenna first saw daylight on the Graf Zeppelin
on it's round the world flight back in the late 1920's.

PAR Electronics End-Fedz Antenna
http://www.parelectronics.com/end_fedz.htm
http://www.universal-radio.com/catalog/hamwire/4456.html

PAR Electronics EF-SWL Antenna
http://www.grove-ent.com/ANT8.html
http://www.parelectronics.com/swl_end.htm

http://www.universal-radio.com/catalog/sw_ant/2205.html

NOTE - These Antennas are a full length half wave dipoles,
but with an important difference. The coax connector is
at one end of the dipole, where it is most needed. These
Antennas can be mounted Horizontally, Vertically, Sloper
or as an Inverted "L Antenna (My Choice). No Ground Plane
or Counterpoise is needed. Portable operation could not
be easier. Simply hang the far end from a tree limb --
the coax is at the bottom. Hang it up in a hotel window
or string it up in the attic. End insulators are supplied
making suspension easy.

Can order in a Harley at AAFES New Car Sales here, too. Can buy an
"American" car, as well... but every car I've seen on the lot was
manufactured in Canada or Mexico.

I don't believe anyone has said anything about Murtha ever putting himself
in for medals.. plus he was in for something like 27 years?? Definitely not

a Kerry. Also notable is that he's been a hawk up to this point, one of the most pro-Pentagon in Congress.

What's funny is how his consistent use of only a handful of insults seems to get so many folks in this newsgroup riled up like a swarm of angry hornets.

I believe the guy truly is laughing his ass off in observing the extreme reactions which are elicited by a "tard boy" here and a "continue to tote" there.

Hats off to ya, DxAce.

Yes, I would think the 100 hz tuning would be less than ideal for this.
Probably my only complaint with the 2010...it should have had a fine
tuning adjustment or at least smaller tuning increments.

>>destabilization.

> So what?

Well, with destabilization of the Middle East, several bad things could
happen...probably one extreme being nuclear war, which many might bother
some folks (excluding the Armageddon/Rapture crowd, of course). At the
very minimum, it would probably disrupt the supply of oil waaaay more
than Katrina did--and make $5/gallon gas look positively cheap.

>>A truly classic case of "damned if we do and damned if

>>we don't".

> How are *we* damned if the troops leave Iraq?

See "destabilization" above...

...and I presume "we" are a consumer of gasoline or that "we" might not
want that pesky fallout landing on our roof or our crops.

> The real lesson from Vietnam: don't go to war in Vietnam.

How true...even Robert McNamara, the *architect* of the Vietnam war
recently had this to say when reflecting on that war:

"None of our allies supported us, not Japan, not Germany, not Britain or
France. If we can't persuade nations with comparable values of the merit
of our own cause, we better re-examine our reasoning".

Gee, other than "lap dog" Tony Blair, it sounds applicable today.

> Very little of consequence is made in the US anymore.

Lots of money being made in the arms industry. I'm surprised there
hasn't been a 'Land mines for Peace' campaign started by the providers
of death machinery.

==========
God's One and Only People make lots of cash

Israel is one of the world's top five arms exporters, accounting for 10%
of the global arms trade.

http://tinyurl.com/95g3o
==========

==========
The main exporters were USA ($10.4 billion Within Europe, Russia ($3.1
billion/ï¿½1.9 billion), France ($1.7 billion/ï¿½1.1 billion), Germany ($1.3
billion/ï¿½0.8 billion), and UK ($1.1 billion/ï¿½0.7 billion) were the main
exporters in 1999.

http://www.tiscali.co.uk/reference/encyclopaedia/hutchinson/m0031861.html

There are a lot of illegal exports, too. Greed knows no limits.:

http://snipurl.com/k1wi

I guess it's hard to justify an invasion of a country if you don't sell
them the arms before doing an about face and attacking them.

Cut & run...? You are very good at repeating Bush talking points. Teacher, give the kid a gold star!! It's an exit strategy, and Americans are way ahead of their politicians, they want the boys home.

Precisely!!

Quote:

"Hannum brought a lawsuit against Barnum for calling his giant a fake. When it came to trial, Hull stepped forward and confessed that the Cardiff Giant was a hoax and the entire story. The judge ruled that Barnum could not be sued for calling Hannum's giant a fake since it was a fake after all."

Translate:

"The War Party attacked Pat Buchanan for calling Bush's war rationale a pack of lies. When it came to the trial of public opinion, White House staffer after Pentagon official after CIA agent stepped forward and admitted that marketing the Iraq War was deliberate disinformation, distortions, lies and a hoax. The American people ruled that Buchanan and other peace activists could not be villified for calling Bush's war a hoax since it was proven to be a hoax after all."

Most of us remember about what happened on Hainan Island,China,and bush apologized to the Chicoms (that Airplane was in International airspace over International waters,check with the U.S.Navy if y'all don't believe me or look it up online) for America (I am an American,born in Carthage,Mississippi on November 5,1941) but his apology to them certainly wasen't for me!,I guarantee y'all that,and bush sent them about $18,000 of OUR money! Those guys in that U.S.Recon Airplane could have ditched the Airplane in the water or they could have opened the valve on an oxygen tank and tossed a cigarette lighter in there as they were coming out the door of that Airplane,that Airplane would have been toast!,but oh noooo,they got orders to land that Airplane on Hainan Island so that the Chicoms could just help themselves to whatever secrets that was in and on that Airplane.I wonder how many secrets the bush administration allowed the Chicoms to steal from that U.S.Recon Airplane? I wonder how much money bush and cheney got from that crooked deal? I have told y'all before bush is no better than klintoon and in some ways he is even worse! Harley Davidson and Chevrolet had factories in China in the 1940's.Malcom Bricklin is working on a deal to import Chinese made vehicles to America by this time next year or early 2007.Those made in China vehicles will be priced about 30 percent less than comparable made in U.S.A.vehicles and some of them other made in China vehicles will be priced at about forty percent less than some other models of comparable made in U.S.A.vehicles.There is a new auto frame factory that is going to be built here in Mississippi and there is talk there might soon be a Kia factory here in Mississippi,there already is a Nissan factory near Jackson.Just watch the people all over America buying those new made in China vehicles at thirty to forty percent less prices than other made in America vehicles.Someday we will be seeing the end of automobiles being manufactured in U.S.A.Some of y'all think bush has the best interest for America in mind,,, Nothing could be further from the Truth!

The American puiblic is ahead of the Repugs, they know a liar when they see
and hear one, and there ain't no turning that around.

When Johnny comes marching home again,
Hurrah! Hurrah!
We'll give him a hearty welcome then,
Hurrah! Hurrah!
The men will cheer, the boys will shout,
The ladies they will all turn out,
And we'll all feel gay
When Johnny comes marching home.

The old church bells will peal with joy,
Hurrah! Hurrah!
To welcome home our darling boy,
Hurrah! Hurrah!
The village lads and lassies say
With roses they will strew the way,
And we'll all feel gay
When Johnny comes marching home.

Get ready for the Jubilee,
Hurrah! Hurrah!
We'll give the hero three times three,
Hurrah! Hurrah!
The laurel wreath is ready now
To place upon his loyal brow,
And we'll all feel gay
When Johnny comes marching home.

Let love and friendship on that day,
Hurrah! Hurrah!
Their choicest treasures then display,
Hurrah! Hurrah!
And let each one perform some part
To fill with joy the warrior's heart,
And we'll all feel gay
When Johnny comes marching home.

Johnny, I hardly knew ye

While goin' the road to sweet Athy, hurroo, hurroo
While goin' the road to sweet Athy, hurroo, hurroo
While goin' the road to sweet Athy,
A stick in me hand and a drop in me eye,
A doleful damsel I heard cry,
Johnny I hardly knew ye.

Chorus:
With your drums and guns and guns and drums, hurroo,hurroo
With your drums and guns and guns and drums, hurroo,hurroo
With your drums and guns and guns and drums,
The enemy nearly slew ye
Oh my darling dear, Ye look so queer
Johnny I hardly knew ye.

Where are your eyes that were so mild, hurroo, hurroo
Where are your eyes that were so mild, hurroo, hurroo
Where are your eyes that were so mild,
When my heart you so beguiled
Why did ye run from me and the child
Oh Johnny, I hardly knew ye

Chorus

Where are your legs that used to run, hurroo, hurroo
Where are your legs that used to run, hurroo, hurroo
Where are your legs that used to run,
When you went for to carry a gun
Indeed your dancing days are done
Oh Johnny, I hardly knew ye

Chorus

I'm happy for to see ye home, hurroo, hurroo
I'm happy for to see ye home, hurroo, hurroo
I'm happy for to see ye home,
All from the island of Sulloon;
So low in flesh, so high in bone
Oh Johnny I hardly knew ye

Chorus

Ye haven't an arm, ye haven't a leg, hurroo, hurroo
Ye haven't an arm, ye haven't a leg, hurroo, hurroo
Ye haven't an arm, ye haven't a leg,

Ye're an armless, boneless, chickenless egg
Ye'll have to put with a bowl out to beg
Oh Johnny I hardly knew ye

Chorus

They're rolling out the guns again, hurroo, hurroo
They're rolling out the guns again, hurroo, hurroo
They're rolling out the guns again,
But they never will take our sons again
No they never will take our sons again
Johnny I'm swearing to ye

When 82% of Iraqis want Americans out of their nation, and 45% of them
believe attacks against Americans are justified, it puts a small crimp into
the "we'll be greeted as liberators" narrative.

What did they vote on -- A declaration if victory??

Were the Iraqi minutemen paying attention? Are they sufficiently scared by congressional votes to stop making IEDs and blowing American arms and heads off? Just curious, you really seem to have your finger on the pulse of these guys.

And say, any guesses how the Congress would vote if a resolution was brought forward asking them to endorse a bill that stated: "The President's War is going awesome!!" Andy guesses how unanimous that vote would go?

BIG-TIME LMAO!!!!!!!!

How about something from a website that is based on something other
than BS?

(Hint: compare the NIOSH safety information for DU and note those
pictures do not match the known human health effects of DU.)

Well, I guess that there are fools everywhere who are fooled by
politically-motivated BS and a picture.

We were greeted as liberators, and the follow up poster is right.
They don't want us out now, they want us out eventually, after the
country has stabilized. My guess, with the amazing success we have
had is that will be within a year. Zarqawi is down to about 1500-2000
terrorists, diminishing daily.

Oh, I would most certainly have paid attention to a resolution on that. Even a couple years after "Mission Accomplished," a few dead-enders with the Anarchist's Cookbook have brought the might & power of Empire America to her knees, so that resolution would have been laughable and summarily dismissed.

Have a great weekend!!

Rep Jean Schmidt (R, Ohio) really stoop up and was counted, eh RHF? She stood up again and apologized, and begged that her comments be removed from the written record. What a fucking embarrassing day for the House of Representatives. The stupid Republicans think that their cynical sham resolution, which they voted down, will somehow be attributed to Rep John Murtha. They think the American public is that stupid!

As a Republican, you must be really ashamed, RHF. As a supposed man of faith (which you endlessly proclaim, ad nauseam), you must be really conflicted over this whole taudry situation.

Lord help this country.

You needn't get mad. You can always stick your fingers in your ears, click your heels, repeat "there's no place like home" a couple thousand times, and pretend that a few dead-enders aren't having any effect. But at the end of the day, the population at Arlington Cemetary and Walter Reed Hospital escalates, and there's no hope in sight. Believe it kids, trhism is going into the history books: Amerioca's biggest debacle ever. A few dead-enders have brought the might & power of the American Empire to their knees. And I'm guessing that they're doing it with 1/10000000000000000000000000000000000000000000000000th of the military budget.

Yes, it is an "amazing success" that the might of the American military and
200+ billion dollars cannot defeat a couple of dead-enders in the last
throes of an insurgency two years after "Mission Accomplished."

Even my cat and dog are laughing their asses off!!

Thanks for the humor, have a nice day!!!

I noticed that last year too. That Eton continues to be the shortwave
radio advertiser in PWBR says a lot about how this hobby has shrunk.
It also makes me wonder how they can give an independent opinion about
Eton products given that most of their ad revenue comes from Eton.

The first paragraph of a recent column by Richard Cohen summarizes
George B.'s problems very well:

"In one of the most intellectually incoherent major speeches ever
delivered by a minor president, George W. Bush blamed "some Democrats
and antiwar critics" last week for changing their minds about the war
in Iraq and now saying they were deceived. "It is deeply irresponsible
to rewrite the history of how that war began," the president said. Yes,
sir, but it is even more deeply irresponsible to rewrite the history of
how history was rewritten in the first place.

It is the failure to acknowledge this -- not merely that mistakes were
made -- that is so troubling about Bush and others in his
administration......"

Every frontline Insurgent has a support infrastructure of 75 to 100
people. Then there are the foreign Jihadists hired by the
Baathists...

As far as I can tell, the Iranians want us to stay as do the Kurds, as
they both have something we can help them protect (i.e. the oil
fields). The people in the middle want us gone yesterday.

What's with Chalabi being toasted in Washington? He is an
international fugitive and a double agent.

That's 37 years, and 30 years in Congress...

Congressman Murtha is so well-respected for his first-hand knowledge of military and defense issues that he has been a trusted adviser to presidents of both parties on military and defense issues and is one of the most effective advocates for the national defense in the country. He is ranking member and former chairman of the Defense Appropriations Subcommittee, a Vietnam combat veteran and a retired Marine Corps colonel with 37 years of service, a rare combination of experience that enables him to understand defense and military operations from every perspective.

He learned about military service from the bottom up, beginning as a raw recruit when he left Washington and Jefferson College in 1952 to join the Marines out of a growing sense of obligation to his country during the Korean War. There he earned the American Spirit Honor Medal, awarded to fewer than one in 10,000 recruits. He rose through the ranks to become a drill instructor at Parris Island and was selected for Officer Candidate School at Quantico, Virginia. He then was assigned to the Second Marine Division, Camp Lejeune, North Carolina. In 1959, Captain Murtha took command of the 34th Special Infantry Company, Marine Corps Reserves, in Johnstown. He remained in the Reserves after his discharge from active duty until he volunteered for Vietnam in 1966-67, receiving the Bronze Star with Combat "V", two Purple Hearts and the Vietnamese Cross of Gallantry. He remained in the Reserves until his retirement. This first-hand knowledge of military and defense issues has made him a trusted adviser to presidents of both parties and one of the most effective advocates for the national defense in Washington. At the request of Presidents and Speakers of the House, he served as chairman of delegations monitoring elections in the Philippines, El Salvador, Panama and Bosnia.

He was awarded the Navy Distinguished Service Medal by the Marine Corps Commandant when he retired from the Marines.

Hey Brian,

I don't get mad at these guys. I never was. I think the whole thing is
funny sometimes. I did go ahead and toss em in my kill filter because
I get tired of reading and replying to their OT posts. I gave them two
or three chances but they never learn. Anyway, in there for good this
time. I do get a hoot out of Ace's response to them sometimes.

Hey Drakeman, the vote was on a sham resolution by the Republicans to "cut
and run" in a cynical and sophomoric attempt to discredit Murtha's
resolution which was not to cut and run, but to begin withdrawal "as soon as
is practicable". The Republican lap dogs were hoping the nuance would be
lost on the short-attention-span, bumper-sticker-mentality sheeple.
Apparently they were correct.

Now hit that "tard boy" reply function key and go back to whatever you were doing.

And have a nice day :).

Your pal,

Greg

Rep Murtha made a bold and courageous move. The Republicans responded
predictably, embarrassingly so. It's not over. But don't trouble yourself
over the facts Drakeman. As you commander-in-chief might say, "Thinking
about this is hard work!"

Cuhulin's statement is remarkably inaccurate. There were no North
Vietnamese delegates in the United Nations. And the U.S. government
did not report to the United Nations, ever, on where the United States
was going to be bombing in Vietnam.

I got a better idea. Forget about the "OT" in the subject line the keep
the off topic stuff to a minimum instead. You are just encouraging
Trolling by legitimizing bad behavior.

3130. Re: The Lesson from Vietnam

Newsgroup: rec.radio.shortwave
Date: 2005-11-19 18:34:38 UTC
From: Ed Moise <eemoise@clemson.edu>
Message-ID: <1132425277.998664.28860@g49g2000cwa.googlegroups.com>
Source record: 50031

SeeingEyeDog wrote "Vietnam General Vo Nguyen Giap wrote that if It weren't for organizations like Kerry's Vietnam Veterans against the war, Hanoi would have surrendered to the US." This is an urban legend, widely circulated on the internet but quite unfouded. Giap has never written anything about Hanoi surrendering to the United States. (There are a lot of rumors about such a statement having appeared in Giap's 1985 memoir. Giap did not write any 1985 memoir.)

SeeingEyeDog's next paragraph, stating that General Giap knew that he could not engage American forces directly as he did not have the military strength to do so, is much more spectacularly false. General Giap did engage American forces directly, on a very large scale. If he hadn't, the United States would not have had more than 47,000 U.S. military personnel killed by hostile action in the Vietnam War.

Ed Moise

I AM his dad.

''CHAPTER IV - OF THE BASES OF CHRISTIANITY.
IT is upon this plain narrative of facts, together with another case I
am going to mention, that the Christian mythologists, calling
themselves the Christian Church, have erected their fable, which for
absurdity and extravagance is not exceeded by anything that is to be
found in the mythology of the ancients.

The ancient mythologists tell us that the race of Giants made war
against Jupiter, and that one of them threw a hundred rocks against
him at one throw; that Jupiter defeated him with thunder, and confined
him afterwards under Mount Etna; and that every time the Giant turns
himself, Mount Etna belches fire. It is here easy to see that the
circumstance of the mountain, that of its being a volcano, suggested
the idea of the fable; and that the fable is made to fit and wind

itself up with that circumstance.

The Christian mythologists tell that their Satan made war against the Almighty, who defeated him, and confined him afterwards, not under a mountain, but in a pit. It is here easy to see that the first fable suggested the idea of the second; for the fable of Jupiter and the Giants was told many hundred years before that of Satan.

Thus far the ancient and the Christian mythologists differ very little from each other. But the latter have contrived to carry the matter much farther. They have contrived to connect the fabulous part of the story of Jesus Christ with the fable originating from Mount Etna; and, in order to make all the parts of the story tie together, they have taken to their aid the traditions of the Jews; for the Christian mythology is made up partly from the ancient mythology, and partly from the Jewish traditions.

The Christian mythologists, after having confined Satan in a pit, were obliged to let him out again to bring on the sequel of the fable. He is then introduced into the garden of Eden in the shape of a snake, or a serpent, and in that shape he enters into familiar conversation with Eve, who is no ways surprised to hear a snake talk; and the issue of this tete-a-tate is, that he persuades her to eat an apple, and the eating of that apple damns all mankind.

After giving Satan this triumph over the whole creation, one would have supposed that the church mythologists would have been kind enough to send him back again to the pit, or, if they had not done this, that they would have put a mountain upon him, (for they say that their faith can remove a mountain) or have put him under a mountain, as the former mythologists had done, to prevent his getting again among the women, and doing more mischief. But instead of this, they leave him at large, without even obliging him to give his parole. The secret of which is, that they could not do without him; and after being at the trouble of making him, they bribed him to stay. They promised him ALL the Jews, ALL the Turks by anticipation, nine-tenths of the world beside, and Mahomet into the bargain. After this, who can doubt the bountifulness of the Christian Mythology?

Having thus made an insurrection and a battle in heaven, in which none of the combatants could be either killed or wounded --put Satan into the pit--let him out again--given him a triumph over the whole creation--damned all mankind by the eating of an apple, there Christian mythologists bring the two ends of their fable together. They represent this virtuous and amiable man, Jesus Christ, to be at once both God and man, and also the Son of God, celestially begotten, on purpose to be sacrificed, because they say that Eve in her longing [NOTE: The French work has: "yielding to an unrestrained appetite.--Editor.] had eaten an apple.''
-Tom Paine

Funny how Saddam's kid was only bettered in the "Lie and Kill Department" by
George H. W. Bush's cocaine-snorting son.

CNN Reports:

"The top U.S. commander in Iraq has submitted a plan to the Pentagon for withdrawing troops in Iraq, according to a senior defense official.

"Gen. George Casey submitted the plan to Secretary of Defense Donald Rumsfeld. It includes numerous options and recommends that brigades -- usually made up of about 2,000 soldiers each -- begin pulling out of Iraq early next year."

http://www.cnn.com/2005/WORLD/meast/11/18/iraq.plan/index.html

Arrest that man! He's is cutting and running! Emboldening the terrorists!

Murtha never advocated an immediate withdrawl, tard-boy. Please try to pay attention.

Facts man, facts. Here's what Murtha ACTUALLY proposed (pay attention children...):

"Therefore be it

I) Resolved by the Senate and House of Representatives of the United States of America in

2) Congress assembled,

3) That:

4) Section 1. The deployment of United States forces in Iraq, by direction of Congress, is

5) hereby terminated and the forces involved are to be redeployed at the earliest practicable

6) date.

7) Section 2. A quick-reaction U.S. force and an over-the-horizon presence of U.S Marines

8) shall be deployed in the region.

9) Section 3 The United States of America shall pursue security and stability in Iraq

10) through diplomacy."

Read that: "EARLIEST PRACTICABLE DATE." Not "immediate withdrawal." And yet here we have the senior General wanting a redeployment as early as two months. Must suck to be so wrong -- time and again!! LMAO. Again, why does Gen. George Casey hate America?? Why does Gen. george Casey want to cut and run and give aide to the terrorists?? ROTFLMAO!!!!!!!!!!!!!

My Information is VERY ACCURATE.Our guys in that u.n.building in New York City did pass some papers across the table to North Vietnam delegates as to where our U.S.guys would be Bombing in North Vietnam.There were a lot of very good Targets in North Vietnam that were off limits to Bombing by our guys.In North Vietnam,the Vietcong cut/dug some holes/little caves in the hills in North Vietnam,that acted as sound amplifiers,they knew when our Aircraft/Bombers were coming long before they got there and they knew which Targets were off limits to being Bombed by our guys.

Interesting how a simple-minded maroon such as your 'tard boy self can accuse
someone of insurance fraud.

LMAO at the stem.

Is Circuit City selling them in the opened boxes? There is a Circuit City store on County Line Road wayyyyy up North in North Jackson about 13 miles North of me.Next time I get over that way (which is almost never nowdays) I will stop off and take a look.Too much money for me to spend on that radio though.

3176. Drake R8B VFO adjustment

Newsgroup: rec.radio.shortwave
Date: 2005-11-19 19:56:24 UTC
From: Telamon <telamon_spamshield@pacbell.net.is.invalid>
Message-ID: <telamon_spamshield-6B53D2.11562319112005@newsclstr02.news.prodigy.com>
Source record: 50176

The VFO is a little off and I would like to touch it up.

In CW mode and the 2.4 filter and receiving WWV it is easy to tell that:
5 MHz is spot on
10 MHz is 20 Hz low
15 MHz is 30 Hz low

I haven't been getting the 20 MHz transmission very well so I was
thinking of centering the adjustment on either 10 MHz or 15 MHz.

The synthesizer board is on the bottom of the unit and I don't know what
to adjust. On the bottom board there is a tube type crystal with a cap
trimmer next to it behind the volume control as one possibility and one
of the large metal covered cans has a hole in it for a coil adjustment
in the middle of the side of the bottom board behind the tone control as
another likely place to adjust the main VFO oscillator. The rest are
individual coils that can be adjusted.

If you can clearly indicate which of the many coils or the one cap
trimmer to adjust I would appreciate it.

President only doesn't count. Too many of those years, a Democratic
Congress stifled every move the president wanted to make.

It's ludicrous that we, of all people, should be the self-appointed
experts on ''democracy''. Perhaps if we practiced ''democracy''
ourselves we'd be taken more seriously when we tell other people how
to run their countries.

Probably 88% of the people most pollsters try to get political answers
from are liberals, the other 12% are surprises to the pollsters. For
example, you'll find countless political polls in downtown Chicago,
but you'll seldom if ever find one in the suburbs, not even the more
liberal ones like Oak Park and Evanston.

>> If that's the best you have, give up now, avoid the holiday rush.

Here is the adjustment point:
http://www.bluegrassdavinci.com/gallery/jerryjohnston/DrakeR8BVFOAdjust

Let the radio warm up for a few hours to get thermally stable, and then flip upside down, remove the cover and make your adjustment. I generally adjust for WWV at 10 MHz. You may need a small flashlight to shine into the adjustment hole to make it easier.

I don't have the service information and the circuit board is not
labeled on the component side facing the bottom of the cabinet so can
you indicate, which one of the possible 13 coil adjustments is "L56."

Putting underwear on prisoners' heads was listed as one of the tortures
inflicted on the Iraqis during the earliest accusations.

Look at the "tortures" poor Pfc. England is going to spend years in prison
for inflicting; putting leashes on people, pointing at them while they're
naked.

"OR DEGRADING TREATMENT"??? What, like having to eat ordinary dinners
or spend their time in unfurnished, small cells? Only the Senate would
give a 90-9 vote for something like that.

The wording also specifically prohibits punishment of any prisoner for
any reason. Only true scum would allow such weasel wording to become
law.

> The system was apparently so secret that even members of Congress in charge

First, it was meant as humor. Second, tell yourself you've never ever said
the same thing to yourself.

You'll have to be a LOT more specific than a pointer to a hippie commune.
The first two articles I looked through had zero evidence of any such
thing, only stating that fine particles of uranium in the environment
are hazardous without showing that any fine particles are actually put
in the environment from DU ammunition use.

> Doesn't fit his actions as well as my explanation.

Well, if you say so...but I guess we will have to agree to disagree. I
just have too much trouble accepting your explanation that dubya would
give the highest (or one of the highest) appointed posts in the land to
"a flaming, Bush-bashing, card-carrying liberal" for four years. Now,
you *could* make the case that after a few years, Powell changed his
tune, going from a Bush loyalist (loyal enough to get the job) to being
a "Bush-basher".

You can say many things about Powell, but not that he is dumb. So, even
if the (unlikely) scenario I described above of Powell changing his
spots is true, then you *have* to ask WHY he changed from a loyalist to
a basher. Did he just finally get sick of the lies and corruption???

I *believe* r.r.s charter allows ads for radio stuff. (I know one of the
newsgroups I used to frequent does, I believe it's this one.) That
doesn't mean I think it's appropriate or want to see it, but I don't
usually complain either because I believe it's within charter. I'd
personally look elsewhere, such as rec.radio.swap, if I were buying.

Leland and Dougs identities are public
information and always have been Yet I have a need to hide.

I'm just as excited about it today as I was when I got my ticket
in 1994. There is SO MUCH to do in ham radio there is no way one could
get bored with it IMHO.

I don't much like the Act myself. Nor do I like the various things that
are giving the FBI instant no-warrant-needed wiretap access to phones.
What I fear most about the Patriot Act is its use in leftist hands.

However, your comparison is invalid. You can't point to a single real
abuse of the Patriot Act, but I could name the people who lost their
lives at Ruby Ridge and Waco.

The most money is made programming material people want to listen to.
That's conservative talk and information.

DIFFERENT ORDER AND DIFFERENT RESULTS

Why do we send a kid to college and spend $30,000 (plus or minus) per year for four (plus or minus) years? Is there a difference whether we do it right after high school or after a stint in the "real world" such as the military, etc? Lots of kids come out of college (attended directly following high school) and cannot find a "good" job because they have no real and immediately marketable skills. Another kid, who learns a trade such as carpentry, on the other hand, can always find a "good" job which cannot be done "over the phone" by a competitor in India. These are tough choices and expensive ones at that.

Kids learn moral habits in their childhood, personal habits during their teens, and professional habits in their early 20s. Because of this, there will be big differences among kids who do college right after high school and those, for example, who do college after an enlisted stint in the military. You can combine both effects by doing much the same together, such as at West Point or Annapolis. Our magnificent U.S. World War II effort was run by Franklin Roosevelt (high school directly followed by college) and Dwight Eisenhower (a West Point graduate), and not by skilled carpenters or enlisted men

who later went to college. It does make a big difference on how you organize and the order of someone's education.

Another issue is grades. Many kids focus on grades at the expense of education, and others focus on education at the expense of grades. I once interviewed a kid at a top mid west university and asked him, as I the did all the other kids, what was his (or her) greatest defeat in life? He said "Well I got a B on a paper rather than an A; I thought I knew what the professor wanted, but I guess I didn't." Compare that with me. I would have said "Look at this, I got a B instead of an A; the professor is a 'moron'!"

The kids always argue that they need grades to get into professional school (they do), and I argue that you need a good education to get through a professional life. They counter with "Well if you don't get into medical school or law school or engineering school, you will never get to be that type of professional, for example, at all. Yes, this is obviously true. And the debate goes around and around.

One thing I have found about the engineering profession in particular and all professions in general: You are either an engineer or you are not. We rarely, no never, look at where that professional trait was acquired or what his or her grades were. Then, you are either a good engineer or not. You are either a good doctor or not. You are either a good dentist or not. You are either a good lawyer or not. You are either a good officer or not. You are either a good teacher or not. Etc. I guess we do distinguish whether professionals can pass the state exams, etc. to be licensed to practice. This is always a matter of getting the license or not. You already have the tools to get licensed; you simply have to use those tools and study hard enough to pass the comprehensive professional exams. For some it comes easier than for others. John Kennedy, Jr. had to take his bar exams many times before he passed.

BRIAN CROW, K3VR

One thing about college right after high school is the acquisition of disciplined professional thinking such as Franklin Roosevelt or Dwight Eisenhower had. Anything else is so easy to spot such as with (Brian Crow, K3VR*, and)
so many people I have encountered throughout life. Adolf Hitler was politically brilliant because his thinking was not professionally disciplined and thus "hindered." Look what happened to him! By the way, Alexander the Great was pretty ruthless also and killed quite a few people in his conquering escapades as well, and I do not approve of either military leader, despite the positive effects of spreading civilization and commerce as was true with Alexander or advancements in science as was motivated by Hitler. World War II had many positive effects on our world, but millions of lives, including those of our precious animals, is far too steep a price to pay for progress. Humans seem to make war and will continue to do so whether or not I approve, however!

Brian "fakes it" and fools many (fools), I imagine. He may be good at taking information in at a school like U. Mass and regurgitating it back to indifferent teachers for a grade of A. It is the lack of professional habits that kills Brian. His indifferent teachers (if his diploma is not a fake) did him a disservice. But, like the guy in the movie "Catch Me If You Can," diplomas and much else can be faked. Brian claims to have worked for NSA, and they create phony people all the time. Getting a ham license by fraud would be quite easy for an NSA type. I heard Brian calling CQ on 14.275 the other day, and he did not come back to a strong CW response. I question whether he can copy CW at all?!!! K3VR is listed an Extra class.

Let's look at Brian Crow specifically. He publishes all his stuff anonymously. He creates a "political cartoon" about K1MAN on a free anonymous web site and then says "Hey, I just 'saw' this, take a look at it yourself." He makes up phony experts like "Dr. Hasenfus" (an alleged attorney) who then states a legal "opinion" obviously not the work of a real attorney. Brian could easily find a real attorney; he does not need a phony one UNLESS he is trying to fool a few fools.

If Brian was not required to write a thesis at his alleged university for his Master's, just say so. His third grade grammar would never have gotten him a Master's if a thesis had been required. I believe the University of Maine will also confer a Master's in Education without a thesis. It is embarrassing for a "Master of Education" in this country, with the sorry state of education here, to write and publish on the internet (no proof readers) with very poor grammar. I say "embarrassing." If Brian has something to say that is important, then to heck with the grammar.

Brian is probably smart, but his undisciplined thinking prevents him from making it when up against professionals. I wonder what Riley Hollingsworth REALLY thinks about Brian Crow? Yuk, yuk yuk! I wonder what Riley Hollingsworth REALLY thinks about Glenn Baxter? Chuck O'Neal, K1KW, an engineer, can't think clearly at all about Glenn Baxter because of "Radio Rage" akin to "Road Rage." In this case, all bets (and the gloves) are off.

Brian is obviously obsessed with Glenn Baxter, and this clinically abnormal behavior (in my engineering opinion) is most likely a very severe case of "Wannabe." If Brian is happy with his pursuits, then I guess it is OK. I believe the most important thing is to be happy.

GLENN BAXTER'S EDUCATION

Now let's get to Glenn Baxter. Not a traditional education, really. In college I spent all my time studying the book and did problems for the first time during the exams. The other kids studied the theory little and worked on problems with other kids in groups. At Northwestern, my fraternity brothers (Lamda Chi Alpha) were always talking about old exams that were in the house files. I never bothered with them. Dwight Eisenhower forced the Army Department to

release old West Point entrance exams, and he and another kid worked all summer studying them. Now that IS very smart indeed! I would do that if I thought of it. No wonder General Eisenhower ended up with five stars! He was smart, and I don't mean IQ. Different kids learn different ways. I would study the book and then look at other books and "make connections" among them. This is how I preferred to learn. I would flunk all the exams and then get an A or B on the final and end up with a C in the course. I ended up with an engineering school 2.35 GPA (pre Viet Nam "grade inflation"), but I was honored upon graduation because of my First Place (Second Place nationally) and Third Place Awards for written and oral presentations of technical papers in Boston and Syracuse, and my 4th place Award at the Annual Boston University Debating Contest.

PROFESSIONAL ENGINEERING EXAMINATIONS

Six years after graduation, I studied for six solid months for my professional engineering exams and pulled all of those "connections" together. It was great fun and the best investment of six months that I have ever made. I put numbers on pieces of paper in an oatmeal box. I shook the box, picked out numbers, and that is how I selected the next problem to work on out of my book of sample professional engineering exam questions. Each morning I would say to myself "It's time to go out to the 'snake pit'!" I loved it, really! The very first problem I worked on took me two weeks to solve. At the exam, you had only 45 minutes, on average, to solve a similar problem! I got through engineering school with a six inch K. & E. slide rule and then literally breezed through the P.E. exams with a fairly new HP 35 scientific calculator and HP 80 financial calculator, each costing $400, like $4,000 each today! Now you can get the same calculating power for less than $10 each! God, what a huge difference!

I had those little red HP 35 numbers dancing around on those ten digit displays, and this was like cruising down a super highway in a brand new Rolls Royce with the radio on a classical music station.

I took the P.E. exams in Illinois, at that time the most difficult state, and passed the first time with honor grades. Many, if not most, PhDs are somehow unable (or too specialized and/or too arrogant and unwilling to do the tedious review work) to pass the state Professional Engineering Exams. PhD engineers at more research scientist and university teaching orriented while BS engineers are more applied scientists or else go into management, etc. The P.E. Exams are two full grueling days and are like taking final exams (7 years after graduation) in the 10 most difficult engineering subjects; Mathematics, Physics, Chemistry, Statics, Dynamics, Strength of Materials, Fluid Mechanics, Thermodynamics, Electricity, and Engineering Economy. This, a kid, me, who had flunked his first Novice, Technician, General (code), Extra, and First Class Commercial FCC tests.

NON TRADITIONAL EDUCATION

As I said, not a "traditional" education. I "screwed around" through my first 8 grades of school (I had a chemistry lab, photography dark room, and amateur radio station) and then needed 11 1/2 years to finish 8 years of high school and college. At today's prices of $30,000 per year, that's a difference of $105,000 in costs and (at $100,000 per year for today's typical engineering graduate) $350,000 in lost income for a total of $500,000 in today's money.

I could afford it; most kids can't. I feel that my abilities are well worth the extra $500,000, but I don't recommend this approach to kids today. I tell them to do their homework, and if you get to 8th grade without doing this you will be "screwed" as 99.999999% of them would be for sure.

HIGH SCHOOL TEACHER

I have taught high school physics, chemistry, algebra, trig, advanced math, and general science. As a substitute teacher, I have taught kindergarten through 12th grade advanced placement physics and also AP statistics. As a sub I have tagged with kids through all those grade levels and have never been in a classroom in any capacity where I didn't also learn something new and significant. Whenever I visit Vermont Academy, I always attend a few classes. I was even a chemistry lab partner on one bright Saturday mourning at V.A.. I could gleefully repeat 6th through 12th grades all over again and learn a great deal. I would not care to repeat college, however! Too much work for the gain that I would reap. Actually, I find graduate courses to be a huge drag; I prefer self study, reading, and writing now. I have a lot of this latter type of academic and research work that I want to do in life, and I am running out of time.

PRO SE LAWYER

In court, I am also not traditional. Traditional is to get in trouble like O.J., Monica, John Dean, or Martha Stewart and end up with attorney's fees in the millions. I do it all myself for free and get the same results, basically, as a team of expensive attorneys would get for me. You don't have to win each individual case in order to win the war. Some cases are for softening up the opposition so that you CAN win the war. I always win the wars. I have great flexibility in court that counters the prejudice afforded by judges to licensed attorneys. I audited ONE law course in college, and I go up and win big in the important cases against the best attorneys in the country. You have to be right, and you have to understand the United States Constitution. As with debating in college, you also need to go to the library and get good "evidence" as we called it. I was First Negative in college debating and pretty good at it. My debating partner, Second Negative (Sheila O'Malley), would then come in and clean up the mess, so to speak.

I really love "legal" movies such as "A few Good Men," "Rainmaker," the one with Paul Newman, "The Jury," I think it was called, and half a dozen others. The basics are all the same in these films with the same theme of good versus evil. I view Baxter vs. the FCC as good versus evil. Most people view this the same way with the extremely interesting twist of which one is good and which one is evil?

I became a pro se lawyer on the advice of my own attorney and out of necessity. At some early point in the Baxter Electronics litigation I hired an attorney, Clinton Townsend, and paid him a $300 up front retainer. It was my idea, and he was happy to get it. $300 was a good hunk of change back then. He said to me "This is a nice way to start!" When that $300 retainer quickly ran out he taught me how to file my own legal pleadings and briefs. Most importantly, I learned, from a licensed attorney, that I could, indeed, represent myself in all courts, which I have done, myself, ever since, all the way to the United States Supreme Court. I have often wondered what Maine judges would do to poor old Mr. Townsend if they ever found out what a monster he had thus created!

A lot of my court appearances and pleadings were just "warm up" exercises for the present challenges, here in 2005.

It all really started, however, with my cheap skate brother in law George Sternad. I was driving to Maine from Scarsdale, New York the Summer after my Freshman year at Northwestern's Technological Institute. I was in the passing lane on a two lane highway. There was a state truck in the same passing lane spraying crab grass and going 4 miles per hour. The sky was bright ahead of the truck, and I was, perhaps, day dreaming a bit. I realized the truck was almost stopped, and I slammed on the brakes, making 100 feet of skid marks. The brakes in my 1959 American Rambler faded 20 feet before the truck, and I hit it hard. I pushed the steering wheel into the metal dashboard and thus made two dents. My head slammed down on my arm, and I opened a huge gash over my eye. I was not knocked out, just bleeding a lot. I went out to "supervise" the measuring of the skid marks. Look at a current photo of me, and you can see that one eye is a bit screwed up, so to speak. It also loosened a few screws in my head, I gather, as well! I went to the hospital for a day and for observations. Actually the "Candy Stripes" seemed the most interested in observing me, it seemed! I hitched a ride back to Scarsdale. I stood in the middle of an entry ramp and literally stopped a car. The guy said "Are you legitimate?" My messed up eye got me a ride to within a block of my house on 31 Claremont Road.

My mother was putting my sister's kids to bed that evening and said "We are so happy that Uncle Glenny is home safe, aren't we? Pookie then said "Yes, but we are not happy about his eye!" I found another car and headed back to Maine. I was wearing sunglasses to hide my new "shiner." I fired up the big boat (1956 Century) to motor up to see my best friends Nancy and Paul Corman. It was getting dark, and I forgot to take the sunglasses off. I nearly ran over Lee and Marge

Frank, fishing in my travel lane up the lake. Marge let out a blood curdling shriek, and I turned away just in time. Forever after that, the Franks considered me to be totally insane! Many hams would agree!

Back to the car accident:

I was charged by the Connecticut State Police with reckless driving, a serious offence. I wanted to get an attorney, but my cheap brother in law (our estate was still in probate) advised that I didn't need a lawyer. "OK," I thought, "No big deal."

I appeared in court weeks later. The state attorney talked to me and tried to give me a line of crap as I remember it. Then some stooge sitting next to me tried to convince me that I should plead "Nolo Contendere," as he put it, abbreviated "Nolle," as he put it. "Let the court decide," as he put it. "BS," I thought. I guess the hell! I would have pleaded guilty!!

At trial the state attorney put the state truck driver on the stand and asked him the usual BS questions about the last time they checked the lights on the truck, etc. I cross examined the driver. "How fast was your truck moving?" "Four miles per hour," he replied. "What were you doing," I asked? "Spraying crab grass," he replied. "Did you put out any special lights and warning flags behind the truck AFTER the accident," I queried. "Oh yes," he replied, "We put out lights and flags for over 1,000 feet." "Why did you put out those lights and flags," I went on. "Well, to prevent another accident," he replied. I knew that I had him, the lawyer "killer instinct" coming out in me for the first time in a court of law, and I had begun this quite serious trial by "winging it" with no pre plan whatsoever. "Tell me this," I continued, "what is the difference between your four miles per hour and my 60 miles per hour compared with your zero miles per hour and other cars going 60 miles per hour that prompted you to put out all those warning lights and flags?" He sat there in baffled silence. You could hear a pin drop in the court room. I repeated the question again and again. Baffled silence. The judge finally rescued the truck driver and answered "The difference is four miles per hour. My
ruling is that Defendant Glenn Baxter is not guilty of the charge of reckless driving." "BAM" went his gavel. I talked with the judge afterwards and asked him that even though I won, would I be better off if I had never been charged in the first place? I had to press him hard for an answer. He finally said "Yes, certainly."

He was right. I later got a letter from the state truck driver's attorney saying that his client was suffering "neck pains." I was now back at Northwestern. I wrote back telling him to "stuff it," since my insurance company and theirs was the same company. I never heard from them again!

BAXTER ELECTRONICS

Then my company, Baxter Electronics (Inc.) went into receivership in 1970. Kenton Quint (owner of the Somerset Telephone Company and Chairman of the Baxter Electronics Board of Directors) had invested $60,000 in BE and, as he put it, didn't want to share a loss with Baxter Electronics. He simply wanted to take 100% control through court "muscle." He and his attorney, Frank Southard, a judge at age 25, had enormous influence. My corporate attorney, Bob Williamson, suddenly developed "laryngitis" and let me hang out to dry. I hired Bob Marden. Marden's dad, a Maine Supreme Court judge, was to be our judge. We got another judge, Judge Reed. I felt Marden was selling me out, so I fired him, post haste. He then sent me a bill for $150. His brother, Don Marden, now a Superior Court judge, sued me, personally, for the $150 dollars, and I argued that they should join the other unsecured Baxter Electronics creditors since they were all so eager to put my company in receivership and discontinue all manufacturing and marketing operations.

To side track a bit:

District Judge Pooler ruled against me in this $150 lawsuit. I appealed to Superior Court. While on appeal, I was dragged back into District Court for an asset disclosure hearing. My car was at VW for servicing, and I had a copy of "War and Peace" with me, just in case, if you get my drift. I get one phone call, right? "Hello VW? I won't be in today to pick up my car!"

I was sworn in, and the opposing attorney, Billy Dubord, (we grew up on the lake together) asked me if I was married. I pulled out a 3 X 5 card and read: "I refuse to testify on the grounds that to do so might deny my rights as guaranteed by the Fifth Amendment to the Constitution of the United States."

Judge Pooler came up out of his chair! I will never forget it. "All right Mr. Baxter, do you want to go to jail?" The Sheriff was in the courtroom drooling at me. I read from the card again and again. The judge asked if I understood the consequences of my actions. I said that I did understand the Constitution of the United States. He finally gave up and called a recess. He went to his office to read up on law, I guess.

He came back out in civilian clothing to talk to me. We chatted at length. He finally said "Mr. Baxter, I don't know what you are, but whatever it is, it STINKS. You should have been a lawyer!"

Then Donald Marden (now a Superior Court Judge) wrote the court and tried to get them to issue an execution. I turned him in to the bar association, a joke then as the Board of Overseers of the Bar is now. The case died in appeal, and the $150 was never paid, I gather. Marden then dropped out of his bid for District Attorney, a newly created $25,000 per year paid position, "for personal reasons." Joan Sandy, an old friend of mine from my teens, got that job instead.

Back to the original train of thought:

We had several hearings, and Judge Reed signed a Southard drafted ORDER of receivership. I called the judge, pissed as hell. He said he had signed the order to "pin this thing down," as he put it. The local town drunk (according to my Secretary, Maryse Price) had been appointed as the Receiver. I protested to Judge Reed. He then appointed Maine Supreme Court Chief Justice Williamson as the Receiver. Judge Williamson was the father of my original attorney, Bob Williamson, the one who dropped out because of "laryngitis." Bob really dropped out because this was going to be a "dirty deal," with Frank Southard in the mix. Bob Williamson had dated my oldest sister Betty when he was a counselor at Camp Winona, and she was a counselor at the sister Camp Wyanogonic, both in Denmark, Maine.

Anyway, Chief Justice Williamson came to see me in my radio studio building and sat in my big blue easy chair. What a sight! When he found out that Baxter Electronics had no money, he resigned. He had visions, he said, of writing a Baxter Electronics check, an "adjustment" as he worded it, and getting Kenton Quint off my back. Judge Reed (an icon on the Maine bench) then appointed Bob Viles, who was looking for employment for his son. More hearings, of course.

Let's backtrack to the first court appearance before Judge Reed. There was a trial going on. I walked into the courtroom. Then Quint's Attorney, Frank Southard, walked into the courtroom. Judge Reed spotted Southard and stopped the trial on a dime. He asked Southard if HE wanted to adjourn to chambers. Southard, clearly embarrassed, said "No, I think there will be evidence introduced." How do you spell C L O U T?

I went to SCORE to get a volunteer advisor. He told me a lot. One thing he talked about was criticizing those in authority. He said to do it like this:

"With all due respect to your high rank Admiral, your ass is blowing in the wind."

One time in a hearing in chambers with Judge Reed, the judge said: "Mr. Baxter, now you are criticizing the way I do business, and I don't like that!" I said: "Well, your honor, I certainly don't mean to criticize the way you do business, but....." and then I went up one side of him and down the other, all over again. After the hearing the Bailiff mentioned to me "Jeese, we could you shouting at the judge all the way out in the courtroom!" He was totally mortified.

Another time a court bailiff tried to kick me out of the law library at Kennebec County Courthouse in Augusta, Maine. Excuse me? He had no success.

Finally, we ran through Judge Reed, so to speak, and Supreme Court Judge Webber took over the case. Several more hearings and finally Supreme Court Judge Delahanty took over the case as the last judge in the matter.

I remember a hearing in chambers with Judge Delahanty. At one point I reached to pull out my brand new HP 35 engineering calculator (I would later use it in Chicago to pass my Professional Engineering exams) which was in a leather belt holder kept closed with Velcro. Everybody in the room bolted; they thought it was a tape recorder! I find that all Maine judges are terrified whenever I pull out a tape recorder, which I often do. They always threaten to take it from me, and I always shut it off. In a deposition, however, my trusty tape recorder rolls!

I argued that now court controlled and therefore "shut down" Baxter Electronics had abandoned the "E-DAC" trade mark that and that I could "grab it" if wanted to. The judge asked if I knew how long it took to legally abandon a trade mark. "Yes, I replied, two years."

Remember Ipana tooth paste and Bucky Beaver? "Brusha, brusha, brusha, new Ipana toothpaste, brusha, brusha, brusha, it's better for your teeeeeeeeth?" Their TV and radio ads costs millions, and then they folded. Some outfit then stuffed tubes with generic toothpaste, called it Ipana, and made a bundle.

I took the same position when I grabbed the Collins trade mark. You can actually see in QST where Rockwell airbrushed the Collins "meatball" logo off the front of S-line gear. So, for years, I owned the abandoned Collins trade mark. Rockwell bitterly complained to me long after I was through with it, and I said, "Look, let's just both move on to other things." I never heard from them again after that. They could have bought a lot of influence in court, I suspect. If I had had any further use for the Collins trade mark, I would have duked it out with Rockwell.

Also in that chambers hearing before Delahanty, Judge Reed kept sticking his head in the door and inviting us all to come down to the court house Christmas party. I gathered he was just curious about the Baxter Electronics case, long ago taken away from him. His portrait and (now Judge) Donald Marden's hang in honor in the small courtroom in the Kennebec County courthouse in Augusta, Maine. You spell C L O U T this way: C L O U T!

Anyway, with Baxter Electronics tied up in Receivership and Baxter Associates, Inc. (which owned all the office equipment), now controlled by my Baxter Associates, Inc. stock holdings (I paid myself my salary in Baxter Associates, Inc. stock), I then "fired up" as G.A. Baxter Electronics and continued the E-DAC business for years as usual. There is more than one way to skin a cat! Delahanty finally dissolved the old Baxter Electronics, and Quint bought all BE assets for the tidy sum of $2,000. He later tried to sell me the warehouse full of parts, but, "Sorry, pal, I'm not interested!" Anybody need a few million 1N4002 diodes?

Now I have a major case pending before, guess who?, Supreme Court Judge Delahanty's son, a Superior Court Judge. Judge Donald Marden has recused himself from all my cases because I sued him for altering

a sworn deposition, an alleged criminal act of perjury, of course. After considerable litigation and depositions, we both settled out of court. I let the guy off the hook. His attorney, Jerry Fournier, mentioned to me during the settlement discussions that my lawsuit against Don Marden was really draining his firm, Marden, Dubord, and Chandler. It was also wearing me down! Don Marden is now a Superior Court Judge, and a very good one, from what I hear.

At one deposition, Don Marden brought in a cold can of Tab for me, with a plastic cup over the top, during the break. I will never forget that moment. My mortal enemy serving me a soda! I thought to myself, "This is a classy guy!"

One time senior Judge Delahanty wanted to meet me under the steps of the Augusta Civic Center "to talk." I called Supreme Court Judge Webber at home to discuss this. He told me I didn't have to go and that Delananty couldn't hold me in contempt. I didn't go, and guess what? The toll call I made to Judge Webber did not appear on my telephone bill. I can't prove in court that I ever talked to Judge Webber that night, now can I?. I remember the call well. His wife answered the phone, and I asked to speak with "Judge Webber." She seemed tickled at the respectful way I had referred to him, I thought to myself at the time. Wives are funny that way, aren't they?

FEDERAL COMMUNICATIONS COMMISSION

By comparison, dealing with punks like FCC attorney Riley Hollingsworth seems like child's play, doesn't it? Riley writes his silly letters, etc., but there are no court appearances where he could be confronted in public, and there are rules of procedure, rules of evidence, etc. Hollingsworth makes up his own rules and is quite effective with intimidating 99.9999% of the general ham community. This is not my idea of an America where there is liberty and justice for all. What irritates me is that I am paying Hollingsworth's salary! It is, however, the American way, in total, corruption, politics, and all.

Let me end this essay with the wisdom of wood carver David Holmes. He carved the State of Maine logo that graces the Maine legislature Senate chamber. I was complaining to him about the FCC and why can't they make their calls with the same honesty and integrity as an umpire during the World Series? He said "Glenn, that is politics, this is baseball." We were watching the World Series at the time. I repeated my plea, time after time. He repeated his response, time after time, "Glenn, that is politics, this is baseball." "Oh, I get it. The FCC is politics, THIS is baseball." I am pretty darn smart, wouldn't you say?

* We really don't know very much about Brian Crow, K3VR. Drop his name or his alleged company (Stockbridge Consulting - no letterhead) into in a search engine, and nothing comes up. Brian (or who we know as Brian) says he was with NSA, and they create fictitious people all

the time. Identity theft is also quite common these days. Perhaps he is in the witness protection program or his name was taken off of a tombstone and he is not Brian Crow at all. Would the REAL Brian Crow, K3VR, please stand up? Has anyone ever seen Brian personally? Has anyone ever snapped a picture of Brian? Has he ever attended a hamfest? Does he have a phone number? K3VR@hotmail.com is not exactly traceable, now is it? Has anybody stopped at his FCC listed address to see what is there? He dropped his own web site years ago (it showed more than a passing interest in little boys), and now he creates many free anonymous pages, all about K1MAN. He seems to create dozens of anonymous E-Mail addresses as well and sends me stuff all the time (I assume it is Brian).

He E-Mails me several times daily from K3VR@hotmail.com and then turns me in as SPAM when I reply! What's with that?

Drop K3VR in a search engine and all that comes up is K1MAN stuff!

On the air, Brian appears to lack the ability to copy CW although listed in the FCC data base as an Extra. NSA types would have no problem getting a ham license by fraud. Brian appears to know little or nothing about electronice or amateur radio theory. On QRZ he has a photo of a big Eimac tube, yet he has bever built an amplifier. What's that all about?

He creates phony "experts" like "Dr. Hasenfus" (an attorney who also does not come up when dropped into a search engine) when a real expert would do just as well, and he even authored a printed nasty letter about K1MAN to the editor in local Maine newspapers by pretending to be from Manchester, Maine. He has filed complaints about K1MAN to the Maine and Illinois professional engineering boards, the Maine Attorney General, Maine State Senators and Representatives, the FCC, Vermont Academy, the SEC, the FTC, etc., etc. ad infinitum. He has a copy of my University of Rhode Island engineering school transcript. How did he come by that?

He sometimes writes with third grade grammar and yet claims to have a Master's in Education from the University of Massachusetts. He is K1MAN's number one detractor, and I am flattered by all the attention. The FBI says that such extensive activity is usually paid for by some organization with lots of money and an axe to grind. Who would pay Brian to stalk K1MAN? ARRL? The FCC? The CIA? NSA? The telecommunications industry wanting to grab amateur radio? Walter Cronkite? Who? Perhaps the FBI is wrong. Perhaps Brian Crow, K3VR, is just a super sick "wannabe" with a legitimate Master's of Education degree from the University of Massachusetts who obtained his ham ticket by fraud (quite easy really). I forgive you Brian. 73 and GL de K1MAN.

If you need a lie to be paranoid about, it seems the shrub has plenty to go around.

Read my previous response from waaay back about this so-called issue (which apparently you have studiously avoided doing). If I *were* to accuse you of anything, I think I would still run with rude, vulgar and boorish---but that wouldn't be a big surprise to you, now would it?

P.S. Take care of that paranoia. They *do* have meds for that, you know. Otherwise, just keep on whining and cry babying...

Well, most readers would agree that the minor point (if it was a point
at all), was just a *figure of speech*, in common usage. Try not to be
so sensitive. The MAIN point was about "countrymen dying for a lie"
which you (not too) masterfully avoided.

If you want to dodge and dance and get wound up about a figure of speech
while ignoring the main point, that's certainly your prerogative...but
it really doesn't say much for your reading comprehension skills.

I'm glad I'm not a ham or CB, er, CBer(?), so I don't have to read this
crap.

I wonder if a ham or CB(er) "MUST" send in the $45 "NOW"?

3283. Radio Australia and New Zealand reception on the US west coast

Newsgroup: rec.radio.shortwave
Date: 2005-11-20 00:04:57 UTC
From: Telamon <telamon_spamshield@pacbell.net.is.invalid>
Message-ID: <telamon_spamshield-7376D3.16045619112005@newsclstr02.news.prodigy.com>
Source record: 50084

This season Australia and NZ are not coming in as well during the daylight hours as in the past.

Today Australia was much better on 17,785 than on 17,795 which is supposed to be directed to the USA. Today I did not hear them on 21,740.

I had decent though weak reception of NZ today on 17,675.

These days I have much better reception of Australia and NZ starting evenings through the night on the lower SW bands and into early morning before they start to fade.

Which man, Me or Zinni? My point is that the administration hyped the
invadion of Iraq and now people are disillusioned with the results (or lack
thereof). "People" includes the public, the Congress, and members of the

military. I can't speak for Zinni, but he speaks quite well for himself.

If Anyone Is Interested / For Your Information ,

There are currently two pieces of AM/MW Radio Enthusiast and
Radio Collector's fooking for Unique High Quality AM Radio Gear
made by Mckay Dymek for the AM/MW Radio Listening Aficionado.

A Matching Set of McKay Dymek AM/MW Radio items AM-7 and DA-7.

1.. Dymek AM 7 Tuner Long Distance High Fidelity AM Tuner
plus the Longwave (LW) Band {AM7 = AM-7 = AM 7}

2. Mckay Dymek DA 7 Shielded Ferrite Rod Directional AM Antenna
with frequency and sensitivity controls. {DA7 = DA-7 = DA 7}

3. The Seller claims that these two Mckay Dymek items come complete
with the Operation Manuals and Original Packing Boxes.

NOTE - These items are located in the UK and Shipping to the USA
would be over $100.

eBay Auction Item # 5831825480
<http://cgi.ebay.com/_W0QQitemZ5831825480>

FWIW - This Auction CLOSES : 24 NOV 2005 @ 15:30:00 PST

NOTICE - This is NOT my Auction and
I am NOT associated with the Seller.

as always - buyer beware - bid high and bid often
- life is a gamble and so is ebay ~ RHF

Bullshit. Most of them are human beings

==========
Discipline and morale among US troops in Iraq was under fresh scrutiny
last night as the military admitted that 17 soldiers were being
investigated for refusing to operate a fuel convoy because of safety fears.

All but two of the 19 reservists in the fuel platoon of the 343rd
Quartermaster Company refused to operate a delivery on Wednesday
morning. They were read their rights and moved from military barracks
into tents, the wife of one of the soldiers told the Clarion Ledger
newspaper in Jackson, *******Mississippi********.

Hey R, er, Mr. F, here's a friendly tip: Look up the word "but" in the dictionary. Then look up the word "butt". You may want to choose the correct one next time. Using the wrong one makes you look like a, well, butt.

3329. TURN $6 INTO 6 THOUSAND!!!!

Newsgroup: rec.radio.shortwave
Date: 2005-11-20 01:55:25 UTC
From: coffeeluva94@yahoo.com
Message-ID: <1132451725.347546.240350@z14g2000cwz.googlegroups.com>
Source record: 50130

HOW TO TURN 6 BUCKS INTO 6 THOUSAND!!!
(WORLD WIDE) WARNING: READING THIS WILL CHANGE YOUR LIFE!

I found this on a bulletin board and decided to try it. A little while back, I was browsing through newsgroups just like you are now, when I saw an article similar to this one. It said you could make $6,000 by sending out $6 to the people on the list and asking them to put you on their mailing list and sending each one a U.S. dollar. So I thought "yea right, this is a scam!" but like you are now I was curious, so I kept reading. Anyway, it said that you send $1.00 to each of the 6 names and addresses stated in the article. You then place your own name and address in the bottom of the list at #6 and pot the article in at least 200 newsgroups. (there are thousands) No catch, that was it. So after thinking it over, and talking to a few people first, I thought about trying it. I figured: "what have I got to lose except 6 stamps and $6?" then I invested the measly $6.00. Well GUESS WHAT?!?! With in 7 days, I started getting money in the mail! I was shocked! I figured it would end soon. But the money just kept coming in. in my first week I made $25. But by the end of the second week I had made a total of over $1,000!! In the 3rd week I had over $10,000 and its still growing. This is my 4th week now and I have made a total of just over $42,000 and its still coming in! it's certainly worth the $6 and 6 stamps!!! I have spent more than that on the lottery. Let me tell you how this works and most importantly why it works. Also make sure u print a copy of this article NOW so you could get the information off of it, as you need it. I promise you that if you follow the directions exactly that you will start making more money than you thought possible by doing something so easy! Suggestion: Read this entire message carefully! (print it out or download it.) Follow the simple directions and watch the money come in!!! its easy. Its legal. And your investment is only $6 (plus postage).
IMPORTANT! This is not a rip-off; it is not indecent; it is not illegal; and it is virtually no risk because it really works!!! If all of the following instructions are adhered to exactly, you will receive extraordinary dividends. PLEASE NOTE: please follow these instructions EXACTLY, and $50,000 or more can be yours in 20 to 60 days! This program remains successful because of the honesty and integrity of the participants. Please continue its success by carefully adhering to the instructions. You will now become part of the Mail Order business. In this business your product is not solid and tangible, it's a service. You are in the business of developing Mailing Lists. Many large corporations are happy to pay dig bucks for quality lists. However, the money made for the mailing lists is made form people like you and me asking to be included in that list. Here are the 4 easy steps to

success:
First, get 6 separate pieces of paper and write the following on each piece of paper "PLEASE PUT ME ON YOUR MAILING LIST!" now get 6 U.S. $1.00 bills and place ONE inside EACH of the 6 pieces of paper so the bill will not be seen through the envelope (to prevent thievery). Next, place one paper in each of the 6 envelopes and seal them. You should now have 6 sealed envelopes each with a piece of paper stating the above phrase, your name and address, and $1.00 bill. What you are doing is creating a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate service and you are paying for it! Like most of us I was a little skeptical and a little worried about the legal aspects of it all. So I checked it out with the U.S. Post Office (1 800 725 2161) and they confirmed that it is indeed legal. Mail the 6 envelopes to the following addresses.
NOTE: make sure you put the correct amount of postage stamps on your envelopes. Other countries may need more stamps so be correct on how many you put. And remember your business will be running throughout the world so when you start posting messages or emails to people this will bring thousands of dollars from all over the world. So now, you have money flowing in from different countries! That's how I became so successful in this business. Mail the 6 envelopes to the following addresses:

#1) B. Pratt
5535 E 100 N
Knox, IN 46534

#2) Michele Tyska
PO Box 765
Northport, NY 11768

#3) David Weir
PO Box 144

3331. Radio Shack amplified shortwave antenna

Newsgroup: rec.radio.shortwave
Date: 2005-11-20 02:00:30 UTC
From: electronicdx <electronicdx2003@erols.com>
Message-ID: <1132452030.353464.252460@g14g2000cwa.googlegroups.com>

I am looking around for a new or used Radio Shack shortwave antenna.
The part number is
20-280. I have no pay pal account yet, so I cannot buy things from
ebay yet. I was wondering where on the net I can find one new or used
using a credit card or check, or
money order. Also is there another way I can get a service manual to
fix my old one. It would be appreciated. Thanks.

For others wanting to see my website here it is :
http://www.geocities.com/gccengineering/
I worked hard on it and I do encourage visitors to come and see it.
Enjoy!

Adam E.

Certainly smoking, drinking and illicit drugs contribute to the infant mortality profile. Pain killers, sedatives, anti-depressants, tranquilizers and so forth are consumed in very large quantities and there is no such thing as a drug without side effects. Very, very, very few drugs get tested on pregnant women primarily due to concern with damage to the fetus.

I remember now - dxass doing this same type of thing with Bryant.
Something he couldn't let go that Bryant said. Finally, ass called
the guy's work and stuff. That's where this insurance thing is
escalating to. It's a pattern. Fun to see it play out.

Is it true that the three countries in the world where it's against the law for a
doctor to open a private practice are Cuba, North Korea and CanaDuh?

I heard that on the radio fairly recently.

I suppose that the Presidential veto doesn't count for anything. Nixon had 43 total vetoes and 7 were overridden, Ford had 66 and 12 were overridden, Carter had 31 and 2 were overridden, Reagan had 78 and 9 were overrideen, Bush I had 44 (and 2 pocket vetoes which weren't counted in the totals as they were tried between sessions) and 1 were overridden and Clinton had 38 vetoes and 2 were overridden. In other words, the Presidents had an effective hand in suppressing things that they didn't like.

You need to study our system a bit more. The party in power can see to it that
proposed legislation never even makes it out of committee to receive a vote.

Hit the books, Dr. CanaDork.

You might want to check out Powell's speech before the UN; it doesn't sound like the hallmark of a liberal.

That statement explains D-Ex-Ace and Tracy Nancy Fort. And all you can say is that Powell, in your opinion, is a flaming liberal. I guess that you are conveniently ignoring Powell's role in the Bush I government and the role Powell has played in the Bush II government. How many liberals do you think Bush II has appointed to his government?

Yeah it's pretty easy to do and the trimpot is not that sensitive. The
Drake service manual recommends reading pin 1 of U35 and adjust until it
reads 35.00000 MHz +/- 10 Hz if the receiver has been warmed up for at least
2 hours -or set it to 35.00017 MHz +/- 10 Hz at room temp (if you don't
want to wait). Setting to WWV is, of course, just fine also.

I'm not sure but I think Allan archives the 'Allan Weiner Worldwide' program so it may be possible to listen to it via the website.

Ahhh, so that is how he rewards his followers! He promises them furs!

It's too bad that RHF conveniently ignores the fact that the USA is the most consumption-oriented country on the face of the globe for things both legal and illegal.

Here goes with the publications:

1. Arh Hig Rada Toksikol. 2005 Sep;56(3):227-32.
2. Health Phys. 2005 Sep;89(3):267-73
3. Appl Radiat Isot. 2005 Sep;63(3):381-99
4.Mil Med. 2005 Apr;170(4):277-84
5. Clin Exp Obstet Gynecol. 2005;32(1):58-60

I could list a total of about 146 papers but I'd prefer not to do so.

Hello,
A friend shared this with me so now I'm sharing this with you,because
that is what friends do,help each other out...

40K in 2-3 weeks!
Make 40K EASY through PAYPAL!

Alright, I didn't think it would work, but I've already paid off my
tuition! It's definitely worth a try, and it only costs you $10!

What's 2 cups of joe when it could potentially bring you financial
happiness?

Go ahead.google it! It was on Oprah and 20/20! It's worth a look!

AS SEEN ON OPRAH! $40K IN YOUR PAYPAL ACCOUNT!

That's Right $40,000 dollars in your PayPal account - IT WAS PROVEN ON OPRAH, DATELINE, NATIONAL TV & IT'S COMPLETELY LEGAL!!!
$10 Dollars... That's all it takes...I'll try to keep it short and sweet.

FIRST, PRINT THIS OUT TO FOLLOW INSTRUCTIONS EASIER!

To get started just right mouse click and copy this whole page and paste
it in an e-mail to edit it. Simply follow the instructions below and in

2 to 3 weeks, you will have at least $40,000 dollars in your PayPal account. Most people respond to this program because of the low investment ($10 dollars) and high profit potential. There is NO LIMIT to
the income you can generate from this (you can do it over and over).

If you follow the instructions, you will reach thousands of people!

Honesty, Faith, and Integrity make this system work. I think everyone has heard of "PayPal". Anyone with an e-mail address can join for F*R*E*E*!

If you're not already a PayPal user, the first thing you need to do is sign up. Just click the link below! It's really easy to set up and it's

F*R*E*E*.
https://www.paypal.com

TEAM WORK MAKES THIS DREAM WORK! LET'S GET STARTED: Send a $5.00 dollar

donation from your PayPal account to THE FIRST e-mail address on the list along with a note saying "Please add me to your list". Now send the
other
$5.00 donation and e-mail to the 5th person on the list saying "Thanks I've joined". Remove the 1st e-mail address and place your address at the bottom This moves the 2nd to 1st, 3rd to 2nd, 4th to 3rd, and the 5th place into 4th.

DO NOT TRY TO PLACE YOURSELF IN THE FIRST PLACE. IT WILL ONLY REACH THE

PEOPLE YOU SEND IT TO, AND THEN YOUR NAME WILL BE REMOVED FROM THE LIST!
If you do this the way it was designed it will reach thousands by the time your name gets to the top.

REMEMBER TO SEND"
1) A $5.00 dollar donation through your PayPal account to the 1st person
from the list with a message saying "PLEASE ADD ME TO YOUR LIST",

2) And send a $5.00 donation through your PayPal account to the 5th person from the list with the message saying:

"THANKS I'VE JOINED". This lets the 5th person keep track of progress of
the letter and continue to send out more emails.
Here is the list:
---
1. gangelbla...@yahoo.com
2. sketch...@hotmail.com
3. excaliber11...@hotmail.com
4. wlostow...@msn.com
5. 8mitchell...@verizon.net

Now that you have paid the 1st person and 5th person & sent them both an
email & a note, place your e-mail address in the 5th place. (Make sure it's the same e-mail address that you used to open your PayPal account).
This is the way you will receive payment. OK, the only thing left to do

is to mail out at least 20 copies of this letter. It is the job of the 5th person on the list to ensure there are at least 20 "Thank You I Joined" replies. The fifth person is the guardian of the system! If there are not at least 20 replies then the fifth person will keep sending the letter until there is.

MAKE SURE YOU SEND $5 DOLLARS TO THE FIRST PERSON TO THANK THEM FOR WHEN
THEY WERE THE GUARDIAN OF THE LETTER and $5 DOLLARS TO THE FIFTH PERSON

SO MORE EMAILS CONTINUE TO GO OUT!
As you will also receive gratis - thanks AND THE SAME BLESSING. When your
name is on the 1st slot, 8,000 to 15,000 people will send you 5 dollars!

DO NOT TRY TO PUT YOURSELF IN FIFTH PLACE WITHOUT PAYING, AS PAYPAL WILL
AUTOMATICALLY NOTICE THIS AND DELETE YOUR ACCOUNT AND POSSIBLY PURSUE LEGAL ACTION , SINCE THIS IS A LEGITIMATE PROGRAM, AND THEY ARE PART OF

IT!

Keep in mind... the most you spent is $10 DOLLARS! (Remember... what goes around comes around)

TESTIMONIALS:
Mary Gatters, Columbus, SC: I only have one thing to say to you... OH MY
GOD! I sent out 142 copies total before 20 replied, like the instructions said. Then I went on a short vacation. When I got back my account had over $32,000 dollars in it already and the money was still coming! I'm still floating on air (especially with my new car). I

thought the 'guardian' system sounded cheesy, but now I realize it is the formula that makes this letter really works! THANKS!

LET'S RECAP STEPS:
Step 1. Set up your PayPal account, if you don't already have one, and send the top name(1st person) $5.00 dollars through your PayPal account.
DON'T FORGET to include "Please add me to your list".

Step 2. Send the other $5.00 dollars through your PayPal account and an

e-mail stating "Thank you I've Joined" to the 5th name on the list.

Step 3. Remove the top name, bump the other 4 names up 1 place each. Place your name in the bottom slot - you will receive a minimum of $100.00 or more from your efforts.

Step 4. Keep sending the letter until you get 20, "Thank you I've joined" replies in your inbox.
I know that you have seen this on Oprah or even received numerous messages about this simple program and have probably just deleted them,I
know I have!
But for some unknown reason this time I decided to give it a try,after all, only a $10.00 investment!

Please give it an honest effort, you will not be disappointed and will be very glad you did when it starts to work.

Remember, all you're going to be out of pocket is about the cost of a couple of coffees with the opportunity of banking thousands of dollars into your PayPal account!

Yours In Great Success & Prosperity!

The NIOSH IDLH (immediately dangerous to life and health) level is only 10 mg/L and PELs are only about 0.25 mg/L. I compared the NIOSH safety information and it shows the problems listed for human and animal exposure and NOT for fetal exposure. Low-level radiation exposure can certainly cause a number of birth defects. Folate deficiency can explain some of the photos especially those involving neural tube defects.

The first step is economic conquest. We took away the auto industry from Detroit and look at what a mess the city is in. The rest of the state will follow.

After the conquest, D-Ex-Ace Quisling will become a name for the history books.

Any notable models out there? I would like a really good AM section, if that is not an extinct item these days. I would imagine most of the design goes into the FM portion nowadays.

Are any fairly recent models good for AM dxing or do I have to go back a few decades for a good 'tuner only' setup?

mike

3370. Telefunken Opus 7 Radio

www.devilfinder.com Telefunken Opus 7 Radio

I own a Telefunken Opus 7 Radio I bought for four dollars at a Goodwill store about eight or nine years ago.The radio didn't have the line cord with it,the cord that plugs into a wall outlet.The radio has all of the tubes in it.I haven't gotten around yet to trying to find a cord for the radio or to rig up a cord that will work on the radio,so I don't know yet if the radio will work or not.Is it suppose to be a good radio for dxing on Shortwave and AM bands? I realize I would need a good antenna for the radio.Also,I would like to know how old the radio is.What are push-pull EL84's (6BQ5's)?

M II,

You are talikng about AM/FM Radios and not Shortwave?
I have never heard of any Stereo Shortwave Broadcasters.

There are a few very good AM Stereo Radios out there;
but very few AM Radio Stereo Broadcasters.

Some of the old GE AM/FM Cassette Radios had
the GE Superadio Circutry and FM Stereo. Usually
they can be identified by the 200mm Ferrite Rod
Antenna on the Back and External Antenna Inputs
for FM.

Look at the Sansui TU-919 AM/FM Stereo Tuner
Analog and Digital Tuning Display with Wide and
Narrow AM and FM Filters
http://cgi.ebay.com/_W0QQitemZ5830967681
http://cgi.ebay.com/_W0QQitemZ5831888944

Another option is Car Audio AM/FM Radios with
AM Stereo built-in.

hope this helps ~ RHF

Sorry to break this to you but the situation over there will NEVER be straightened out. At this point killing Americans is a game to these people and Bush is too stupid to see that.

FYI I was for the war in the beginning, we've been there FAR too long now.

That country has been screwed up for thousands of years. It will never change, ever.

Get a clue and *read* what "Passports Choice" means -- it means one of the reviewers bought one for their own use.

Maybe the reviewer(s) like a throwaway radio every now and then, too? You know, the kind of radio you can afford to lose?

Yeah whatever...Maybe you should buy some glasses and read what passport choice really means...Its there teams personal pick or as they put it "the la creme de la creme' of radios...The S350 is junk and at a cost of $100 its the biggest ripoff out there for a radio...

Ooops I said it again didn't I? I can't get that ass word out of my head!
Here's some of my favorite sayings..
"Let's not forget, he's an asshat."

"OINK,OINK,OINK.....SQEEEEEEEEEEAL!"

"ASSHAT ALERT!!!!"

"Asshat alert!!!!"

"ASSHAT ALERT!!!!!"

"Assclown says what?"

"Yes indeed, that you are an asshat."

"Just how long have you been an assclown?"

"Oh look! Another assclown joins the group!"

I'm at a loss on that one too. But other than other S-350 radios there
isn't much to compare it too. It's easy to be rated number one when
there is only one radio mad in that class!!!

Does anybody along the eastern seaboard regularly receive longwave broadcasts from Europe? If so, with what antenna? I keep thinking that from Nova Scotia, I should be able to get the odd station from time to time, but I never have. I use a Lowe 225E with a 13 meter random wire, grounded with a unun and coax feed into my third floor flat.

I have been thinking of purchasing the Wellbrook LFL 1010 which is apparently optimized for long and medium wave. There seems to be a lack of any reference to this antenna. Does anyone have any knowledge or experience with this or other commercially available loops for longwave reception?

You descrbe a pyrophoric reaction. I knwo about it. However, as I've
already said, teh research I've seen suggests that it does not atomize.
That the partilces that do result do get into lungs and other organs,
but are too large to be retained.

I don't know if it is really an anology to DU Tank rounds/Ammunition,but I know SABOT Tank rounds create a jet flame like a very hot cutting torch just before they strike the side of a Tank.That creates a hole in the side of the Tank for the round,which is about the same size as a silver dollar,to enter the Tank and cause all kinds of damage.I am not an expert on DU Tank Ammunition and other types of DU Ammunition because that didn't exist when I went to Armor Ammunition School at Fort Knox,Kentucky in 1963.An article says DU Ammunition self sharpens and gets very hot upon impact with whatever.There are vapors created and that stuff gets inside of peoples bodies.

I own the S350 DL (new improved version of the S350) and find it to be
an excellent radio. I prefer it to my Sony 7600G, YB400 or my DX398.

David,

What is unusal is that one or the other of these McKay Dymek AM Radios
or McKay Dymek AM/MW Antennas will show up on eBay every few months.

In the last week there was a Matched Set of McKay Dymek AM-5 Radio
and DA-5.Antenna; followed by Matched Set of McKay Dymek AM-7 Radio
and DA-7.Antenna. A "Matched Set" like these may not be Offered again
for a another year or longer.

I had a gall bladder (two little gall stones perfectly round,about the size of birds eggs,I have them in a plastic pill bottle in one of my bedroom dresser drawers) at St.Dominic Hospital in 1969. www.stdom.com I had Blue Cross insurance and I collected almost $700.00 for my operation.Does that count as insurance fraud? Nowdays,I have Physicians Mutual insurance,but I haven't had to use it yet.If I ever do have to use it,I hope I can collect some money from Physicians Mutual of Omaha.I know I pay them enough money every year,looks to me like I should get something back.

RHF,recently you mentioned something about Sanshui AM/FM Radios.(in another thread,I think) Are they good radios I should look for at the thrift stores around here? They are expensive radios if bought new,aren't they?

Hey ... who are you, loser??? Were you there, or anywhere in the real world since 1970 till the present. Well, I served as enlisted until 1980, and then as an officer till I retired in 1996. Being there, I can tell you two things: we were not beaten by a bunch of dead enders (hey, one of those losers is now my frined, and he would love to kick your ass); and wer invented those tactics when.....have a decent education I hope. Evidently you must be some kind of Peace Freak (they always like shooting off their mouths but do nothing for their country, just another social parasite with all of the answers and no experiences.

The real problem is that nobody's like you sucking off the good of the land, and probably put Bill in office twice, watched the military being dismantled, the intel community underfunded and stifled in favor of the lame FBI head (kept the dikes happy on the wesy coast), and preapred the US to become a third rate world power (hail NAFTA...we don't want to work anymore, just push carts at Walmart....) Shooting off a cruise missile or two (missing their targets) didn't cut it, and kissing that slime-ball UN head responsible for millions of deaths since the Balkan civil wars on to the present day was good for the PR and polls. You all bought into to it...hey, what's a free ride....well then the house of cards came tumbling down...retirees got robbed of the funds, the military was unprepared for any war provoked or otherwise, the non-comms were released to save money to reduce the deficient under the pretense that reserve forces could do the job as needed, the officer corps were weeded out of warriors and thinkers for a herd of Wolfie' fans (amazing, write a book as a grad student on the world, and it becomes doctrine under the democratic president to the final resizing and outfitting of a force sent to war ill-equipped, ill-led, and ill-structured).

Now I work over here before the war and to the current day...what do you know about: arabs, Islam, terrorism aside from the propaganda of CNN (Time-Warner financed by who and where, and editted by Turner's political cronies- oh, good source there pal). In fact I hate to break your demented ideas about whatever war you were in, but the Saudis here are warning us about Iran (seems there is a treaty among the Arab states that forbids nuclear weapons or proliferation in the region - hell with the Europeans, the Arabs are warning us about this one)!

We are not losing, but before NO ONE HAD THE GUTS OR MADE THE SACRIFICE TO STAND UP AND SAY NO MORE. I would like to stick your idiot face in a couple of trenches here and let you chew on a few thousand bodies.......and come over here I plead your case that we screwed up....you are simply another poly-theist that needs converting or killed......you better study what was going on in Afghanistan......we

waited for a reason in Yugoslavia till it was almost too late - remember, Congress had to push to act.....you just ran over there to help after that, right......so why expect more of the same...

A little statistics here...less than 26% of Americans have done or served for their country since the revolution to the present...if you think every red-blooded American wanted to fight Japan after Pearl Harbor, wrong again...do the homework. I'll make it simple for you.

If you want to do something about this barbaric and dangerous world the averga American can watch WWF, or go to soccerr practice in a gas-guzzling, over-sixed SUV, then put up some time and risk your life and see what the world really is like. I did, and now as a civilian I see it is really screwed up. Otherwise, shut your cowardly mouth up, go about your daily meaningless little life, and leave manhood and the fate of the greatest democratic republic in world history to us......you are not only irritating me but those of the people who I work with, and belong here.

But I give you one point on ... "just like Vietnam..." We still have losers, peace freaks, and fair-weather patriots (remember who said that-if not, go back to school and learn something about America) who demand rights and privileges without earning them or their citizenship. It takes more to be an American than being born here and breathing air ..... if we do not help these people under any guise that got us here, then stand by for a cry from the radical Muslim world not heard since the days of the Battle of Vienna....oh yes, I have a casa in Italy too....want to know how they feel about the coming threat from radical religious groups like Islam and yes, your own beloved evangelists back home......

If you want to help those fighting and dying here, then get off your TV cushion, vote out every congressman and senator currently in office, let McCain be President (how did we ever get Bush, let alone that shifting Kerry) and put a two term limit on those clowns in the virgin city. The problem is Americans do not vote, when they do it is straight ticket, and their chosen leadership is a majority of lawyers, poly-sci, international affairs majors.......now whose fault is that...the President or yours.

We are not losing here, but in any armed struggle people die...if you cannot understand the level of maturity and patriotism that it takes to make that committment including a loss of daily personal freedom, then the problem rests with you, and not the young soldiers in harm's way. And never tell one of them that we're losing....if I drop your name as they pass by me on Christmas leave in Frankfurt, they most likely will pay you a visit. And I probably would too - if you have not been there on the combat line, or ever served in a confict, you have no right to judge things you have no knowledge of. Your views might lead to some real conflicts with those standing by their country, right or wrong...it is all we have. Try living abroad as I do, merc or not...there is no place like home, Dorthy. Take it from me...drop the

defeat crap, and find something you really know about from experience. We need no more Sheehans ... she was a nobody...her son was a soldier...that is all there is to it. He volunteered, he died, and he is remembered by those who serve still.

Finally a citizen who understands the strategic situation.

You'll all be happy to know that Al-Qaeda is growing desperate.....body count of theirs is high, and replacements struggle to get across the Saudi or Syria frontier (now that Lebanon slapped Syria's face).

But bigger fights are looming......radical Islam will not go away quietly for 25 years at least.....if you Ameriacns back there treat all Muslims as they do us in the heart of Islam, then forbid their dress, forbid the Quran, and close their mosques, and this especially applies to the "Black Muslims"...people who change their names to become someone when they are still a no one....their tapes are shown over here claiming mistreatment and the growing rise of Islam in the US....I can stomach that crap from the real arabs, but from so American back home, no way. FInd these people, shut them up or down, or better yet, send them over here where they can be impoverished under the heels of royalty or a militator dictator rather than a white man's welfare system.

We had Vietnam in our hands...and if I ever meet Kerry being a retired naval officer, tell him I intend to kick his #%$ ..... he broke the faith with Brother Blood......and for personal, political gains...no real naval officer would ever do that......and for that I will never forgive him......

Put McCain in office...no POW will ever go to war knowing the end results of any war to any soldier or civilian.

Hey, yes we use Willie P ... perhaps cutting off heads with machettes (latest gig here) one by one would be more news worthy.......you sick liberal puppies back there are clueless about this demented and barbaric world. Shut off CNN, and do something with your lives and for your country.

Thanks for the correct observation back there friend....and get the word out to some family back there that you appreicate what their husband, wife, son or daughter is doing over there. Playing dice with one's life is not terribly satifying......but knowing someone back there sees the big picture through your eyes, and cares...that sustains and keeps them safe over there, as it did in the 'Nam. I wish I could have stayed after 1996....and wish I could round up some old buddies and go a'hunting in Iraq for these "terrorists"....but then we be accused of crimes...meet terror with terror....they kill your friend...you kill their family....so far only Iraqis and soldeirs are dying....why not take the war to Bin Laden's and Zaraqwey's families anf rriends...now that is thinking like the enemy and using his culture

and value system agaisnt him...yes, it is not moral by western standards, but we are fighting an enemy who does not relate to your standards, and is stuck somewhere between the 12 and 14 th century mentally.
If you only could see what I see here in the Middle East as a civilian working here before and afetr 9-11......CNN is a pack of propaganda and pro-arab...find out why on your own time.

Keep the faith with those on watch or patrol tonight. You are safe back there, but they are never safe except in your prayers and hearts.

3450. PassPort to World Band Radio (PTWBR) 2006 and the Grundig S350DL Radio

FO&A,

PassPort to World Band Radio (PTWBR) 2006 - Pages 148-151
and the Grundig S350DL Radio
http://groups.yahoo.com/group/Grundig-S350/message/3516

If you consider the Grundig S350 / Tecsun BCL-2000 Radios
and there follow-on Models Eton S350DL and Tecsun BCL-3000
as very good AM/FM Radios and successors to the GE Super
Radios (Superadio) that happens to have the Shortwave Bands
as an added feature : Then it is a Great "portable' Radio for
carrying from Room to Room or out to the Backyard for the
Sound-of--FM-Music or Listening-to-AM-Talk-Radio. As a
Shortwave Radio it's a get by only. Works well as a Kids
First 'Real' Shortwave Radio.

READ - Eton S350 DL -=V=- Grundig S350 :
Audio Quality and Sound Output ?
http://groups.google.com/group/rec.radio.shortwave/msg/2a85176fee0976a5

* Buy it for the Room Filling Sound over the Sony ICF-SW
7600GR or other smaller 'portable' AM/FM Shortwave Radios.

READ - A Compilation of GE Superadio Posts - by RHF
http://groups.google.com/group/rec.radio.shortwave/msg/2518c853aaf62053

* Buy it because it is what many GE Superadio III Owners
wished that GE would have come out with as the GE Supe
Radio (Superadio) IV (4) an Analog Tuning AM Radio with
Digital Frequency Display; Wide and Narrow IF Filters, RF
Gain Control; External Antenna Inputs; and very good
Battery Life. - = Super 'portable' AM/FM Radio = -

READ - Grundig S350 {Tecsun BCL-2000} and Eton S350DL
{Tecsun BCL-3000} Radios - Whats In A Name ? ? ? ?
http://groups.google.com/group/rec.radio.shortwave/msg/4548471faa051c0f

NOTE - Many Broadcast Program Listeners (BCLs) that were
'considering' the GE Superadio III, the CCRadioPlus+, the
Grundig Yacht Boy 300PE and 400PE, and other 'portable'
AM-FM-Shortwave (SW) World Band Radios have bought
the Grundig S350 Super Radio and Enjoy this Radio for
Broadcast Program Listening (BCL).

READ - Grundig S350 Radio - FM Tuning and Sound
http://groups.google.com/group/rec.radio.shortwave/msg/5a68ffd40cfbb3de

All are Welcome and Invited to "JOIN" the Grundig S350
{Tecsun BCL-2000} and Eton S350DL {Tecsun BCL-3000}
Super Radio Group at YAHOO !
GoTo=> http://groups.yahoo.com/group/Grundig-S-350/

yes i love my grundig s350 / tecsun bcl-2000 super radios ~ RHF

This Time It's Different

From http://www.frontlinethoughts.com/article.asp?id=mwo111105

Quoting:

There is a new business model. Just as industrialists were new in the late 1700s, there is now a new model developing. GaveKal calls this new model "platform companies."

The old model was to design or find something, manufacture it, market it and sell it. (Think Ford, Caterpillar, 3M, oil, mining.) The new model keeps just the high value added parts and ditches the rest. The new model focuses on research and development, treasury, marketing, and the business process and out sources as much of the low margin work as possible. Think Dell, Wal-Mart, IKEA, Li and Fung. Most hotel chains now do not own their properties.

The new model is to "produce nowhere but to sell everywhere....Platform companies know where the clients are and what they want and where the producers are. Platform companies then simply organize the ordering by the clients and the delivery by the producers (and the placing of their logo on the product just before delivery)."

Production is the least profitable of all the processes. It ties up capital, means a lot of volatile (and costly) inventory, it is labor intensive (and subject to all sorts of problems when there is a slowdown (unproductive labor costs) or a quick need for more product and overtime costs). The market does not give manufacturing companies the same investment multiple as they do the platform companies. Platform companies have more stable incomes and profits.

Who would you rather be? The Chinese and other Asian companies that make the Ipod at a 2-3% margin or Apple who sells it at a 40% margin?

But this process means manufacturing jobs leave the developed world (The US, Canada, Old Europe, Australia, New Zealand and Japan) and move to the developing world, primarily Asia and Eastern Europe. This is not seen be many observers as a good thing. Take for instance good friend Marc Faber's recent writing:

"I am fully aware that some observers will argue that it doesn't matter that US companies are increasingly moving their own plants overseas, or outsourcing altogether, because the improved profits that result from the outsourcing accrue to the parent company... However, what about the long term? How beneficial is it going to be for Western industrialized companies if IBM were to lay off 13,000 people over the next twelve months in the US and hire 14,000 in India...I suppose even a non-economist could see that the movement offshore of sophisticated manufacturing and well-paid service jobs has to have some negative macro-economic consequences..."

And indeed jobs have been lost. But more have been found. Some would argue that we are seeing lower paying jobs, but the reality is that tax receipts, at least in the US, are always and everywhere up, even as the Federal government cut taxes! No one pays more taxes than they absolutely have to. Higher tax receipts means people are making more money. Not everyone, of course.

Is the platform company model something that will pass or is it the new wave? GaveKal asserts that the model depends upon four things.

Free trade, so that products can be produced wherever costs are lowest.
Technological progress, especially in communications, which allows a company to decentralize its process.
Recurrent overcapacity in most industries, which allows the platform company to never run out of goods to sell.
The ability to move goods easily (needed infrastructure like airports, ports and highways).

The above items are all part and parcel of a capitalist economy. "So in a sense, 'platform companies' are the children of the capitalist system."

And where does growth in a capitalistic society come from? It either comes from what is called Ricardian growth (from economist David Ricardo), or the growth that comes from a rational organization of talent, where each person contributes at his best level of skill. Countries which do not allow for free movement and advancement of its workers are less profitable than those which do. How much talent is wasted in countries that do not allow women to work, or do not educate their poor universally? Growth is clearly better when those with the best skills and services are allowed to thrive, free of protectionism. This is true whether it is on a personal level or on a country level. If China can manufacture something cheaper than is the case in the US, then why should consumers be required to pay more? And if something costs less, then more of it will be bought. Thus Ricardian growth.

Yes, that does result in some workers losing jobs, but in a fluid and free economy, they find others. While some find jobs with less income, as noted above, incomes on average are up. And yes, we have fewer manufacturing jobs,

but we are manufacturing more "stuff" than ever. We have become more efficient, as technology has made our manufacturing processes in the developed world more productive.

Then second type of growth is what Schumpeter calls creative destruction. It is the growth that comes from new ideas and inventions driven by entrepreneurs. New ideas mean new products which create whole new levels of demand. It can also mean that some products become obsolete. There was a time when my fax machine hummed all day. Now, we get 2-3 faxes a day, at most. I no longer have a home phone, as we all use cell phones. Things change. They go the way of the buggy whip.

For Ricardian growth you need low trade barriers. For Schumpeterian type growth, you need low regulations, low taxes, access to capital and the ability and right to fail. To the degree which countries encourage such things, they prosper or grow more slowly.

The real danger to the platform model? Governments and protectionism. As they point out, a Dell computer says "Made in China" but it is really more accurate to say assembled in China. It is made from parts and software from a score of countries. Of course, the "trade deficit" is counted as China's. Yet, Senator Schumer regularly bashes China, appealing to his union supporters, but fails to notice things like this. Should we also get upset with Korea and Taiwan and Russia and Sweden and the rest of the countries who contributed? We live in a world where our ability to measure economic reality is becoming more and more limited.

In a world where the US government counts Microsoft physical exports as "plastic" because the disks are plastic and only worth a few dollars at most (Dennis Gartman swears he was told this by a government official who was physically counting export shipping at a port), how can we trust the numbers?

The Dollar Asset Standard

But let's let the GaveKal guys make their own conclusions. I quote this passage at length, because it set's up the argument and some key points:

"As mentioned [in the book], one of the first implications of the 'platform company' model is that industrial jobs (those close to the hearts of our bearish friends and left wing politicians) in the 'creative world' disappear, only to reappear in Mexico, China etc... Over time, the job market in the developed economies moves to a minority of very creative individuals who work for themselves, and a majority of fellows who work in the service industry for the creative minds and/or the tourists coming in from the industrial world....

"If we assume that a new part of the world is getting richer (China, India, Russia, Brazil, etc.), then we should probably assume that some entrepreneurs in those countries are making it big. This assumption is not a stretch; there is enough anecdotal evidence to support (if you doubt that some new entrepreneurs are making it big, go to the Louis Vuitton store in Shanghai on a weekend). If we further assume that, in the countries getting

richer, we will start to witness the emergence of institutional savings (pension funds, mutual funds, family offices, etc.), then we should expect big 'savings flows' from the rapidly growing developing world into the Western world.

"In simple words, the emerging markets' newly rich will feel like investing a part of their newly created wealth in regions of the world where property rights are well protected and where there is a rule of law. The excess trade balances earned by the 'industrial world' have, in fact, little choice but to be reinvested in the assets of the 'creative world'. The pension funds of the 'industrial world' will buy the companies which give their countries work. The successful individuals in the 'industrial world' will also buy real estate in the 'creative world' (because it also happens to be the 'fun world'). This implies that the assets in the 'creative world' and especially the prestige assets will always border on the overvalued. Similarly, given the ability to change a producer if he becomes a little bit too demanding, asset prices in the industrial world will remain a little bit undervalued at all times...

"Which brings us to the following point: balance of payments consists of two parts:

The Capital Balance: if the above holds true, that part will always be positive for countries with well developed financial markets.

The Current Account: since the two parts add to zero (by construction) it means that the current account in countries with well developed financial markets (US, UK, HK etc.) should always be in deficit, and massively so...

"Taking this a step further, we can assume that, as a result of the constant capital flows, the countries with a well developed capital market will have an overvalued currency and a very low level of long rates. Which in turn leads to robust real estate markets and higher asset prices.

"We call this 'the dollar asset standard'. Basically, diversified and safe assets in the Western world replace gold as the standard of value in the eyes of new savers in Asia, Latin America, or Eastern Europe.

"The first implication of this new 'dollar asset standard' is that overvalued currencies, combined with a low cost of money (i.e. low barriers to entry), will prevent anybody in the 'developed financial market world' from making any money in industrial goods. In turn, this development will ultimately force companies in the developed financial market world to move to the 'platform company' business model, specializing in design and in marketing, and letting someone else produce the goods.

"But this is where it get interesting: once they make the switch to the 'platform company' model, a number of companies will likely realize that they should domicile their research and marketing activities in countries with low marginal tax rates, both for their shareholders and their employees."

This latter point is already happening, of course. Just this week, the Wall Street Journal ran a front page story on how Microsoft saves billions in US taxes each year by having an Irish subsidiary. Ireland has seen significant economic growth because of its low tax status, especially compared to the continental Old Europe. More and more companies are moving their operations and subsidiaries to low tax countries.

I see the European Union of Socialists are begging to sell bullets to
Kommunist China.
I guess that's all they have to export now besides Socialism which China has
in excess and is happy to trade for your bullets.

I have a Sansui basket case in the garage right now. Discrete
Quadraphonic no less.

Coohoo, look for Fisher, Scott and even old Calrad tube stuff. Once
you get into the Vietnam era solid-state stuff the quality isn't
really ther (except maybe some early '70s Marantz and JVC).

Now consider just how much 0.25 mg/L is. And ask yourself - exactly
where will it be possible to find areas in Iraq where human exposures
are this high?

Even if every gram of DU fired in Iraq was atomized - do the math and
see how low the exposures would be after dispersal.

Murtha is no longer a "military man". He is now a 100% politico. Just like his stint in the military he intends to win.
And winning metals in DemoKratic politics these days means catering to the Left-wing Neo-Kommie agenda.
Regardless of how misguided they (you) are. Murtha and his DemoKratic Party needs to facilitate an agenda. That agenda is to "do what it takes" to defeat the Republicans in 2006 and ultimately in 2008. Even if it means mobilizing Left-wing propaganda campaigns with LIES and more LIES about the Republican administration. They will go so far as to attempt to rewrite history. Much like the CCP rewrites history.

It doesn't matter what Murtha, the DemoKrats or anyone else submits to the Pentagon.
The final say on matters concerning the U.S. Military is President Bush - The Commander in Chief - period.

And THAT is what gets the Left-wing Neo-Kommie's shorts all tied up in kah kah knots.

DU penetrators are the sabot part of modern sabot rounds.

Vapors are created. Theses need not conatin any DU, however. I don't
know what their composition is exacly, but even if DU is part of it, it
still deosn't have to be particles small enough not to be rejected by
the human body.

Cuhulin,

If you are interested in a FM Tuner that will bring in those
distant FM Stations and give outstanding audio results;
consider the Sansui TU-919.
- Analog Tuning plus Digital Read-Out
- Five Gang Tuner
- Wide and Narrow FM "IF" Band Widths
[Plus Wide and Narrow AM/MW "IF" Band Widths]
- Multi-Stage Ceramic Filters
NOTE - The Sansui TU-919 has an excellent AM Radio Section
for a consumer grade home stereo; sort of like a GE Superadio
in a "high class" package.

eBAY - The Sansui TU-919 is available 'used' on eBay
and usually sells for about $600.
http://cgi.ebay.com/_W0QQitemZ5830967681
http://cgi.ebay.com/_W0QQitemZ5831888944
SEARCH eBAY => http://search.ebay.com/Sansui-TU-919

You're implied statement is that Mineta is a liberal simply because he is a Democrat. Can you show me where Mineta says that he is a liberal? Otherwise you are equating things that should not necessarily be equated. You remind me of Clifto saying that Colin Powell is a "flaming liberal".

Mineta sounds as if he is a very competent Secretary.

It's certainly alive in CanaDuh!

Perhaps you should run along and sharpen those listening skills, Dr. CanaDork.

Yeah, you'd think PWBR would be embarrased by all those Eton ads, but
as far as the S350DL goes, I own one and am quite pleased with it.
Granted, it's not an SW DX machine, but I find I enjoy the analog
tuning and the absence of all those noisy digital PLL circuits, and the
batteries apparently last forever. The audio is great and the radio is
very sensitive on MW and FM. Even with the images and spurious signals,
I still like the "feel" of the radio.

Yep,

It doesn't matter if it comes from ingestion or inhalation once it gets into the body, it can still cause quite a bit of damage. It doesn't have to cross the placental barrier to cause damage. The early-stages of development are fairly sensitive to radiation and teratogens.

YoJimBo,

" The deployment of United States forces in Iraq,
by direction of Congress, is hereby terminated "

This is a lie, Lie. LIE ! - Everyone Knows that NO Democrat
Voted to Send Our US Troops to War in Iraq.

This is simply "Bush's War" and the Democrats
have nothing, Nothing. NOTHING ! to do with it [.]

And 'if' the Democrats Did Vote to Send Our US Troops
to War : It was because Bush Lied to them about the War.

Do Not Blame the Democrats and the
Democrat Party of the USA for :
* 9/11 - It happen when Bush was President
* It's Bush's War on Terror
* It's Bush's War in Afghanistan
* It's Bush's War on Iraq
It's All Bush's Fault - Blame Bush !

Lets All Repeat the {New World Socialist Party}
Democrat Party of the USA Election MANTRA :
blame bush, {give peace a chance,}
Blame Bush. {Give Peace A Chance.}
BLAME BUSH ! {GIVE PEACE A CHANCE !}

Well as for me - I Do Not Blame Bush.
President George "W" Bush and both Houses of Congress
including Democrats and Republicans had the same US
Intelligence Information and Agreed to Go To War [.]
Note - The Vote is a Matter of Public Record [.]

As 'One-Nation' both democrat and republican
"We" Need to Support Our US Troops [.]
Can I Get an Amen to That Brothers and Sisters !

God Bless America - amen, Amen. and AMEN !

so say I - my opinions stated as facts ~ RHF

Hi Gary,

EU broadcast stations were S2-S3 in here last night- western NC. In a month
or so they will be S7 S8 on decent nights.

I am using a homebrew 7' diameter shielded loop with broadband preamp on a
short tower in the woods into a Palomar LF converter to an Icom 756 PRO II.
The PRO's are all deaf on LF, so the converter does a nice job of making up
for the Icom's deficiency below 1 MHz.
Also NDB's from S. America and Caribbean easy copy this week
2 nights back, using ARGO, I had WD2XDW, WD2XGJ and WD2XKO all on the same
trace- easy visual copy (137 KHz).

I started with a 1 meter homebrew shielded loop- pretty much identical to
Wellbrook's. The difference between that and the 7' loop is night and day on
LF- not as much on tropical band, 160M etc.

Yep, so is mine. Been on for years now.

Now the R7 is a bit different, it's been just a bit high for a while and I finally sent it in to be serviced. Should be back this week.

Nova Scotia should be a great location for receiving European LW and MW stations, especially if you're near the ocean. When conditions are right, I can hear European and North African LW/MW stations in Ohio, and you are much closer. Are you listening at night, when such reception is possible? Do you perhaps have a high noise level that is masking the signals? Don't know about the LFL 1010, but the Quantum QX Pro ferrite loop antenna is a great LW/MW loop antenna, as is the Kiwa air-core loop for MW (assuming you're also interested in medium wave reception). It's hard to say why you can't hear anything, maybe your flat is awash in power line, appliance, and computer noise? If so, you could be out of luck no matter what antenna you use.

Not suroprising, since they can't see beyond the end of their
own stubby little dicks as they prance around the parade field
shrieking for the war to go on forever. Gotta keep spoonfeeding those
war profiteering Bushies as they keep pounding American blood and
treasure into the sands of Iraq, whence it can never be recovered.

Only because he wasn't given the opportunity.

Funny, it was the Ashcroft DoJ which changed the policy on
FOIA requests.

Under Reno, it was, "Absent a national security reason to
withhold, release the information.'

Under Ashcroft, it became, "Absent a court order to the
contrary, withhold the information."

Fucking Bush hyper-secret cabal.

Why sure. But even a mentally challenged 'tard boy such as your pantie wearing self should be able to see that there are many missions in the war in Iraq. The President was simply celebrating the successful completion of just one of those missions.

LMAO at the stem.

That's a good way to get your ass in a world of trouble, I'd think.

Steve

I'm not sure if it was somebody fooling around or a case of accidentally keying the mike while talking to someone else.

There was an aircraft on the frequency at the time awaiting a phone patch.

I began running the tape after that and heard no more comments so I'm apt to think it either came from the aircraft or from an Air Force ground station.

Certainly made me sit up and take notice!

Explain the continued deployment of body bags or STFU.

Accusing someone of elitism, liberalism and the rest of your
fascist bullshit doesn't cut it. You're the one who wants to inject
the "intellectual" bullshit into the debate. Just explain the body
bags -- deal with the facts instead of red herrings.

It's funny that John "I love Animals" Barnyard can't get over his
fixation of me. It's also funny how he can't come up with his own
material. He's the original Nancy Boy! Hell, I dumped him in my kill
filter and he still loves me. I'm getting worried now!

What a Nancy! It's time you the other Nancy to chime in now! I wonder
if his mom knew he was a Nancy?

hahahahahahahaha

y'all ought to hear some of them dudes around here on CB radio from sun up to around 10:00 PM every day and night.There are about half a dozen of them and they monopolize every CB channel except one with their garbage on CB radio.(I am behind the sandpile,one of those dudes likes to say) I once got out two of my old CB radios I dont care too much about and I cranked the volume wide open and I raked the antennas of each one of those CB radios agains't each other.Those dudes,they started Howling! The next day,a van with two big CB antennans pulled up in front of my house and a guy got out of that van and he knocked on my front door.I pretended I wasen't here and a couple of minutes he got back in his van and drove away.

D-Ex-Ace Quisling,

Have you learned to do a proper Google search on someone yet? You are a wealth of disinformation.

JB

3553. Think about Longwave (LW) and AM/MW Radio Reception and Mobile {Car} DXing

Newsgroup: rec.radio.shortwave
Date: 2005-11-21 00:56:52 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1132534612.405318.288630@g43g2000cwa.googlegroups.com>
Source record: 50452

GW,

Think about Longwave (LW) and AM/MW Radio Reception and Mobile {Car}
DXing
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6610

If you can go Mobile with your Radio or another radio in a Car
or Trunk an go to a local Beach with about 500 Feet of Insulated
14 AWG 19 Strand Wire.
- - - Bring some Hot Coffee/Tea and a few Donuts/Snacks.
- - - Dress Warm and have a Blanket or two.
- - - Bring alone a Good LED Light or two.
- - - Make sure the Car has a Full Tank of Gas.
- - - Leave the Wife, Kids and Pets at Home.
- - - Put a Big Sign in the Rear Window that reads :
"DX Radio Listener" or "Amateur Radio Operator"
- - - Put and old Magnet Mount CB Antenna on the Roof
of the Car for 'looks' :o)

If you don't have a Beach nearby but have a Hill with some
open land and a gentle slope towards Europe. Find a place
to park near the Top-of-the-Hill. Start by leaving about
15-20 feet extra at the Top and run the Wire Down the Hill
as far as you can go.
- - - Do this during the Day so that you can see
where you are going and what you are doing.
- - - Enjoy the Walk back UP the Hill :o)

READ - Car DXing - by Hans Johnson
http://www.anarc.org/naswa/issues/0898/swc0898.html

Run the Wire out along the Beach in the general direction
of Europe connect it to your Radio and just Tune and Listen.
- - - Please have the Car Engine turn OFF.

Sounds like you need a 'mini' Beverage-on-the-Ground
(BOG) Antenna.
http://www.hard-core-dx.com/nordicdx/antenna/wire/beverage/view1.html

MEMORIES Of Long Ago When I Was Younger : I had what is
was then called a Field Looong Wiiireee Antenniii up at
Sequoia Point in the Oakland Hills. It had a a piece of
Re-Bar in the Ground about 15 feet from the Parking Area
with the End of the Wire wrapped around it to Secure it
when not being used. Used a 50 Foot piece of Coax with

two Big Alligator Clips on one end one for the Outer
Copper Wire Shield and the other for the Inner Copper
Conduct. The End of the Antenna Wire had been Stripped
and folded over several times and Solder to form a Big Hunk
to Clip-on-to with the Alligator Clip. The Coax Cable
got connected using a Pair of Spade Terminals to a 'new'
HeathKit GC-1A "Mohican" Shortwave Radio that I had
built in my High School Electronics Class.

Hi,

I need some advice. I'm thinking of getting a used Icom IC-718 for my
short wave listening. Is this a good radio compared to Icom IC-R75 ?
FYI Icom IC-718 is a HF amateur radio transceiver.

Thank You.

They call these disgusting orgiastic frenzies 'hoedowns'. Note the use of the Code word 'dancers' in a failed attempt to fool the decent citizenry.

==========
Do your best to be in the right position yourself, hold out your hand expectantly and/or exert gentle (I repeat, gentle) hand pressure consistent with the flow of the call, but never, never grab or shove. It is far better to let your square break down than to start shoving people around to fix it. Squares breaking down is great feedback to the caller about what moves the dancers are having trouble with. If you observe others shoving people around (sometimes there are visiting angels who fancy themselves good dancers by the amount of pushing they do), please take them aside after the tip and encourage them to behave themselves.

http://www.mixed-up.com/quads/articles/angels.html

3573. FA: ICOM IC-756Pro w/Extras - Excellent for SWBC and MW DX

Newsgroup: rec.radio.shortwave
Date: 2005-11-21 02:37:39 UTC
From: Guy Atkins <dxnospam@guyatkins.com>
Message-ID: <zaudnU8qv8RmrxzeRVn-jw@comcast.com>
Source record: 50473

Hello,

My IC-756Pro is up for auction. If you are interested in ICOM's "Pro" series of DSP transceivers, please check out:
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5832946476

This particular Pro is unique in that my use of it has been strictly receive-only, for SWBC and MW DX. The original owner moved to another state shortly after buying the transceiver and it was stored until I purchased it for receiving use only. If you're after a 756Pro with "low mileage" on the finals, this is the one. It is also a late serial number model, incorporating all
factory improvements.

Thanks for looking!

Yes..the normal AM/FM Stereo receivers used for home entertainment setups.

> Look at the Sansui TU-919 AM/FM Stereo Tuner

That's the type I'm looking at, but with a really good AM section.

Something is very wrong here. One of your listings said the selling
price was $1,145.00 US. That is SICK.

If I had my options, the money would go here:

http://www.winradio.com/home/g313e.htm

As a side note, I received a New Orleans AM station ,WWL, on my car
radio a few nights ago. I'm in Calgary, Alberta. Good signal.

Thanks Clark hope to see it soon. I hope you have a great holiday
season and great Ham Radio DX contacts this winter. The Address It
used to be a Margate SWL Listening Location now its a Nemo Ct listening
DX listening post location. Since this is Shortwave radio and Amatuer
Radio. its ok to give out my address. 73. I also have 2 antennas
outside the window, 1 is a telephone cable antenna which is white and
goes across the fence. The other is a insulated longwire antenna. and
a weather station that needs to be put up soon cause its held up by
heavy coolers.

Yes, with a decent antenna (as with all good receivers) it's a very good SW receiver. I used mine for shortwave listening many evenings.

The bonus with this model is if you are an amateur radio operator, or ever decide to become one, it is also a very good transceiver. I bought an IC-718 just after I got my General amateur radio license, and I nabbed over 100 DX contacts within the first 6 months of its purchase.

The receiver aspect on this transceiver appears to be much the same as the R75 in terms of interface, if not the same.

Bush has angered a lot of conservatives by what appear to be conciliatory
moves, like Powell; backing Arlen "Here's The Blade, Where's Your Back?"
Spector over Toomey; and several others.

> Now,
> you *could* make the case that after a few years, Powell changed his

He wasn't getting enough spotlight. He figured the Democrats would offer
more spotlight.

Best AMS tuner out there is the Carver TX-11a or TX-11b NOT the TX-11, which
is FM only... the a and b models are AMS/FMS. These can be had for around
$150 or so, and are absolute top of the line for AM Stereo, or just plain
broad AM reception.

"People" includes liberals only. They and you and the liberal press are
trying to inflate their numbers and relevance to make it seem as though
there's a good reason to abandon the cause now.

Bill and Janet didn't wait for opportunity, they seized the moment and
went right in a-shootin' and a-torchin'.

> Funny, it was the Ashcroft DoJ which changed the policy on
> FOIA requests.

Even if this is true, what does this have to do with anything?

Wait, I got it. This is a stupid liberal attempt to equate liberal
mass murder with conservative aggravation at supercilious paperwork.
In your mind, the mass murder is the lesser offense because it was
performed by liberals.

Not ten minutes before you posted this idiocy, you were expressing
your hope that Pfc. Englund would be lesbian-raped for putting
underwear on Iraqi's heads.

The original subject was how the DU gets from our bullets buried deep
in the sands of the desert to the innards of humans. He wanted to know
how long it takes from the bullet hitting the sand to the DU appearing
in some humans' innards. You listed an article whose title alone tells
us it's not relevant.

As simply as I can phrase the question: how does the DU get from the
bullet deep in the sand of Iraq to the innards of humans?

3597. A Compellation of Shortwave Listening (SWL) Information and Messages

Newsgroup: rec.radio.shortwave
Date: 2005-11-21 04:40:46 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1132548046.471580.54370@g43g2000cwa.googlegroups.com>
Source record: 50497

For One and All,

A Compellation of Shortwave Listening (SWL) Information and Messages
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6620

International Shortwave Broadcast Radio Programming is different
form the customary AM and FM Radio that you may be use to :
It is NOT 24 Hours and 7 Days a Week on One Frequency.
Shortwave Listening is about trying to Catch (Tune and Hear)
a Moving Target.

THAT IS WHY SHORTWAVE LISENING (SWL) CAN BE :
* Fun for the Shortwave Listener (SWL) :o)
* Difficult for the Shortwave Listener (SWL) :-(
[A Challenge and Achievement providing Enjoyment :<]

First - Most International Shortwave Broadcasters do NOT Broadcast
for 24 Hours each Day every Day.

Second - Most International Shortwave Broadcasters broadcast at
different
Times during the 24 Day-Night Cycle to different Target
Areas/Countries;
and often use different Languages Depending on the Target Audience.

Third - Some International Shortwave Broadcasters Do NOT broadcast
on every published Frequency on every Day; and they often change
Frequencies and Times with out notice.

Ruby Ridge Dead
Sammy Weaver, age 13, shot in the back
Vicki Weaver, shot through the back of the head for aiming a 10-month-old
baby at a helicopter
1 unnamed dog, for barking when the Marshals made noises to get them to
bark
Marshal William Degan, killed by Harris in self-defense

Ruby Ridge Wounded
Randy Weaver, shot in the back by FBI sniper Horiuchi
Kevin Harris, hit in the chest by the same bullet that went through
Vicki Weaver's head

Waco Dead

> committee to receive a vote.

When the Dems controlled Congress, it was a daily matter. Repubs back
then complained to anyone who'd listen that they couldn't even get a
bill to the floor. The only times they'd get a hearing is when some
maverick Dem needed some logrolling, and often their bills were sent
to die in committee.

Don't forget there are times when a veto is a fool's errand, too. When
it's obvious the Congress is bent on something, a presidential veto
becomes nothing more than a way to commit political suicide. I vaguely

remember a recent (i.e. last ten years) example, but the circumstances
don't come to mind.

First question is:

Will it actually cross the placental barrier?

and the second question is - just how high a dose does the mother need
to get enough to cause this? (And is it realistic to believe that she
could have gotten this dose?)

Basically - you have no idea what you are talking about and are simply
making things up.

GB,

Confused & Annoyed - My new Antenna does not work - What To Do Next ?
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6628

1. The Bare Wire Antenna Element.
- Are you using Insulators and Nylon-Poly Rope to Rig the Wire ?
- Does the Bare Wire resting on Tree Limbs : This can be
an RF Signal Short.
- It is good practice to have the Bare Wire Antenna Element
at least 3-5 Feet away from everything.

2. The Balun
- What Type of Balun Ready-Made or Home-Made ?
- Besides the Coax Cable Connector on the Balun
how many other connectors are on the Balun ?
- Are these other Connectors Labeled ? Antenna and Ground ?
- Did you connect the Balun the Right way or did you
Reverse it by Accident ?
- Make sure that you did not connect the Coax Cable's
Inner Conductor to the Ground Connector of the Balun.
- Test the Balun for simple Shorts and Continuity with
an Ohm Meter.

3. The Coax Cable
- What Type of Coax Cable and Connectors ?
- Check the Coax Cable Connectors for Defects and Shorting.
- Inspect the Coax Cable along it's full length for
Damage and Defects.
- Test the Coax Cable for simple Shorts and Continuity
with an Ohm Meter.

4. Temporary {External} Wire Whip Antenna - Test One
- Disconnect the Coax Cable from the Balun.
- The use a 5-15 Foot piece of Insulated Wire with a
small Clip or Pin on one end to connect to the Center
Pin of the Coax Cable Connector.
- Rig the piece of Wire Straight-Up or at a 45* Angle
like a Whip Antenna.
- Connect the Coax Cable to the Radio.
- Re-Test the Radio's reception with this Temporary
Wire Whip Antenna.

5. Temporary {External} Wire Whip Antenna - Test Two
- Re-Connect the Coax Cable to the Balun.
- Disconnect your Wire Antenna Element and Connect

the 5-15 Foot piece of Insulated Wire to the Balun.
- Rig the piece of Wire Straight-Up or at a 45* Angle
like a Whip Antenna.
- Connect the Coax Cable to the Radio.
- Re-Test the Radio's reception with this Temporary
Wire Whip Antenna and Balun.

"IF" All of the Above Work and Test OK - Then Take Down
and Re-Rig your Wire Antenna Element using :
- An Insulator at the Balun and Ground Stating Point.
- An Insulator at the Top-Corner-Point.
- An Insulator at the Top-Far-EndCorner-Point.
- Use Nylon-Poly Rope with the Insulators and have
a 3-5 Feet piece of Rope between the Insulators and
the Mounting-Point Structures.
- Rig the Bare Copper Wire so that it is at least
3-5 Feet away from all Buildings, Structures, Tree
Limbs and other Wires.

Finally - If all else Fails replace the Bare Copper Wire
with Insulated Copper Wire an and Re-Rig the Wire
Antenna Element Again.

Well I have to admit I am ticked off. I spent the weekend
stringing an inverted L longwire between the house and a
couple of trees. Antenna is 30' up, 75' long, bare stranded
copper, is grounded to the outside copper water pipe, has
a 4:1 balun then 75ohm coax to the receiver.

Receiver is ICOM PCR 1000 and is itself grounded to inside
copper water pipe.

I start to do some SWL'ing and the recpetion of the
"easiest" SW stations is crap!!. Signal strength=1.

I put up my telescoping antenna and attach 20' of
insulated stranded copper wire, run in diagonally
across the living room, no ground and the signal
strength=3-5!!

Go figure???

Ask away whatever questions you feel prudent because
I am at a complete loss.

I don't like the Dems, but have to concede they actually have their eye
closer to the ball than the War President. Osama is responsible for 9/11.
But Lord Bush gave him a free pass and went after an easier target that had
nothing to do with 9/11. Learn your history -- you'll get a clue!!

Simply not true. Congressmen on both sides of the fence are asking for a plan, a timetable, regarding when we can turn this mess over to the Iraqis. Wasn't that the original stated goal? I don't know of anybody demanding we cut and run (the cynical Republican sham resolution aside). I'm not saying there isn't someone with that attitude - I just don't know who it is. The consensus among Dem leaders is that we need to see this thing through, but with some sort of exit plan.

Why is talk radio so conservative you ask?

Well, maybe the conservatives are trying to play catchup with their wildly successful liberal competition on NPR. Conservatives have been unable to create a single network that can provide the quality of programming and informative news that is available on NPR. Indeed the polished presentation skills of NPR talk show hosts far outshines the usual strident delivery of most conservative talk show personalities. Consequently conservatives have decided to flood the AM airwaves with ranting personalities like Rush Limbaugh spouting extremist gibberish for hours on end.

Bush was in China acting tough. And they just showed him the back of their hands and summarily dismissed him. He's returning home with nothing from then, just slinking away with his tail between his legs, trying to act proud. But just wait 'til he tells you about all the great things he's doing with Mongolia!!

3628. There are Two 'external' Sony Active Antennas to possibly use with your Eton E1 Radio

For One and All,

There are Two 'external' Sony Active Antennas
to possibly use with your Eton E1 Radio :
http://groups.yahoo.com/group/ETON-E1-XM-Radio/message/1804

Sony AN-1 "Whip" Active Antenna
Coverage : 150 kHz to 30 MHz = LW - AM/MW - SW Bands
http://www.universal-radio.com/catalog/sw_ant/2206.html
* This is a good Fixed-Location Limited-Space LW/MW/SW
Antenna when a Longwire/Random Wire Antenna can not be
used outside the House-Condo-Apartment.

Sony AN-LP1 'portable' "Loop" Active Antenna
Coverage : 3.85 MHz to 21.95 MHz = Shortwave Bands "Only"
http://www.universal-radio.com/catalog/sw_ant/3676.html
* This is a good On-the-Window Traveler's Shortwave Antenna
also works well when you can not place an Antenna OutSide [.]

hope this helps - e1'ing you all ~ RHF

. . .

You sound terribly convinced. I respect that. I feel your pain. I used to feel the same way. But there's no getting around it: we were lied into war; we were told it was going to be a cakewalk; and Mr. Rumsfeld keeps telling us that the 1900 servicemen and 15,000 missing limbs are the work of a "few deadenders." He's telling you what's going on -- a few deadenders with deep support atre bringing the might & power of the American Empire to her knees.

EMPIRE SONG
Killing Joke - Revelations (1982)

Back to square one, and the old school backfire
It's just begun, let's watch the blind eyes turning
Stains on the wall, been waiting far too long now
Nice day, blue sky, I watch them shrug their shoulders
Tighten the grip (getting tighter)
Now see the ball is rolling
We take delight, it's been a long wait for this moment.

Back to square one, another empire backfire
Back to square one, another empire backfire

Sign of the time, blood pressure running high now
Nowhere to dance, which channel can you turn to?
We take delight, we watch them shrug their shoulders
Let's take delight, it's been a long wait for this moment.

Back to square one (now it's my turn)
Another Empire backfire
Back to square one (now it's your turn)
And the old school backfire...

EMPIRE SONG
Killing Joke - Revelations (1982)

Back to square one, and the old school backfire
It's just begun, let's watch the blind eyes turning
Stains on the wall, been waiting far too long now
Nice day, blue sky, I watch them shrug their shoulders
Tighten the grip (getting tighter)
Now see the ball is rolling
We take delight, it's been a long wait for this moment.

Back to square one, another empire backfire
Back to square one, another empire backfire

Sign of the time, blood pressure running high now
Nowhere to dance, which channel can you turn to?
We take delight, we watch them shrug their shoulders
Let's take delight, it's been a long wait for this moment.

Back to square one (now it's my turn)
Another Empire backfire
Back to square one (now it's your turn)
And the old school backfire...

[KILLING JOKE - Empire Song - Revelations (1982)]

The fact they even call themselves "conservatives" is simply the first of a
laundry list of lies from these warpigfucks. Lie #2 was the nosestretcher
that unlike their predecessor, they had no intention of nation-building.

"Another empire backfire."

WAR DANCE
Killing Joke (1980)

The atmosphere's strange
Out on the town
Music for pleasure
It's not music no more
Music to dance to
Music to move
This is music to march to
IT'S a war dance

A war dance

Look at the victim
Scrawled on the wall
You know the the reason

Outside the door
You got something
Nasty in your mind
Trying to get out
IT'S a war dance

A war dance

We walk round the pitch
Honesty is sick
Try to be honest
Look what you get
The food runs short
And then the money talks
One way out
YOUR PREMONITION IS CORRECT

A war dance

Greg,

No I do not have the HeathKit Mohican GC-1A any more.

http://cgi.ebay.com/Heathkit-GC-1A-Mohican-Short-wave-Receiver_W0QQitemZ5832603589

It was a single conversion Radio with a 455 kHz IF.

Note - The HeathKit GR-78 was a follow-on to the GC-1A.
http://www.cpinternet.com/~ki0le/pages/gr78.htm
http://www.member.uni-oldenburg.de/olaf.haenssler/olaf/manuals_etc/GR78_Schematic.jpg

I thought it was 'something' back then; buy a
Grundig Satellit 800 Millennium is a far far better
Radio.

RadioShack Realistic DX-394 "MOD'ed" by Low Bander
would be a better use of your money - IMHO
http://cgi.ebay.com/REALISTIC-DX-394-MODEL-A-KIWA-SUPER-MODS-SWEET_W0QQitemZ5832923476

hope this helps ~ RHF

Date posted: 2005-11-14
HAARP Project Proceeds; Said to Be Record-Setting HF Project

Continental said it is ahead of schedule in delivering 132 ultra-low-noise transmitters to U.S. government contractor BAE Systems for use in the High-Frequency Active Auroral Research Program.

"When the massive planar array for ionospheric research is completed in 2007, it will include a total of 180 Continental Electronics D616G 10-kW combined transmitters, which the company is upgrading specifically for HAARP," the supplier stated. The facility is near Gakona, Alaska.

The installation began in 1993 with 18 transmitters, expanded to 48 in 1998 and will grow to 180 transmitters. The final expansion will bring the HAARP array to full power, with ERP increasing from 84 dBW to about 96 dBW.

Continental, which has a contract to supply six transmitters per month, stated that the system "will have greater transmitter modulation capability, variable frequency range and beam steering than any other high-frequency transmitting system in the world."

According to the manufacturer, the federal government is constructing the facility to conduct upper-atmospheric and solar-terrestrial research via a phased array transmitter. The goal is to learn more about the ionosphere, a section of the atmosphere ionized by solar radiation with natural electrical currents that can be modulated with radio signals.

"Much of the ionosphere's scientific potential lies in satellite communications, which depends on signals passing through it," Continental stated.

It's good for "ear" utilities, but not for utlilities that require
decoding (fax, etc).
You can find them and then use your 'better' set with a finer
selection to feed your decoding apparatus (cw, rtty, fax).

I assume that you can understand voice and morse.

He'll have to answer the first question. The answer to the second question is a
big, fat, "negative" since Radio Scrap discontinued the DX-394 a few years back
when they were turning themselves from Radio Shack into Cellphone Shack.

The radio is certainly stable and sensitive enough to work non-voice utilities. The only shortcomings will be:
1. Filters are wide so close strong signals may clobber the one you are trying to decode.
2. Tuning is limited to 100hz resolution, so there may be some situations where finer tuning would bring a signal in. Much of the time I think you will find 100hz resolution will work.

It isn't the best radio for UTE dxing, but it will work. A much better choice for about the same money on the used market would be a Kenwood R-5000 with 10hz resolution.

Evidently, you know absolutely nothing about US military power nor strategy...some of our latest cruise missiles could have destroyed any target without exploding.....and if total destruction of the nation was the intent, then Iraq would have been a dust boy as the Forbidden Regions in the Arabian Peninsula in a mere 96 hours.

Terrorist can only be defeated when the cause, resources, or people are removed. Since every radical Moslem with intent on Jihad against the Crusaders (come on, give your brain a break if you believe this reasoning too) is there, their resources and targeting is usually confined to Iraq, the size of California. True the bombings in Jordan are a fluke, but they have now backfired, and created a "no-fly" zone in Jordan.....so the only havens and logistic support for these demented souls is Syria, and quite possibly Iran through the marsh regions.

No for those there in Iraq, these "poll numbers" are a joke......over here the Iraqi's have a firm grip on the reality of the situation, and will not ask the Americans to go until they are able to elect a government that can handle these international criminals on their own volition and direction.

Unless you have been over here in the Middle East, especially now in Iraq, where do you get your info from???? Try coming over here and getting it first hand while earning that free-ride citizenship. Nothing could irritate the soliders here more than those same whining Vietnam-protester types......always the negative, but never the patriot.

Look it up in the dictionary! It's actually pretty simple.

Sheesh... you liberals are going nowhere so fast it makes ones head
spin.

dxAce
Michigan
USA <

That's not an answer. You *know* what I mean, and you *know* it's not
the dictionary definition.

Maybe you feel that you're not obligated to put some substance behind
that comment - that's your choice, I guess.

Ok, I'll try for you.

"Finished" in this instance, as defined by you, means when a new Iraqi
constitutional government has been established (preferably if not
absolutely favorable to the U.S.), where the insurgents in the country
are totally eliminated *OR* the new government has a military/police
organization set up that can ably deal with them. Is this about right?
Personally, I think that this definition is about right, and under the
present circumstances one that the U.S. probably ought to seriously
consider, assuming Bush would ever want to articulate this concept
("Bush" and "articulate" in the same breathe is an oxymoron, I know).

Notice I have left out whether or not we have secure access to Iraqi
oil and whether or not we find it necessary to maintain presence there
in order to use it as a jumping-off spot for additional campaigns
against other contrary and/or terrorist regimes. If these are desired
by Bush, both of these are likely to extend the time we are there
beyond the local "finished" point, possibly indefinitely.

>Actually, I don't think making people pose naked is torture, but the liberal media got the attention of all the bleeding heart liberals. It was the only way they had to fight back. They whined about some naked pictures. What happened to the Jews at the hands of the Nazis, that was torture. <

You're right, it was not really torture, although what we have seen on TV and in papers was demeaning. Maybe the biggest problem was that it wasn't used so much as a method to extract strategically valuable information from the enemy, as it was used largely for recreation by the captors. There are few people who'd argue that limited and necessary coercion or torture of a few to gain information that could rescue many others or prevent costly disasters is not justifiable...but subjecting people to something even as mild as what we've seen, or worse, for jollies, is not going to gain acceptance among civilized societies.

In the mornings Australia is always better in the beginning of the time
slot. They fade a lot faster in the morning time slots then they used to
for me at least and don't last through the mornings. On any morning
frequency/time slot earlier is better just as any time slot late
afternoon evening later is generally better. The up shot is I have to
catch them early mornings or evenings.

They were talking about transmitter/antenna maintenance occurring soon
and that they would only be on two frequencies. It might be tomorrow
that they will be off most frequencies. Sorry for being vague but I was
busy at the time they broadcast this. Looked around on their web site
and don't see it mentioned.

I would think they would be pleased with the advertising revenue it
generated. I agree the number of ads displaying the same information
seemed excessive. If I was Eton I would have varied the ads more and
used that space to give more information about their radios. The ads
were very repetitive.

Well, although in my opinion, the shrub isn't the brightest bulb in the
box, I *still* can't see him being so dumb as to install a "Bush-basher"
for four years. You appoint your cronies and supporters.

And "getting enough spotlight"??? Powell was the highest non-elected guy in the land (maybe after the VP) and a major player on the world stage. What could the Dems *possibly* offer him that would trump that???

Sorry, I don't buy either of your theories and will respectfully continue to agree to disagree.

>I'm so damn tired of you liberals. <

Talk about bitching and complaining!

So do something about it! Or else, live with it...I don't care. Just realize that your points are not going to get made unless you insert something substantial into the mix.

But then, maybe you have the right idea. I'm not sure that posting anything on this milieu constitutes making a point anyhow. So few want to engage in an exhange of ideas, and so many are just looking to extend the taunts of their schoolyard days, that it just sort of goes over everybody's head. Better to just join the rumble.

Sorry, George, I'm In the Majority ...from Michael Moore

11/19/05

Dear Mr. Bush:

I would like to extend my hand and invite you to join us, the mainstream American majority. We, the people -- that's the majority of the people --
share these majority opinions:

1. Going to war was a mistake -- a big mistake.

2. You and your administration misled us into this war.

3. We want the war ended and our troops brought home.

4. We don't trust you.

Now, I know this is a bitter pill to swallow. Iraq was going to be your great legacy. Now, it's just your legacy. It didn't have to end up this way.

This week, when Republicans and conservative Democrats started jumping ship,
you lashed out at them. You thought the most damning thing you could say to
them was that they were "endorsing the policy positions of Michael Moore and
the extreme liberal wing of the Democratic party." I mean, is that the best
you can do to persuade them to stick with you -- compare them to me? You gotta come up with a better villain. For heaven's sakes, you had a hundred-plus million other Americans who think the same way I do -- and you
could have picked on any one of them!

But hey, why not cut out the name-calling and the smearing and just do the
obvious thing: Come join the majority! Be one of us, your fellow Americans!
Is it really that hard? Is there really any other choice? George, take a walk on the wild side!

Your loyal representative from the majority,

Michael Moore

>> If it was the Iraqi insurgents doing this to our soldiers (the
>> demeaning nude stuff, not the real torture), would you not be screaming
>> for their blood?

>What's funny is that the libs aren't screaming for insurgent blood at all! They
seem to think the USA is the enemy. <

Well, we are *somebody's* enemy. It depends purely on one's
perspective. I suppose that there are some out there who use the
rational that the U.S. is always right and thereforre we are really
everybody's friend, and some nations are just too stupid to realize
it and thus need to be taught a violent lesson.

I don't make a habit of screaming for *anyone's* blood. I'd rather
concentrate on solving problems. Sometimes ya gotta fight to do this,
sometimes ya don't. No matter what, there's no point in making a bad
situation worse, and once you've captured the "bad guys," there's no
non-strategic need to be cruel.

>But that's typical left-wing behaviour. <

No, just typical *civilized* behavior.

Again, no answer to the question. *That's* typical right-wing
behavior.

They are non-standard characters that my news reader does not handle
well. I'm sure other people have a similar problems with it.

www.devilfinder.com World War Two Mississippi Prisoner of War Camps

Compare how World War Two Prisoner of War Camps in America (other states in America had World War Two Prisoner of War Camps too,look up your state) treated German Prisoners of War viz a viz how the Germans and Japanese treated American Prisoners of War.OK,enough of that,,,, This War on on terrorism is much different.Terrorist beheaded Americans in Iraq.Geneva Conventions says terrorist have NO rights.y'all need to consider how the raghead terrorist treat Americans and America's Allies and Civilian people in this War on Terrorism.I say bring on more Willy Pete and Napalm for the terrorist!

JYAMS73,

Yes I do still have my GE World Monitor Model # 7-2990A.

They are a nice looking Radio from their era and sound pretty good.
To me the only problem is the Tuning Knob Bump from the Broken
Gear in the Tuning Knob Drive. Find one without the Tuning Knob
Bump and their are a Nice Radio.

They fit in well with the old Panasonic RF-2800, RF-2900 and
RF-2600 Radios and a few others of that time period.

But remember that they are only a 'portable' AM/FM Shortwave
Radio and unlike the Panasonics GE took some short-cuts in
the size of the Ferrite Antenna and the Plastic Variable Tuning
Capacitor.

The GE World Monitor Model # 7-2990A is a Nice Looking Radio
from that time period.

IMHO - If, GE had simply made an AM/FM 'only' version of this
Radio with a 200mm Ferrite Rod Antenna and Three Gang Air
Variable Tuning Capacitor it would have been the a Great
SUPERADIO IV with Digital Frequency Display.

hope this helps you ~ RHF

We're talking about the transistorized one from the eraly sixties? I suspect
it was never very good. That was an era when they were still learning about
transistors, and a lot of those early transistor shortwave radios were not
very good.

There was a "sequel" to it in the late sixties or early seventies, I
want to say the GR-78 but that may be a wrong memory, that was similarly
intended to be a portable but not like the "all band portables" of that time
that you'd buy at the drugstore. I don't know how good it was, but it
at least kicked in a second conversion stage on the highest band to
reduce image problems.

Really? I thought the left-wing was supporting getting out of Iraq
yesterday,
rather than increased action against the creeps.

Man, I thought you just said to heck with me ;-) No, I think that
under the circumstances as they exist right now, as I suggested to you
earlier, we need to stay at least until the nation is stable. To do
this, we need to fortify the troops the best we can to give them the
greatest absolute position of strength through the end of the period
(which it doesn't sound as though Bush is doing just yet). Then, after
that is accomplished, we (as a nation, not as a Republican party) need
to decide whether there is an additional valid reason to remain.

Does this sound like left-wing to you? (maybe it does!).

I have the complete setup. The exterior module consists of a whip
antenna, about 5.5-ft. tall, and a small plastic box at the base of
the antenna with assorted electronics in it. There is about 50 feet of
coax coming out of the bottom of the plastic box, which goes to your
control box coax plug labelled, exterior module.

The complete system is an active receiving antenna system that works
between 50 khz and 30 mhz.

The Attenuation control on your box matches the impedance of the
feedline to the radio input.

I don't know if Stoner Communications is still in business, but if
they are, the Exterior Module Assembly, including telescoping antenna
and cable, is listed in the manual as Part # 166044. They give a
California phone number (714) 987-4624.

I bought my antenna system in 1988 for about $200-250. The instruction
manual is dated 1975, so this system's been around awhile.

The antenna has worked like a champ with my SW receiver, a Japan Radio
Company NRD-525.

MB - Yes that was the HeathKit GR-78 and it was dual-conversion
above 18 MHz.

As you correctly noted the HeathKit CG-1A Mohican Receiver had it's
'limitations' being an early 1960s generation 10+ Transistor Radio.

The HeathKit GR-78 Receiver came along in the 1970s and was
a little better Radio.

But for Looks the HeathKit CG-1A Mohican had all those Chrome Knobs
- - - A Real Pretty Radio :o)

FWIW - I have two HeathKit GR-78 Receivers down in Sub-Basement # 3.
One is a Project Radio with the Manual and the other is a Parts Radio.

The Two are available as a Set for $200 - Includes Shipping in the
48 States. ? ? ? Any Takers ? ? ?

Note - Project Radio = Needs Repairs and a lot of Time and Work.

Note - Parts Radio = Beyond Repair [.]

that's all folks ~ RHF

++++++++++++++++++++++++++++++++
I compared a friends NIB 100D and was very disapointed.
The Northcountry active antenna is a very good deal.
It costs less then 50$ and represents a excelent bargin.

<http://www.northcountryradio.com/index.htm>

An online set of jpgs from the original PE article can be found at:

<http://www.northcountryradio.com/Published/actant_0896/page1.htm>

I have a diagram for the original 100 but it did not give semiconductor

numbers or feritte core specs.

The base unit you have should work fine with the North Country antenna.

I live less then 5 miles for a day only 1KW MW outlet that causes many
active antennas to give spurious responses. But even at night I had a
lot of IM
and harmonics from MW outlets that are within ~20 miles. The 6 and 9MHz
SW bands were a horrible mix of RF garbage. And when CBer who lives
about
a 1/4 mile away keyed up the 100D went "nuts".

Terry

According to the dustjacket, author James Bamford "was until recently Washington Investigative Producer for ABC's "World News Tonight with Peter Jennings." Impressive!

The dustjacket describes the book as "A no-holds-barred examination of the National Security Agency--packed with startling secrets about its past, newsbreaking revelations about its present-day activities, and chilling predictions about its future power and reach ... The NSA is the largest, most secretive, and most powerful intelligence agency in the world ... it dwarfs the CIA in budget, manpower, and influence ... "

Nor is "Body of Secrets" Bamford's first expose on the NSA. "James Bamford first penetrated the wall of silence surrounding the NSA in 1982, with the much talked about bestseller 'The Puzzle Palace.' In 'Body of Secrets' he offers shocking new details about the inner workings of the agency, gathered through unique access to thousands of internal documents and interviews with current and former officials. Unveiling extremely sensitive information for the first time ...." etc., etc.

Friends, what does all this mean? If Bamford was truly revealing "shocking" secrets of America's most powerful intelligence agency, do you really believe current and former officials would be talking to him, and that he would be given "unique" access to internal NSA documents? Of course not.

There's even a photo of the NSA building on the back cover. The back dustjacket reads: "JACKET PHOTOGRAPHY COURTESY OF THE NATIONAL SECURITY AGENCY."

Bamford is an NSA household pet, the designated unofficial "historian," and their PR flack. Bamford tells us what his job is. He quotes NSA Director Michael Hayden: "The American people have to trust us [the NSA] and in order to trust us they have to know about us." (Unnumbered and untitled page at beginning of book.) That's Bamford's job: Telling the public exactly what the NSA bosses think the American public should know so the American public trusts the NSA.
Remember what the dustjacket says. "Body of Secrets" is supposed to be an expose of the NSA, right? So instead of exposing an NSA outrage, the NSA errand boy exposes the Pentagon's. So much for the "expose." Bamford is getting the American public to trust the NSA by citing obviously faked documents. So much for the "trust."

http://www.public-action.com/911/northwds.html

Looks like James Bamford is a fiction writer.

Years ago many shortwave radio companies and dealers advertised in Passport. Sadly, this is no longer the case and I really don't know why. Where is AOR's ad? Where are Sony's ads (yeah, right!)? Why doesn't Degen/Kaito advertise? It's also a shame that the distributors which do advertise (Universal being a notable exception) just run the "co-op" Eton ads.

I am glad that Eton sees fit to advertise in Passport but I too wish the ads were less repetitive (and more informative). At least those ads don't cause Passport to lose its focus; they don't give Eton radios "glowing" reviews where they don't deserve one.

I have found, over the years, that Passport's reviews are fair, comprehensive, and ACCURATE. In my opinion the yearly Passport is worth every penny they charge.

Best,

Joe

3773. Two Matching Transformers and Three Hook-Ups

For One and All,

Two Matching Transformers and Three Hook-Ups :
http://groups.yahoo.com/group/Shortwave-SWL-Antenna/message/6647

1. Basic Balance (Dipole) Antenna to Coax Cable via a BALUN type
Matching Transformer with the Ground connected to the Shield.
Note - Parallel Matching Transformer Windings (Transformer).

```
*-------------Antenna Wire------------00....Rope.....
/
/
/ /*---- Inner Wire C/C
/ /
/ /
/ /*<GR>===== Shield C/C
/
/
*-------------Antenna Wire------------00....Rope.....
```

2. Basic Un-Balance Single Wire (Random) Antenna to Coax Cable
via a UnUn type Matching Transformer with a "Common" Ground
connected to the Shield. [Both UnUn Winding share a Common
Ground Connection internally or externally.]
Note - Parallel Matching Transformer Windings (Transformer).

```
*-------------Antenna Wire------------00....Rope.....
/
/
/
/
/ /*---- Inner Wire C/C
/ /
/ /
/ /*===== Shield C/C
**
GR
```

3. Basic Un-Balance Single Wire (Random) Antenna to Coax Cable
via a UnUn type Matching Transformer with a "Common" Ground
connected to the Shield. [Both UnUn Windings share a Internal
Common Ground Connection.]
Note - Series Matching Transformer Windings (Auto-Transformer).

```
*-------------Antenna Wire-----------00....Rope.....
/
```

/
/
/
/*------- Inner Wire C/C
/
/
/*======== Shield C/C
*
GR

NOTE - The same Parallel-Winding Matching Transformer can be
used for # 1 and # 2. The # 3 is designed to use one way.

hope this helps - iane ~ RHF

I have the schematic and parts list in my DA100D manual. I can copy it
and snail mail it, if you'd like.

Looking at the parts list, it appears to be mainly capacitors, diodes
and resistors, with a couple of chokes and a bifilar coil.

Douglas Hagmann www.homelandsecurityus.com on
www.coasttocoastam.com tonight. coasttocoastam.com very rarely
ever has anything or anybody on there (it is a KOOK show with KOOKS
hosting the show) worth listening to (frankly,I just can not stand to
listen to George Noory and Art Bell at all,they BORE me to death) but
tonight,its going to be a good show.I am fixin to set another radio in
another room in my house with my RCA six hour digital recorder and at
midnight tonight,I will turn them on.I wont stay awake all night long
and miss my beauty sleep for any d..n body.

Then maybe you should try rec.ham-radio or rec.radio.amateur.

There are regulation limiting the types of amateur transmissions.
They can't be for commercial purposes.
They must have a specific intended recipient (except
for CQs and some W1AW broadcasts.)
Music is also not allowed.
